Setting	Description
Title:	Enter a name for the widget.

Select Category:	Select a category of posts in the category list to display in the slider. If a category does not have any post, it will not appear in the list.
Number of items:	Specify the quantity of items to display in the slider.
Slider height:	Defines the slideshow height.
Show navigation	Shows or hides the navigation on the slider
Show next and previous:	Shows or hides next and previous arrows.
Animation:	Defines the preferred transition between items.
Duration of animation:	Defines the transition duration.
Autoplay:	Defines whether or not the slideshow items should switch automatically.
Autoplay Interval:	Defines the timespan between switching slideshow items.
Video autoplay:	Defines whether or not a video starts automatically.
Video mute:	Defines whether or not a video is muted.
Kenburns:	Defines whether or not the Ken Burns effect is active. If kenburns is a numeric value, it will be used as the animation duration.
Shortcode:	Allows to display widget anywhere on the page. Copy this code. Then, open the edit menu of the page into which you wish to place the widget. Paste the code you copied into the contents of the page.
Widget logic:	Allows to control the pages that the widget will appear on. More about this feature in <a href="https://wordpress.org/plugins/widget-logic/other_notes/">https://wordpress.org/plugins/widget-logic/other_notes/</a> .
