if you want only to display featured products

Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option YES is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework included on your site, then disable this option also.

Images resize:

Set YES to resize images on the module

Show background:

YES to show gray background color or not

Customizable CSS Classes

CSS Classes for advanced customization

If you have some knowledge of how to set up style sheets, here are the main classes that you can format to create your own design.

If you do not have this knowledge, you can request support in our forum. Also, we recommend that regular visits to our official site – VTEM.NET - where you can find some examples in the future.

Here's the list of classes and ID CSS style used on the VTEM Virtuemart Scroller module:

- . vtem-scroller*
- . panel*
- . slide*
- . productPrice*
- . addtocart_button_module*
- . vtem_scrollarea*
- . vtem_scrollarrow*
- . back*
- . vtemscrollbar*
- .forward*

In some cases, may have to impose the setting of class, to overcome already existing ones on the module, by placing the “!important” class in the style configuration.
