

Layouts

This section makes the arrangement of your content very easy and flexible. You can enable or disable system output, define the layout of the theme's widget or module positions and select a style you created in the customizer. Additionally you have the possibility to store your modifications in a layout profile and assign it to different pages.

Click **Add** in Layouts page and enter a new name to create the layout.

“Style” option enables you to assign a style to your layout. In addition with the customizer and the layout manager this makes styling your pages very flexible.

Content

Display specific content elements in the theme.

- ☐ Hide system output.
-  ☐ Hide page title.
- ☒ Fixed main menu.
- ☐ Create offset header block.

Setting	Description
Hide system output	This option allows you to hide the main system output. This is useful, if you want to position only widgets on certain pages, without leaving redundant space.
Hide page title.	This option allows you to hide the title page
Fixed main menu.	Allows set fixed menu when scrolling page.

Sidebars

The sidebar settings allow you to create a fully functional multi-column layout. The only requirement is to publish a widget on a sidebar position to display the selected alignment

Choose the sidebar widths and align the sidebar to the left or right.

Position	Width	Alignment
sidebar-a	25% ▼	Right ▼
sidebar-b	50% ▼	Right ▼

Setting	Description

Width	Choose from the provided percent values to set the sidebar width.
Alignment	Define, whether the sidebar is published on the left or right side of the content

Grid
