

# Layouts

This section makes the arrangement of your content very easy and flexible. You can enable or disable system output, define the layout of the theme's widget or module positions and select a style you created in the customizer. Additionally you have the possibility to store your modifications in a layout profile and assign it to different pages.

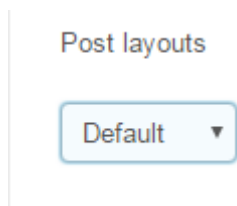

To configure this part go to Busis->Layouts.

Click **Add** in Layouts page and enter a new name to create the layout.

“Style” option enables you to assign a style to your layout. In addition with the customizer and the layout manager this makes styling your pages very flexible.

## Post type

Specifies the post type for specific layout.

## Content

Display specific content elements in the theme.

- ☐ Hide system output.
- ☒ Hide page title.

This option allows you to hide the main system output. This is useful, if you want to position only widgets on certain pages, without leaving redundant space.

## Sidebars

The sidebar settings allow you to create a fully functional multi-column layout. The only requirement is to publish a widget on a sidebar position to display the selected alignment

Choose the sidebar widths and align the sidebar to the left or right.

Position	Width	Alignment
sidebar-a	25% ▼	Left ▼
sidebar-b	25% ▼	Left ▼

Setting	Description
Width	Choose from the provided percent values to set the sidebar width.
Alignment	Define, whether the sidebar is published on the left or right side of the content

## Grid

This table gives you an overview of the grid layout settings.

Choose the grid layout for each position. Further, you can enable horizontal dividers and prevent the responsive grid behavior. Note: Both options are not taken into account for the stacked layout.

Position	Layout	Responsive	Full Divider	Width	Collapse	Background	Padding	Border background
top-a	Parallel ▼	Stack on phones ▼	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No padding ▼	No border ▼
top-b	Parallel ▼	Stack on phones ▼	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No padding ▼	No border ▼
top-c	Parallel ▼	Disabled ▼	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No padding ▼	No border ▼
top-d	Parallel ▼	Disabled ▼	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No padding ▼	No border ▼
top-e	Parallel ▼	Disabled ▼	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	No padding ▼	No border ▼

Setting	Description
Layout	Define, whether the widgets are positioned parallel, stacked, first doubled, last doubled
Responsive	Define, on which devices the widgets take up full width and stack vertically.
Divider	Add a vertical divider between parallel or first doubled widgets/modules to separate them from each other.
Full Width	Allows to install all the elements of the position of the fullscreen
Collapse	Allows to remove the gutter entirely
Padding	Define padding between widgets in the section
Border background	Select one of the default background border for the positions

## Assignment

After finish with the layout settings, choose page or category for applying new layout.

## Pages
