

Inbound – Demo Content

Inbound comes with a variety of easy-to-use starter templates.

We provide starter templates with demo content that can be installed via the theme's admin panel. The setup interface will ask you to choose a template upon installation, as a starting point.

However, you can install additional templates (or another copy of the initially selected template) at any time.

If you had to skip the setup, you can always return to the template selection screen via *Theme Options* → *Templates*.

The theme does not require manual import of XML files. It does not ship with demo blog posts, but as an online marketing theme, it does come with a versatile collection of premium templates that you can import easily and use as a starting point.
