

# Inbound – Page Builder

Inbound requires the Page Builder by SiteOrigin plug-in for its visual page builder features.

This theme is optimized for SiteOrigin Page Builder, and you will need to install and activate this plug-in in order to use the theme's starting templates. It needs to be installed and activated before a template can be installed.

You can download this plug-in from the WordPress repository:

<https://wordpress.org/plugins/siteorigin-panels/>

... or by search for "Page Builder by SiteOrigin".
