

Posts are entries that display in reverse order on your home page. Posts usually have comments fields beneath them and are included in your site's RSS feed.

## Creating a Post

1. Navigate to **Posts** → **Add New**
2. Start filling in the blanks: enter your post title, write your actual body content in the main post editing box below it.
3. As needed, select a category, add tags, and make other selections from the sections below the post.
4. When your post is ready, click **Publish**

Since creating and editing posts is basic WordPress knowledge, we won't cover it in detail. If you're new to WordPress, you may find the following resources valuable:
