

If you are viewing your site in Firefox and your social icons and other icons on your site are displaying as letters or other characters you may have to add this to your WordPress .htaccess file.

```
<FilesMatch"\.(ttf|otf|eot|woff)$">  
<IfModulemod_headers.c>  
12345 Header set Access-Control-Allow-Origin "*"   
</IfModule>  
</FilesMatch>
```
