

FlatHost supports custom WordPress menus for the main menu. There is 1 area of the theme where you can assign the menu; the primary.

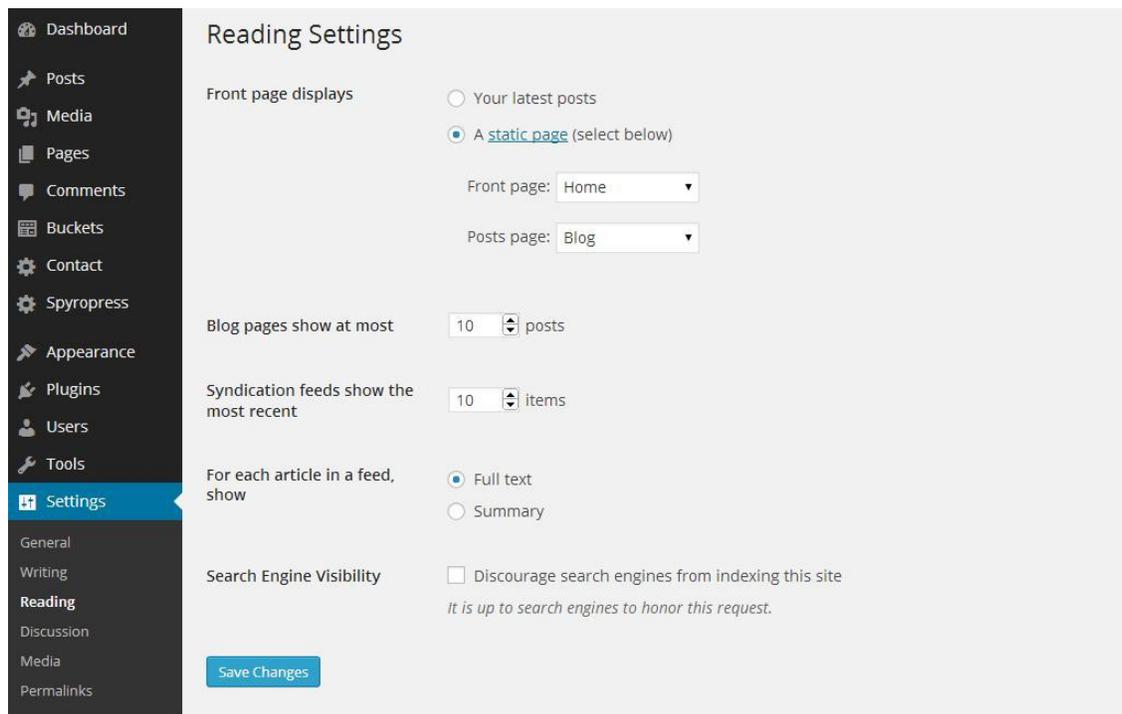

The menu location can have a custom menu assigned. Once a menu is created and assigned to the location, it will show up on the site.

To setup the home and blog page, navigate to **settings** → **readings**, select “A static page” and choose your “Home” page as the Front page and “Blog” page as the Posts page. Blogs pages can be shown up to the users request. inarticle format there are two forms in which data can be viewed are denoted as:

- Full Text
- Summary

In full text it shows the whole content data and shows the exact information of the data.

In Summary shows the highlights of the content that shows the exact data on clicking.

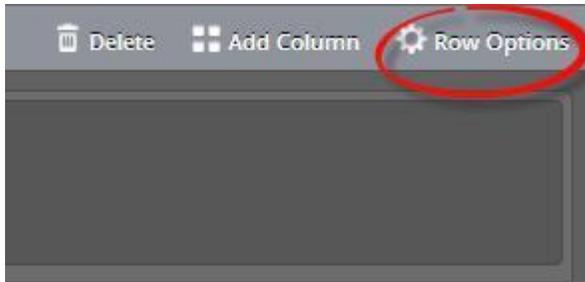

The image shows a screenshot of the WordPress admin interface, specifically the 'Reading Settings' page. On the left is a dark sidebar with a menu containing: Dashboard, Posts, Media, Pages, Comments, Buckets, Contact, Spyropress, Appearance, Plugins, Users, Tools, and Settings (highlighted in blue). Below the sidebar are sub-menu items: General, Writing, Reading (highlighted), Discussion, Media, and Permalinks. The main content area is titled 'Reading Settings' and contains the following options:

- Front page displays:** Radio buttons for 'Your latest posts' and 'A static page (select below)'. The 'A static page' option is selected. Below it are two dropdown menus: 'Front page:' set to 'Home' and 'Posts page:' set to 'Blog'.
- Blog pages show at most:** A spinner control set to '10' posts.
- Syndication feeds show the most recent:** A spinner control set to '10' items.
- For each article in a feed, show:** Radio buttons for 'Full text' (selected) and 'Summary'.
- Search Engine Visibility:** A checkbox for 'Discourage search engines from indexing this site' which is unchecked. Below it is the text: *It is up to search engines to honor this request.*

At the bottom left of the settings area is a blue button labeled 'Save Changes'.

Setting Up One Page Menu

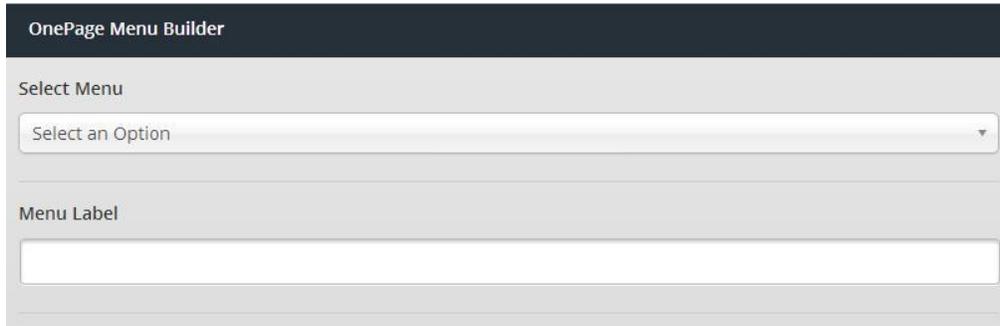

Creating a link to your section is what a One-Page Theme is all about and we make this really easy and fun to add the section links.

Stablity has the ability for you to make a one page site with a parallax scrolling menu. A one page site allows you to put all the content on one page, and the menu items will link to each different section of the page. Think of it as a full site but all on one page. Please read below for information on how to set this up. [ThemeSquared-builder-row-options](#)

1. Navigate to **Pages** → **Add New** and click Builder Tab.
2. Create a Row and put you content into Row using the desired Modules.
3. Now goto Row Options
4. Select the menu in which you want to add the section link
5. Give Menu a title under the Menu Label field
6. Click [Save]

Reorder Menus & Add Pages

OnePage Menu Builder

Select Menu

Select an Option

Menu Label

1. Navigate to **Appearance** → **Menus**
2. Reorder the menu items by dragging to the desire position.
3. In the left hand column is a list of all your pages, as well as custom post types, categories, tags, etc... You can then select certain pages, or categories and add them to the menu you are on.
4. Click Save Menu and you are done with reordering and adding new links of other pages. [LINK!](#) The WordPress menus functionality is well documented on the WordPress codex.
