1. Getting Started

1.1 Overview

Creates an easy to use faq posts that will display on any page, post or custom post type using shortcode [pafa_faq].

1.2 Installation

1.2.1 File Structure

Extract (Unzip) the plugin download package. Within the download package you'll find the following file structure and contents:

- pressapps-accordion-faq.zip (Installable plugin zip file)
- pressapps-accordion-faq (Plugin folder for FTP upload)
- Accordion FAQ Manual.pdf (PDF User Documentation)

1.2.2 WordPress Installation

1. Go to **Plugins > Add New**.
 2. Under **Upload**, click **Browse**, locate *pressapps-accordion-faq.zip* in your plugin download package and click **Open**.
 3. Find the WordPress Plugin you wish to install.
 4. Click **Install Now** to install the WordPress Plugin.
 5. A popup window will ask you to confirm your wish to install the Plugin.
-

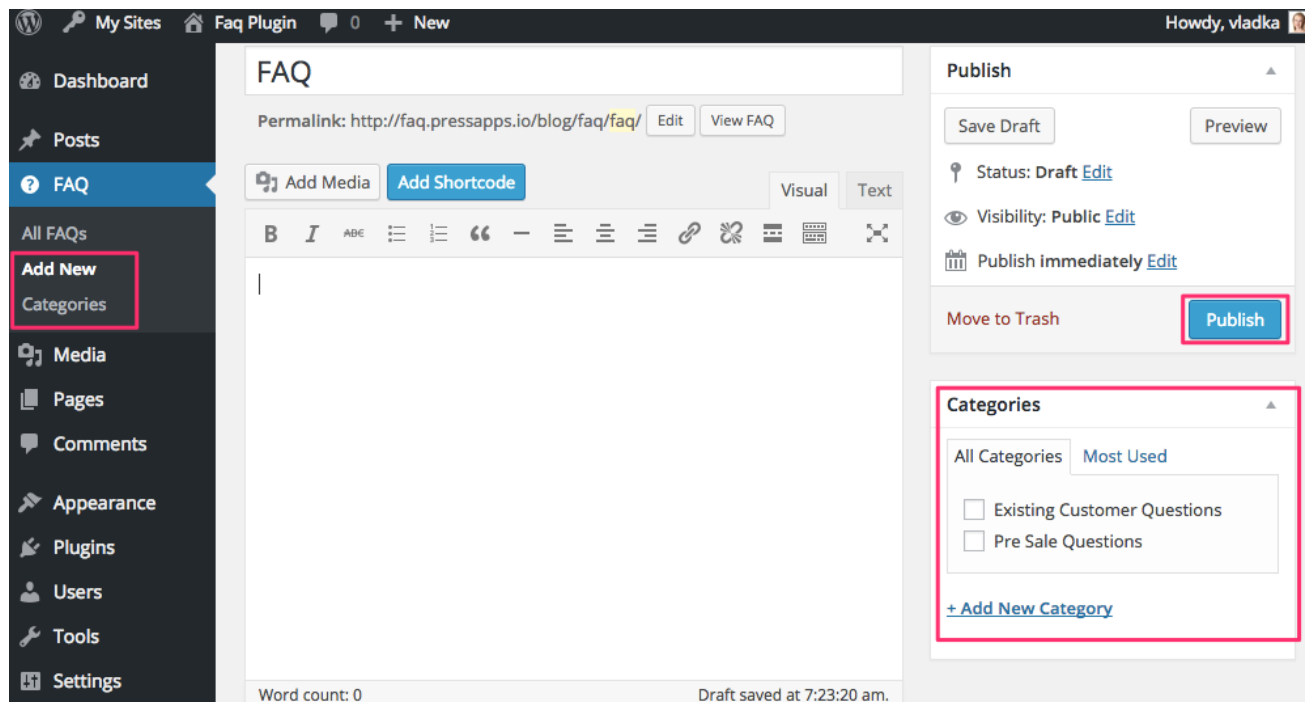

6. If this is the first time you've installed a WordPress Plugin, you may need to enter the FTP login credential information. If you've installed a Plugin before, it will still have the login information. This information is available through your web server host.
7. Click **Proceed** to continue with the installation. The resulting installation screen will list the installation as successful or note any problems during the install.
8. If successful, click **Activate Plugin** to activate it.

1.2.3 FTP Installation

1. Using a FTP program, upload the plugin folder *pressapps-accordion-faq* located in your plugin download package folder.
 2. Go to Plugins screen and find the newly uploaded **PressApps Accordion Faq** plugin in the list.
 3. Click **Activate Plugin** to activate it.
-

1.3 Creating Faq posts

To create a FAQ posts go to **FAQ >Add New**, enter title, enter post content and **Publish**. FAQ plugin can display FAQ posts grouped into categories, create categories under **FAQ >Categories** and assign FAQ post to these categories.

1.4 Displaying Faq Post on a Page

Use shortcode generator to include the Faqs on any page, post or custom post type. The Accordion FAQ has three templates: List, Accordion, Block.

Navigate to **Pages > Add New > Add Shortcode >** select a shortcode > **Insert FAQs.**

Select Template from drop down menu (List, Block, Accordion), setup attributes and click **Insert Shortcode**

For **Block** - setup custom attributes: which Faq Category to display, Background Color and Block Radius.

Add Shortcode

Insert FAQs

2 Customizing Plugin

Navigate to **PressApps > Accordion Faq.**

For reordering Faqs and Categories set “Drag & Drop Reorder” to ON. Now you can reorder faq posts and categories using drag and drop under **FAQ > All FAQs** and **FAQ > Categories**.

Under **Closed Icon** and **Opened Icon** - select which icon is showing with Faq Title.

Pre Sale Questions

+ Do you provide product support?

— How do I purchase your product?

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exercitation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo

Under **Category Title Font Size** and **Faq Title Font Size** set font size for all Category Titles and Faq titles on all website.

3 Translation

The plugin is translation ready, please follow the steps bellow:

1. Download and install Poedit
2. Open the program after the installation. Click File > Open and find the original *pressapps-accordion-faq.po* file located in the "lang" directory in plugin root.
3. Translate all the words to your language and save your translated file in the same ("lang") directory with name of your language and country codes.
4. If your language is Russian and the country is Russia, then you must save the file like this: *pressapps-accordion-faq-ru_RU.po*. Use “*pressapps-accordion-faq-*“, then first parameter is a language code, second parameter is a country code. All languages codes can be found here:

<http://www.gnu.org/software/gettext/manual/gettext.html#Language-Codes>

and all countries codes can be found here:

<http://www.gnu.org/software/gettext/manual/gettext.html#Country-Codes>

5. Define the language in *wp_config.php*. The parameters must be the same as your *.po file name with your language and country code:

```
define('WPLANG', 'ru_RU');
```

4 Support

Support is only provided through external support system

at <http://pressapps.co/help/>

If you have a pre-sale question feel free to use the item comments section on Envato.

Before contacting support please:

- Read this documentation
- Perform basic troubleshooting by disabling plugins and switching to default theme to identify possible cause
- Describe your problem in detail
- Include links
- Attach screenshot
- Include your WP and FTP login where appropriate.
