

Lucia theme documentation

Introduction

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thank you!

Installation

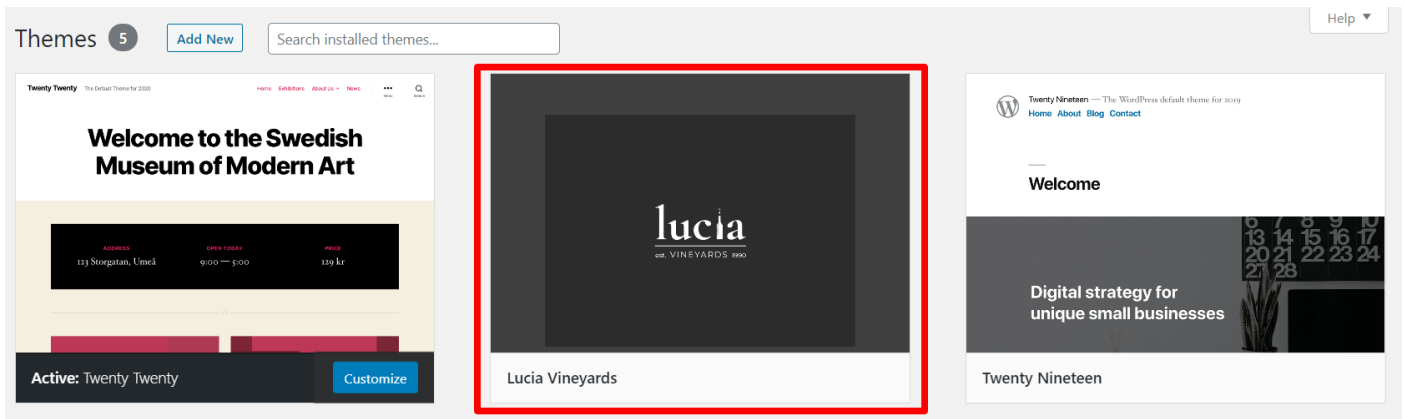

For proper installation please follow the next steps. Also please check the WordPress installation guide, which you find here [Installing WordPress](#)

A. FTP Installation (manual)

1. First of all, your server should support **PHP 5.3.x**. You will also need an installation of WordPress . If you don't have one, download it from [here](#) and follow instructions on the WordPress site on how to install it correctly.
2. If you have a running installation of WordPress , place the theme files from the download into the "themes" folder. The path to this folder should be something like **/WordPress_install_dir/wp-content/themes/**. Make sure that all theme files (**without the PSDs and help files !**) are in the separate folder called "**lucia-vineyards**". The path to the theme files should be **/WordPress_install_dir/wp-content/themes/ lucia-vineyards** upon completion of this step.
3. Enter you WordPress Admin Interface. It should be available at <http://yourdomain.com/wp-admin>.
4. In the left menu, find **Appearance** tab. Click it. A submenu should appear. Click **Themes**.
5. The themes screen should show all of your installed themes.
6. Find **Lucia** theme and hit **Activate**.

Lucia Vineyards Wordpress Theme

Created: 30/01/2020 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

B. Through WP administration panels

1. Log in to WordPress
2. Select the **Appearance** panel, then **Themes**.
3. Select Install Themes
4. Use the sub-menu and click on **Upload**. Choose the file **Lucia.zip** from the package you downloaded from TF and click **install now**.

1. Click Downloads

2. Enable Update Notifications

3. Download Installable ZIP

4. Login to WordPress

5. Click Appearance - Themes menu

6. Click Install Themes

7. Click Upload

8. Select ZIP file and click Install Now

C. Continuing install

Now as you have installed the theme, let's continue with the installation of **plugins** and **demo content**. Once you hit **Activate** you will be redirected to the demo panel:

This theme requires the following plugins: *Advanced Custom Fields Pro*, *OKThemes Lucia Shortcodes* and *WPBakery Visual Composer*.

This theme recommends the following plugins: [Contact Form 7](#), [One Click Demo Import](#), [Slider Revolution](#) and [WooCommerce](#).

[Begin installing plugins](#) | [Dismiss this notice](#)

Welcome to Lucia Vineyards 1.0
Beautifully crafted WordPress theme ready to take your wine journey to the next level.

Install Plugins

Lucia Vineyards has bundled popular premium plugins which greatly increases the flexibility of the theme.

Theme Documentation

Wondering where to start? Check out the theme online documentation.

[Online Documentation](#)

Customize Appearance

Customize the look and feel of your site with the help of the Theme Options panel.

[Go to Theme Options](#)

Lucia Vineyards Wordpress Theme

Created: 30/01/2020 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Here you have available the following features:

1. Install theme plugins
2. Install theme Demo Content (*One Click Demo Import plugin must be installed*)
3. Customize theme options

Now, we will be focusing on the first 2 – the most important ones.

1. Install theme plugins

This is a very important step and must be done first. If you do not install the plugins then the demo content cannot be imported.

Once you click the “Install plugins” button you’ll be redirected to the **Install plugins** page.

Also, you have available a message box on every admin page stating **“This theme requires the following plugins.....”**. You can click on **“Begin installing plugins”** - you’ll be redirected to the same page.

This theme requires the following plugins: *Advanced Custom Fields Pro*, *OKThemes Lucia Shortcodes* and *WPBakery Visual Composer*.

This theme recommends the following plugins: [Contact Form 7](#), [One Click Demo Import](#), [Slider Revolution](#) and [WooCommerce](#).

[Begin installing plugins](#) [Dismiss this notice](#)

Now, click on the checkbox next to “Plugin” to select all the plugins, then from the select box above select “Install” and click the “Apply” button. This will automatically install all the necessary plugins.

Install Required Plugins

All (7) | To Install (7)

Install

Apply

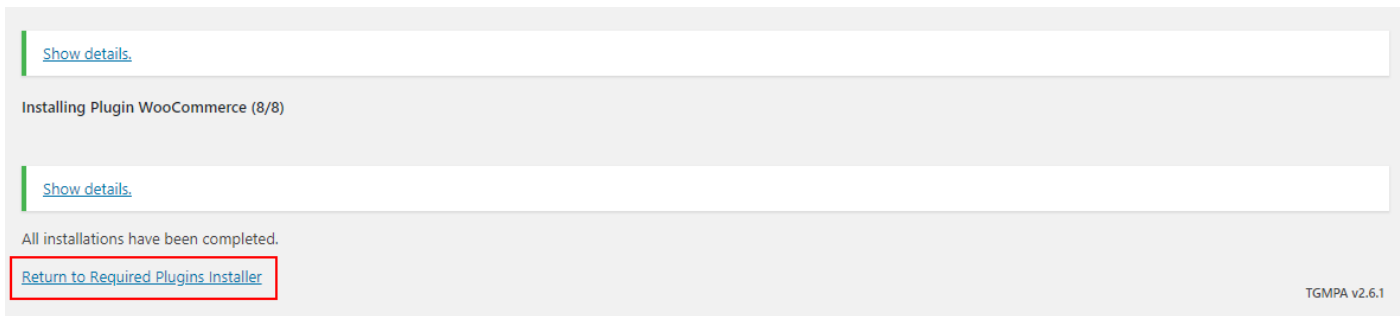

<input checked="" type="checkbox"/> Plugin	Source	Type	Version	Status
<input checked="" type="checkbox"/> Advanced Custom Fields Pro Install	Pre-Packaged	Required	Minimum required version: 5.8.7 Available version: 5.8.7	Not Installed
<input checked="" type="checkbox"/> OKThemes Lucia Shortcodes Install	Pre-Packaged	Required	Minimum required version: 1.0 Available version: 1.0	Not Installed
<input checked="" type="checkbox"/> WPBakery Visual Composer Install	Pre-Packaged	Required	Minimum required version: 6.1 Available version: 6.1	Not Installed
<input checked="" type="checkbox"/> Contact Form 7 Install	WordPress Repository	Recommended		Not Installed
<input checked="" type="checkbox"/> One Click Demo Import Install	WordPress Repository	Recommended		Not Installed
<input checked="" type="checkbox"/> Slider Revolution Install	Pre-Packaged	Recommended	Minimum required version: 6.1.8 Available version: 6.1.8	Not Installed
<input checked="" type="checkbox"/> WooCommerce Install	WordPress Repository	Recommended		Not Installed
<input checked="" type="checkbox"/> Plugin	Source	Type	Version	Status

Bulk Actions

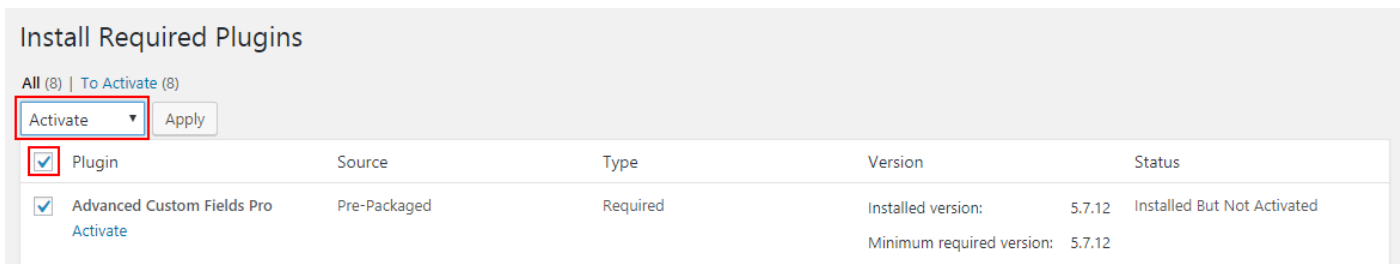

Apply

TGMPA v2.6.1

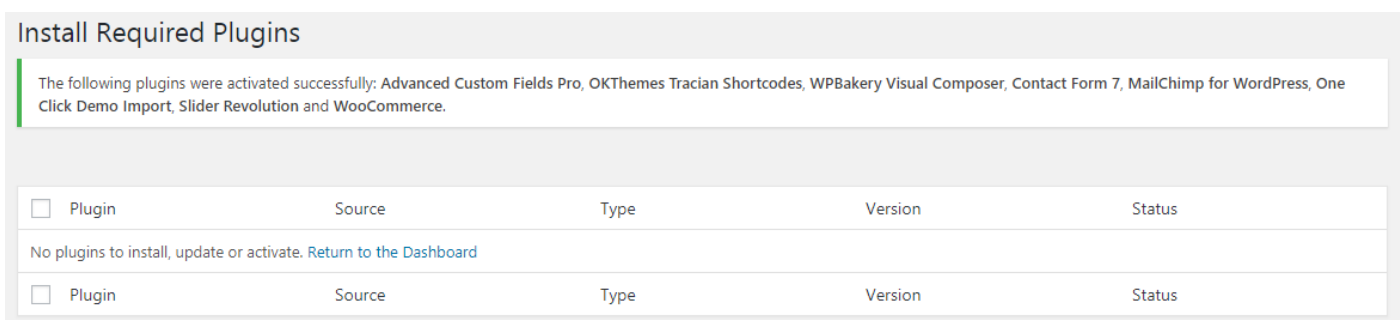

After all the plugins are installed click on **“Return to Required Plugins Installer”** to activate them.

Next you need to activate the plugins. You'll be redirected to this page where you repeat the steps above and select “**Activate**” instead of “Install”.

After successful activation you will be asked to return to the dashboard.

Now we'll proceed with the installation of theme demo content.

1. Install theme Demo Content

The demo content is available only with the activation of **One Click Demo Import** plugin, so please make sure the plugin is activated before continuing further.

The demo content will install: pages, posts, post types, dummy images, menu settings, widget settings, WooCommerce settings and Revolution sliders.

If you need them separately they're available in the **theme/admin/importer/demo-files** folder inside the theme.

The demo install is done with **1 click install**.

1. Go to **Appearance >> Import Demo Data** and then click on “**Import Demo Data**”

Import Demo Data

About the theme

Import theme options

One Click Demo Import

To get started with MailChimp for WordPress, please [enter your MailChimp API key on the settings page of the plugin.](#)

Before you begin, make sure all the required plugins are activated.

Importing demo data (post, pages, images, theme settings, ...) is the easiest way to setup your theme. It will allow you to quickly edit everything instead of creating content from scratch.

When you import the data, the following things might happen:

- No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified.
- Posts, pages, images, widgets, menus and other theme settings will get imported.
- Please click on the Import button only once and wait, it can take a couple of minutes.

[Switch to manual import!](#)

Import Demo Data

That's it, you have demo content and all the theme settings installed on your website.

Install the theme in other language

First you have to install WordPress in your specific language. This can be done by going to **Settings -> General**, where you can set the **Site Language** option and save the settings.

Next, find the **.pot** file in **theme/languages/** folder and load it in [Poedit](#). Translate the strings and then upload the generated file in **wp-content/languages/themes**.

General instructions (!important)

How to create a page

Go to **Pages >> Add new**

Each page has specific options **under the editor**, like page **Page Layout** and **Page Options**, which helps you to configure the page as you need. Also, every page supports a header image which can be displayed by adding an image in the **Feature image box**.

Page Layout

Page Options

Lucia Vineyards Wordpress Theme

Created: 30/01/2020 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

Page Layout Options

You have the possibility to select the page layout and the page sidebar. You can configure multiple sidebars in **Appearance >> Theme Options >> Sidebars**

Page Layout

Page layout

Select the page layout

With left sidebar

Select sidebar

Select a sidebar. You can create unlimited sidebars in Appearance >> Theme options.

Default Sidebar

Page Options

You have the possibility to show/hide the header, title, breadcrumbs and insert a page description. Also, you have the possibility to add a Revolution slider.

Insert your page short description here.

How to create a page template (Blog)

This theme uses custom post types to display specific page templates and posts. Each page template is created by selecting a page template from **Page attributes** panel.

Page Attributes ^

Template:
 Blog page ▼

Parent Page:
 (no parent) ▼

Order 0

To configure the Blog page please go to **Appearance >> Theme Options >> Blog&Posts**

How to insert a featured image (in posts, pages or custom post types)

Each page and post has the possibility to display a featured image. The panel that allows you to upload a feature image looks like this and it's located in the bottom right hand side of the main panel, under **"Page attributes"**:

Featured Image ▲

[Set featured image](#)

To upload an image, click on **"Set featured image"** link. The default media popup will appear.

Click on **"Set featured image"** after you upload your image. See below.

[Set featured image](#)

Working with the menu

You can create a menu by going to **"Appearance>>Menus"**.

This theme has 2 menu locations.

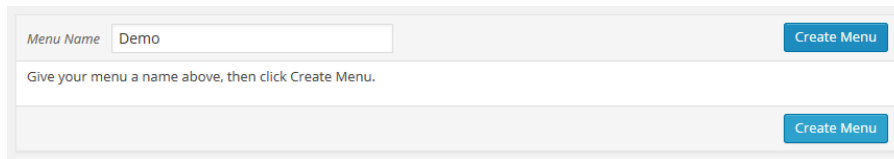

- Main menu is the theme main menu (in header)
- Secondary menu is the theme top menu (in header)

Lucia Vineyards Wordpress Theme

Created: 30/01/2020 | By: Cristian Gogoneata | Email: cristian.gogoneata@gmail.com | www.okthemes.com

To setup a new menu follow the steps bellow.

- Go to **Appearance >> Menus**
- Click on **“Create a new menu”** link
- Give it a name, for example **“Demo”** then click on **“Create menu”**

- Then, add whatever pages/posts/categories you need and click save. Tip: To create a submenu drag the menu items to the right.
- Assign the menu to the location you want from **“Menu setting”** panel at the bottom of the page, for example **“Main Menu”**

Create a blog post

Go to **“Posts”** and create a new blog post:

- Go to **“Posts>> Add new”** (the classic way to create a post in WordPress)
- Insert a title, content and add a featured image
- Choose the post format. Select **“Standard”** for the normal blog post.

Hit Publish and you’re done.

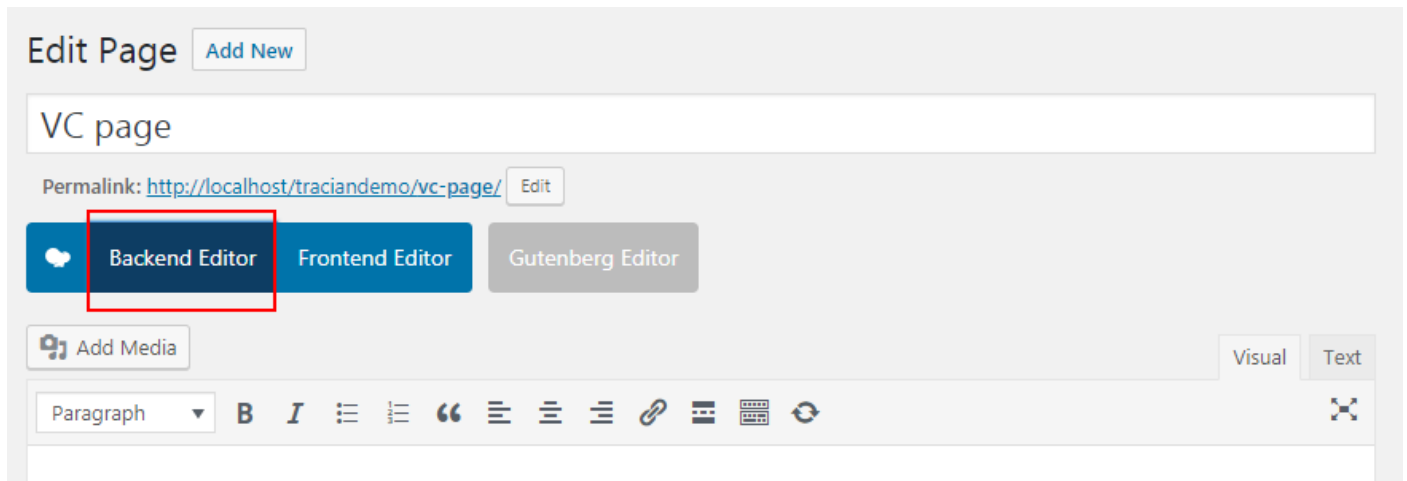

How to work with Visual Composer

Visual composer page builder helps you create advanced layouts in minutes and it’s an essential part of the theme. Videos and tutorials can be found here: <http://vc.wpbakery.com/video-academy/>

- First you have to enable the WPBakery Page Builder, click on the header blue button

- Then activate the modules by clicking on Backend editor

For more information please check the editor knowledge page here: <https://kb.wpbakery.com/>

Revolution Slider

You can find Revolution Slider at the bottom of the admin left panel.

To create a slider follow the steps below:

- Click on “**Create new slider**” button
- Give the slider a title and an alias and play with the options.
- Once you’re done hit “Create slider” and then click “Edit slides” to create the slides.
- This is a very powerful slider with lots of options and effects. You can see a presentation and a video tutorial of the slider here: http://www.themepunch.com/codecanyon/revolution_wp/

Use Revolution Slider in page header

You can choose to display a slider in the header of a page. To accomplish that open a page and scroll down until you find “Page Options >> Header Slideshow” panel. You can select your slideshow and the slideshow position:

- Under the header – the menu will be displayed on top of the slider
- Beneath the header – the slider will be displayed under the menu

Use Revolution Slider in a page with Visual Composer

You can insert a slideshow in the body of a page with the help of Visual Composer. Open a page, click on Visual Composer (Add element) and select "Revolution slider".

Configuration of WooCommerce

- A very detailed documentation of WooCommerce can be found here: <http://docs.woothemes.com/document/woocommerce/>
- To personalize your WooCommerce installation, go to **Appearance > Theme Options > Store** tab

Create a homepage

1. Create the page

- Go to Pages >> Add new
- Insert a title, preferably **Homepage** 😊

2. Set the page as homepage

- Go to "Settings >> Reading"
- Select "A static page"
- From "Front page" field select "**Homepage**" (or the name you have given to your homepage)
- Save and you're done

Create a blog page

1. Create the page

- Go to Pages >> Add new
- Insert a title, preferably **Blog** 😊
- Select the blog template from the page attributes
- Once you select the page different options will appear under the main editor, like: blog layout, blog layout style and blog columns. Customize them as you like.

2. Set the page as blog

- Go to "Settings >> Reading"
- Select "A static page"
- From "Posts page" field select "**Blog**" (or the name you have given to your blog page)

Troubleshooting

If you receive a weird message at install

Like: Parse error: syntax error, unexpected T_OBJECT_OPERATOR in /home3/ (...) /wp-content/themes/LUCIA/index.php on line xxx

This means you have a PHP version installed on the server lower than PHP 5.x.x. Please upgrade to a newer version.
