In **Sonno Portfolio** let you showcase your work beautifully, to start adding portfolio items, navigate to Portfolios → Add New

Creating A Portfolio Item

Once you're on the Add New Portfolio Item screen, you will then be able to set a title for the portfolio item, add the body content, and also provide all the meta information such as extra details and media.

Portfolio Categories

You can add/choose categories for each portfolio item. Portfolio categories will be used to filter through the portfolio in the filtering system.
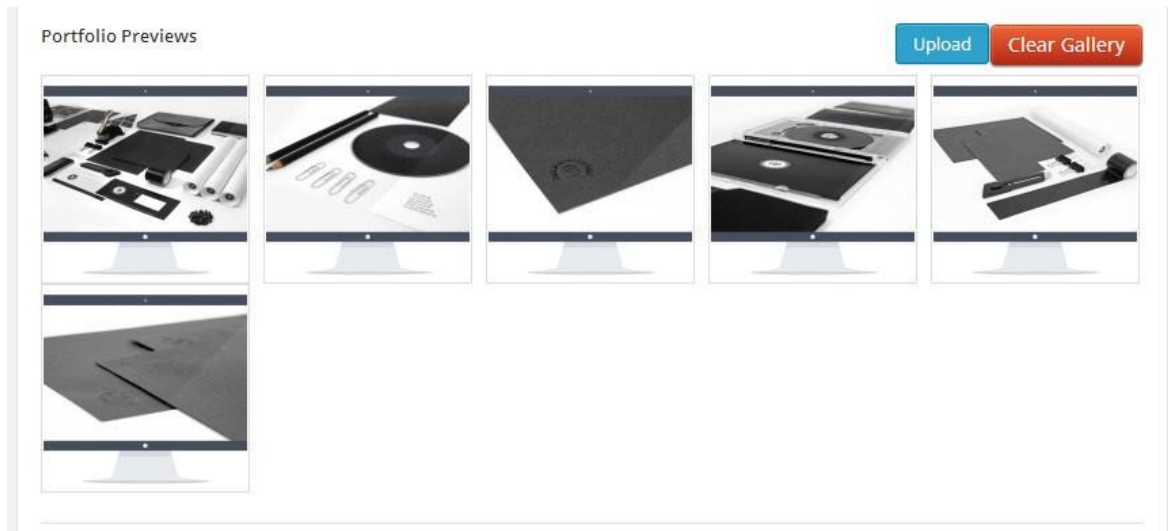

Extra Details

You can also set the Live Preview URL of the item and Client name. You can also add testimonials to that item, so your users can know what your client thinks about your work.

Showcase type lets you decide how you want to display Portfolio Previews either its **Gallery** or **Image**. If you dont select any it will go for the **Featured image**.

Feature Image (Cover Image)

You Must set this image, this is the Cover Image. Cover Image will be displayed in portfolio listing.

Portfolio Previews

You can upload and add several images as Portfolio Previews. These images will be used in the slider area of the Portfolio Detail Page.

Notice: For best result, original images should be minimum 940px in width

Adding Portfolio Listing to Page
