

# Installation

Mall is a clear, easy to customize template on Warp 7 Framework with many features. This template suitable for selling all things such as: fashion, furniture, mobiles and tablets, cosmetic, accessories.

The modern design is perfect to create a website for your business. It has a very flexible configuration and allows to implement any ideas. Many display options of the post and products, animated blocks.

Setting up a Warp theme follows the standard WordPress installation procedure and works like with any other theme.

1. Download WordPress from the WordPress website (<https://wordpress.org/>).
2. Setup a new WordPress install.
3. Install and activate your theme.

For more information, take a look at the official WordPress documentation (<http://codex.wordpress.org/>).

## Setup a demo package

A demo package is a full WordPress installation, which includes the theme and sample data responsible for the layout and setup of our demo. This is great, if you don't want to start from scratch or just to have a peek at how everything is put together.

Go to Endeavor->Setting->Demo Data

Really easily install the theme. Just one-click and set up everything “pages, blog posts, menus and sidebar widgets” button from admin panel. Save your time!

See the sample of installation demo data here (<https://youtu.be/4N7KiRzZCQo>)
