Do you want to display and compare your services/products? Price table is the answer.This theme comes with a great Custom Post Type **Pricing Table**, by this tool you can build Price table with any number of columns, rows and style with simple clicks in minutes to create **Price Table** navigate to `Pricing Tables` → `Add New`

Creating a Price Table

There are 2 styles for pricing table.

Once after choosing the style, you're on the Add New Price Table screen, you will then be able to add the Title in the title field. Now start adding columns and row.

- Add any number of columns by clicking `Add New Table`

- Add any number of rows by clicking `Add New Features`

- For removing row or column click `Remove`

- You can also set Title, Price and Button URL for each column
