

# General Settings

**Sonno** requires that you upload your logo as an image file. The logo can be any size and can fill up the full content area.

## To Insert Logo

1. Navigate to **ThemeSquared** → **Theme Options** → **General Settings** to access the logo options.
2. You will see two logo upload options, one is for standard desktop, the other is for retina ready devices. Click **Upload** button and select your logo file.
3. If you are uploading a retina logo (not required), it needs to be exactly 2X the size of the regular logo. For example, if the standard logo is 200×100, the retina logo should be 400×200. Click **Upload** button and select your retina logo.
4. You must enter the logo width and height for the **STANDARD** logo so it can be used to resize in sticky header. So in our example, you would enter 200 for width, and 100 for height. Do not enter the retina logo values, only the standard logo values.

### Custom Logo

Upload

**i** Upload a logo for your site or specify an image URL directly.

## To Insert Favicon

1. Navigate to **ThemeSquared** → **Theme Options** → **General Settings** to access the favicon options.

# Layout Options

## Custom CSS

CSS stands for Cascading Style Sheets. It allows you to store style presentation information (like colors and layout) separate from your HTML structure. This allows precision control of your website layout and makes your pages faster and easier to update. An easy-to-use WordPress Plugin to add custom CSS styles that override Plugin and Theme default styles. This plugin is designed to meet the needs of administrators who would like to add their own CSS to their WordPress website.

</p> 📘 This is the description field, again good for additional info.

---

**Read More**  
 Enable or disable Read more link.

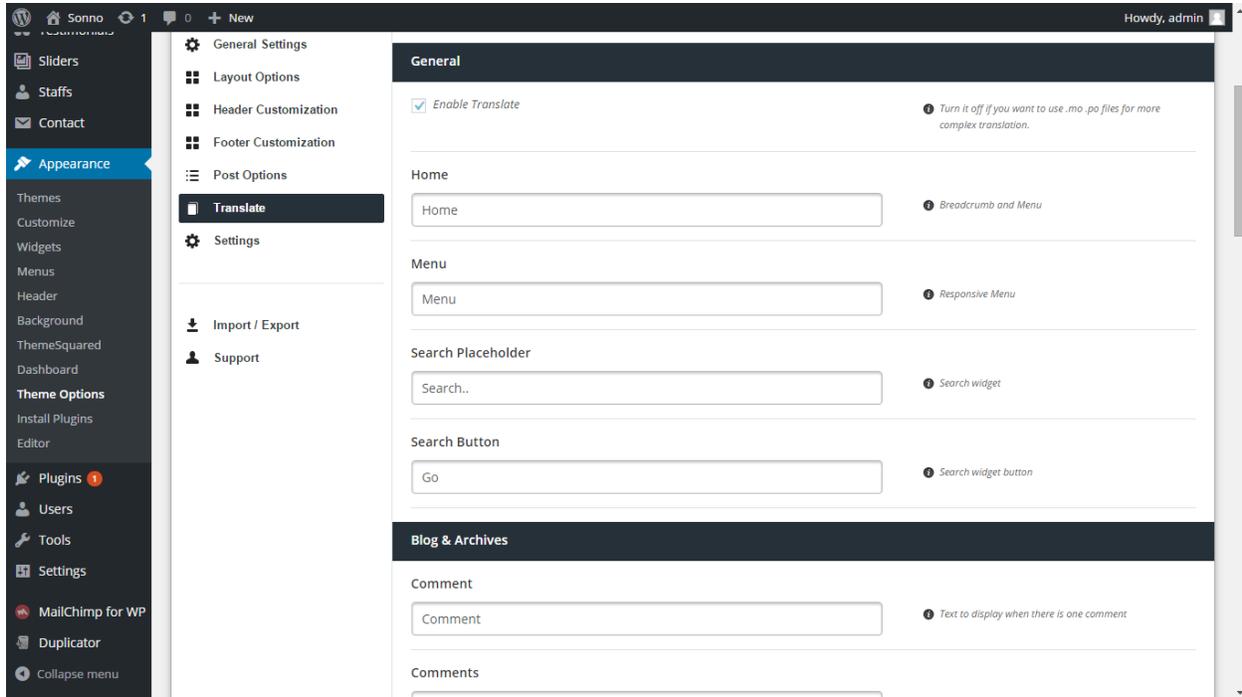

---

**Link Text**  
Read More 📘 A text for Read More button.

# Translation

Navigate to **ThemeSquared** → **Theme options** → **Translation**.

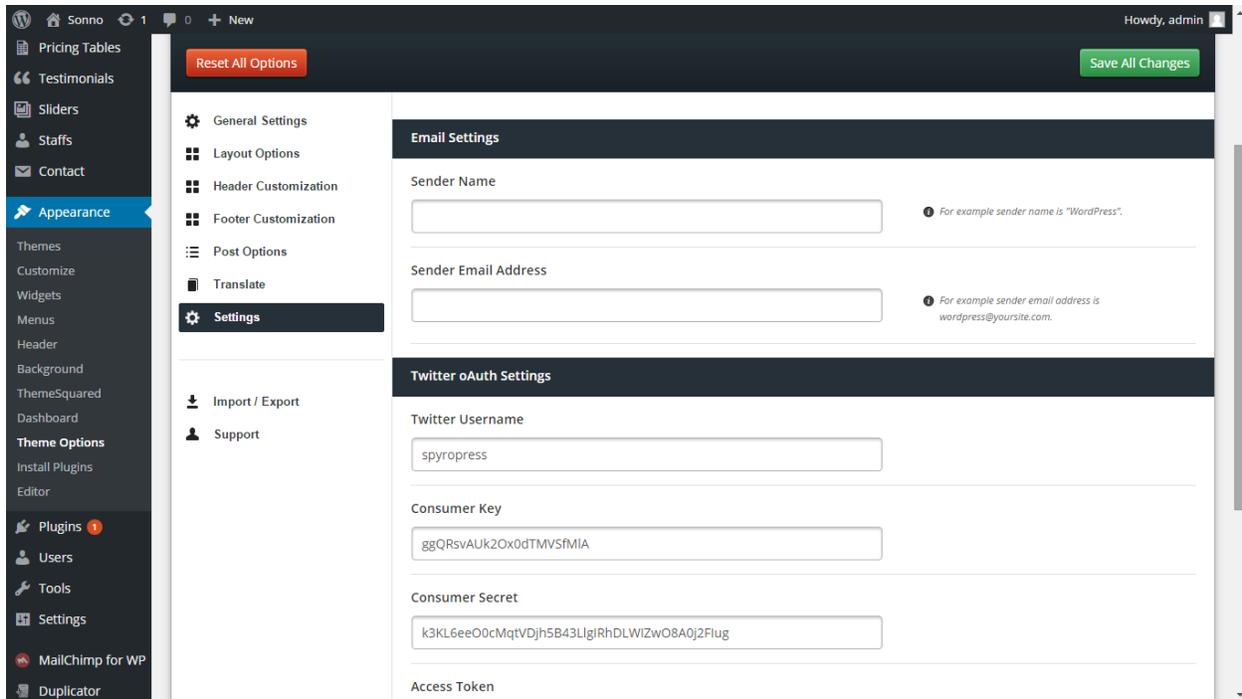

Here you can translate the hard coded words, which use throughout the theme like in blog & portfolio.

# Settings

Navigate to **ThemeSquared** → **Theme options** → **Settings**.

Here you can set the Twitter API setting to show your tweets. You can also set the Pagination options.

The screenshot displays the WordPress admin dashboard with the ThemeSquared settings interface. The left sidebar shows the navigation menu with 'Appearance' selected, and 'Settings' highlighted under 'Theme Options'. The main content area is divided into two columns. The left column contains a 'Reset All Options' button and a list of settings categories: General Settings, Layout Options, Header Customization, Footer Customization, Post Options, Translate, Import / Export, and Support. The right column is titled 'Settings' and contains two sections: 'Email Settings' and 'Twitter OAuth Settings'. The 'Email Settings' section includes fields for 'Sender Name' (with a hint: 'For example sender name is "WordPress"') and 'Sender Email Address' (with a hint: 'For example sender email address is wordpress@yoursite.com.'). The 'Twitter OAuth Settings' section includes fields for 'Twitter Username' (containing 'spyropress'), 'Consumer Key' (containing 'ggQRsvAUk2Ox0dTMVsfMIA'), and 'Consumer Secret' (containing 'k3KL6ee00cMqtVDjh5B43LgIRhDLWIZw08A0j2Flug'). An 'Access Token' field is partially visible at the bottom. At the top right of the settings area, there are 'Reset All Options' and 'Save All Changes' buttons.
