Everyone loves sliders, they are the perfect way to catch your viewers attention by displaying your important content.**Flathost**includes Flex Slider(for content). Slider can be used on any page or post and offers its own set of unique options.

To Create A New Slider

1. Click on the `Sliders` sidebar item in your admin section, then click the `Add New Slider` button.

2. Insert a slider name in the editing field of screen.

3. Then select the slider type you want to use.

4. Once you are done, click `Publish` and your new slider will be made.

Creating New Slide

1. Click the `Add New Slide` button.

2. Set the Title, Description and other fields you want to set.

3. Click the `Upload` button to open the Media Manager to either upload the image or select from already uploaded images.

4. When finished, click `Update` to save it.
