CONTACT PAGE

This is important because the legality of the page or to professional a site to be seen if a site has a contact page, how visitors found your office, express what they feel about your site that essentially will be a liaison between the managers of the site visitors. To reach this page click CONTACT on the Top Primary Menu. There are two sides to note that the column that contains the folder content your office address in accompanied form to allow visitors to contact you in the design INTERACTIF and no validation by Laveda. The second is on the right sidebar titled top HEAD OFFICE, this contains details of the identity of your office.
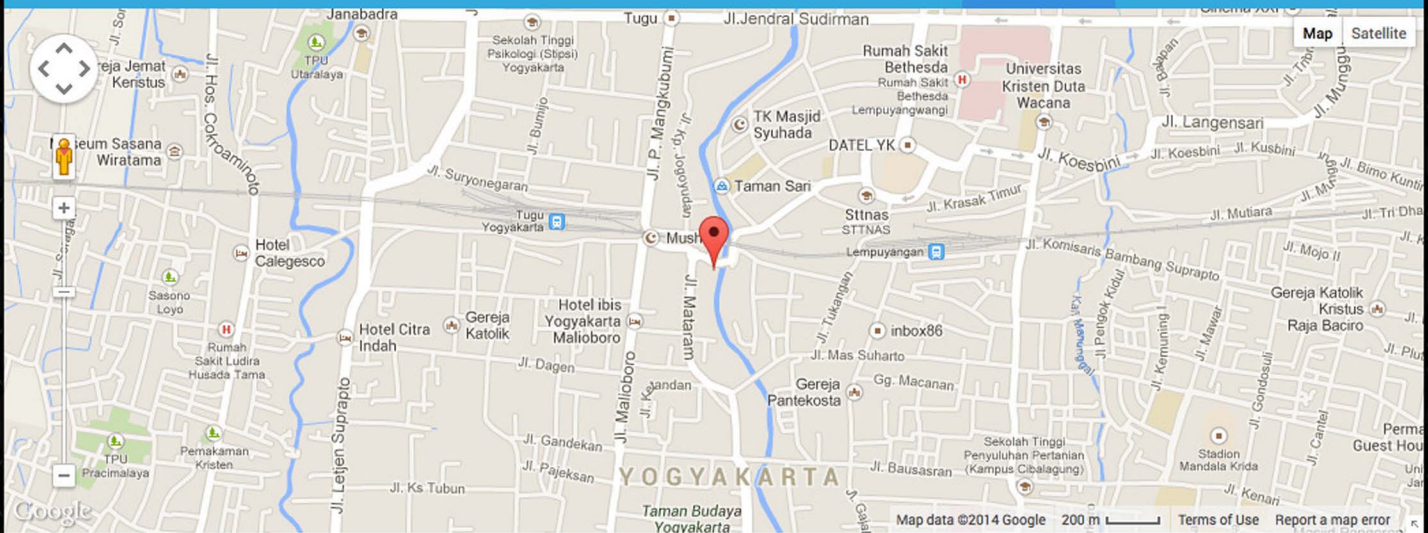

To make or setting this contact page is quite easy and simple through two stages: in the menu Pages and Widgets (which has been discussed above in chapter Widgets).

A. View All Page menu then select settings and click Contact to contact page. Or click the Add New to create a new contact page from.

B. Fill this column with a title that will appear on contact page.

C. Leave blank or if you want to adding information on the content of the page as shown above overview contact is between the binder and form.

D. There is a columns you must specify correctly the Email Subject (when sending an email it will be listed in the email title as this column).Website then fill with your site, Address fill with office address, and Location which will show clearly specify the address of the office and find a suitable address displayed in the map or click the Find button to find the address in the address of your office folder.

E. This is the most important step in making contact pages including this page. Contact on Templates and select if you want this page to be a submenu of another menu then select the main menu in Parent choice and if not then empty it.

F. If all changes or making contact page is completed then the last step is click this button.

THEME OPTIONS

Actually there are two ways to change or set the site that is using the manual method to edit files such as theme support .php .css and java script. The first way is the manual you are required to master web programming language because it would edit any file associated with the display you wish to edit that contains a web programming language, to perform this way go to the Appearance> Editor. The second way very easily have been provided by Persofone so you are not required to understand web programming language as just clicking a few buttons corresponding to the type of site that will display in the edit. The way is prepared Persofone to pamper you in managing the site. Here's an explanation and how to manage the site through MTC Option by clicking the MTC Options menu in advance :
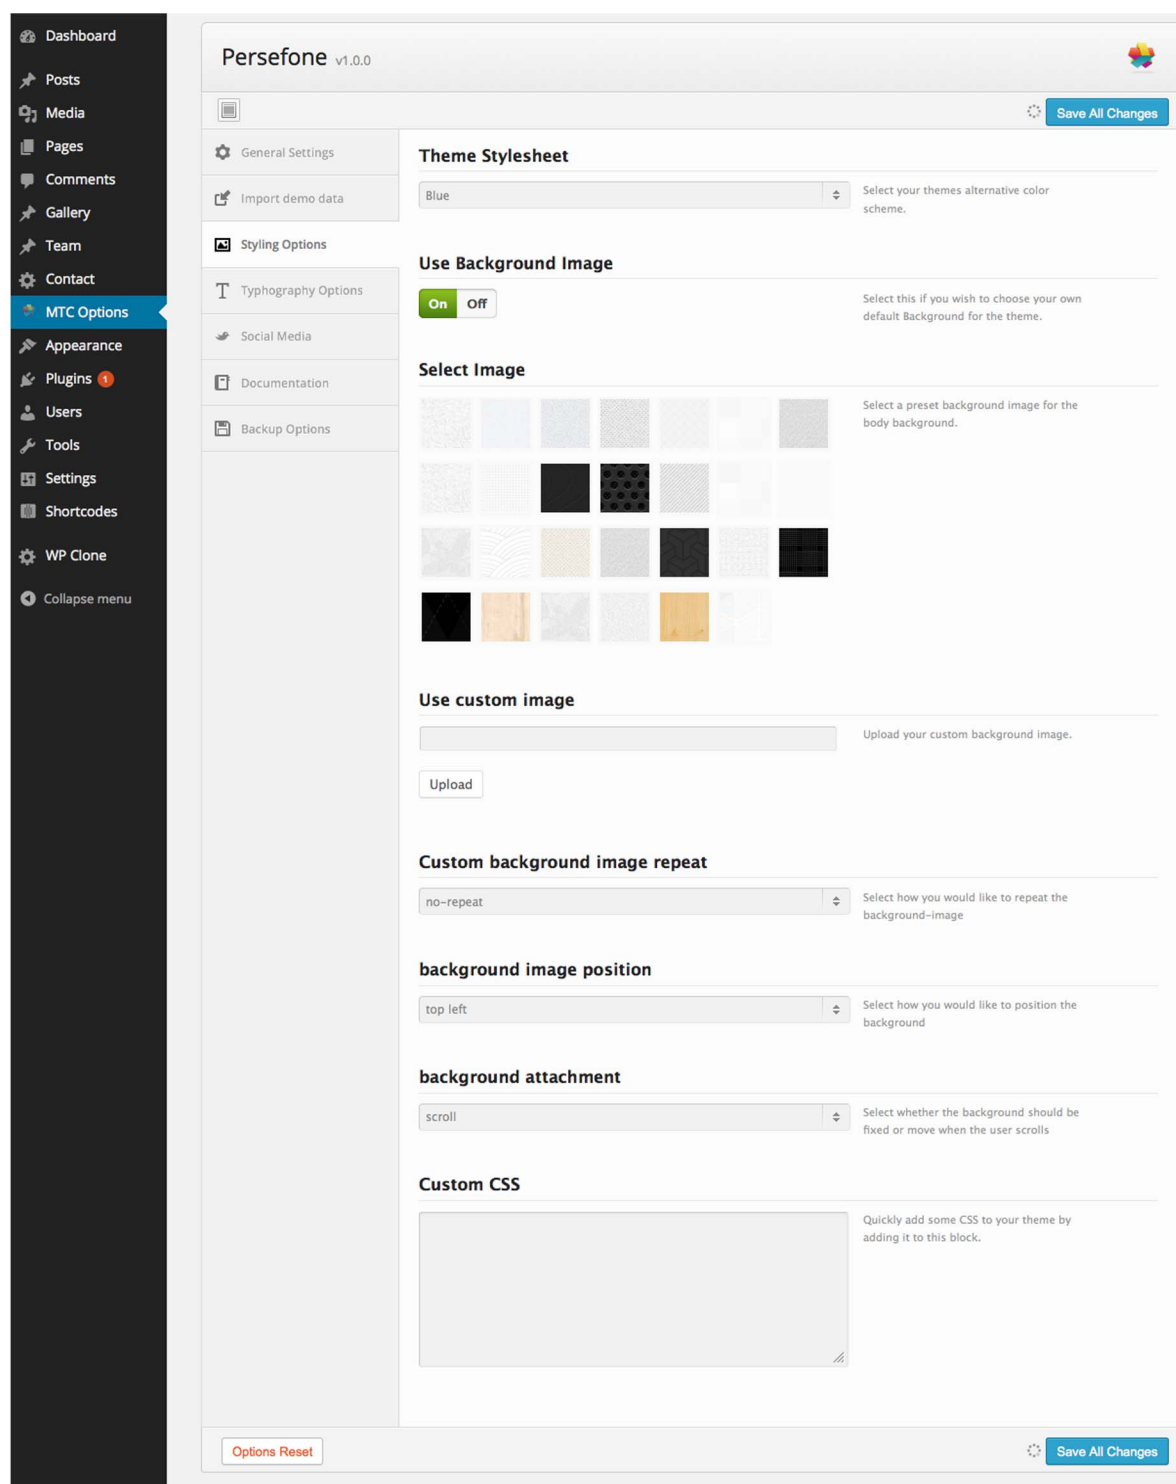

1. GENERAL SETTINGS
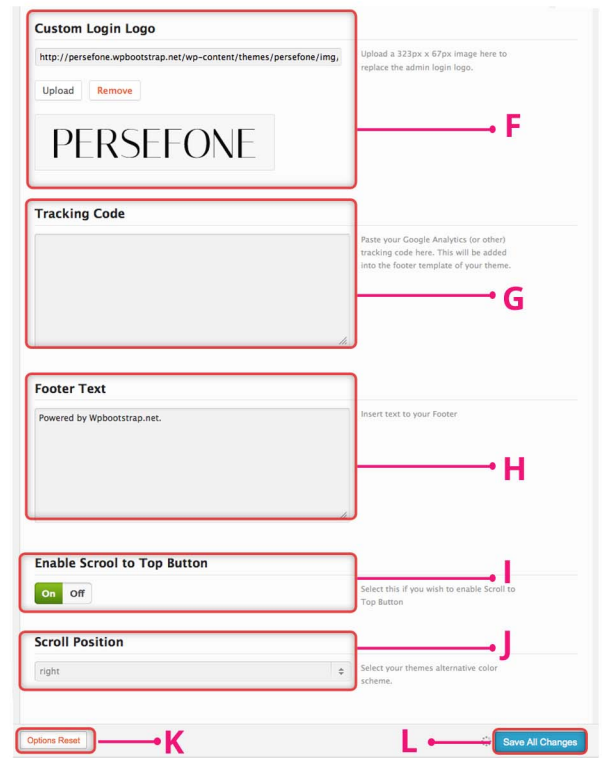

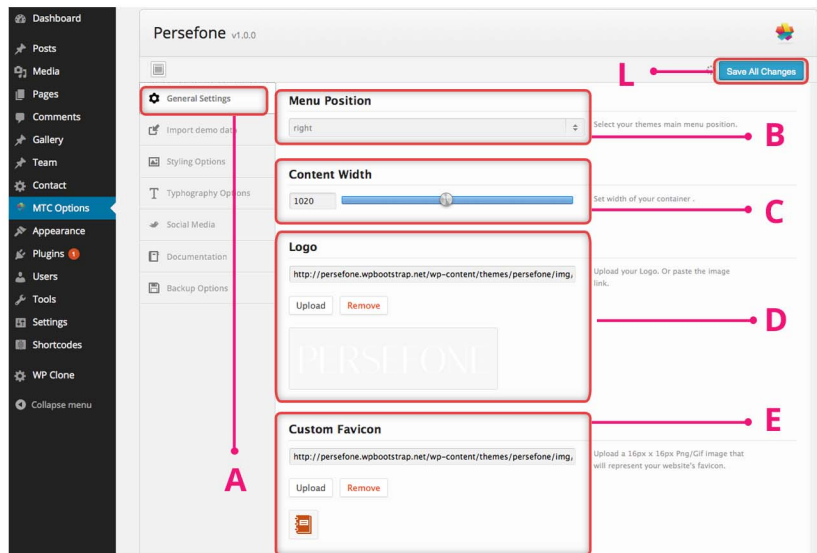

A. Click the General Settings menu to set the site in general.

B. Select the sidebar menu position

C. Select the width of content

D. To set the logo can be used two ways to address the contents of the image in the image URL field. Second by clicking the Upload button to take the image of the computer as a logo. And to see the look of the logo while being able to see the image underneath.

E. Custom Favicon to settings that will be displayed in a browser tab. Can use the address of the image that has been uploaded content in the URL field. Can also use click the Upload button to take a picture of the computer. Notice the right information. To see what can be viewed while under the upload button.

F. To set Login Logo. This will not be displayed to the public only admins only. Could use an address that has been uploaded image content in the URL field. Can also use click the Upload button to take a picture of the computer. Pay attention to the right information. To view the temporary display can be viewed under the upload button.

G. Fill with google analytics code.

H. Fill in the information site that will be placed in the footer.

I. To set scroll to Top Button is useful to restore the site at the top of the page with the click of a button is not hard to scroll to the top. Click the Onto activate it.

J. Then set position can scroll button on the right or left.
