Here are a few instructions that will help:

Folder " Edit "

Here you can add photo and video files for your project .Drag your picture into the comp, then resize it

It also allows you to change all text composition

Color Control

Open the layer property “**Control Project**” in the Project. Here you can easily replace the color of all text layers

File Edit Composition Layer Effect Animation View Window Help

The screenshot displays the Adobe After Effects interface. The top menu bar includes File, Edit, Composition, Layer, Effect, Animation, View, Window, and Help. Below the menu is a toolbar with various icons for navigation and editing. The main workspace is divided into several panels:

- Project Panel:** Shows the project hierarchy for '//FINAL_OUTPUT', including folders for 1.Edit_Comp, 2.Work_Comp, 3.Assets, and Solids.
- Effect Controls Panel:** A red box highlights this panel, which is titled 'Effect Controls: Color_Control'. It lists several effects with their respective color settings:
 - fx Text_Color_01: Color (grey)
 - fx Text_Color_02: Color (grey)
 - fx Text_Color_03: Color (grey)
 - fx Text_Under_Line: Color (white)
 - fx Stripe_Color_01: Color (blue)
 - fx Stripe_Color_02: Color (yellow)
 - fx Grid: Color (white)
 - fx Elements_Color_01: Color (blue)
 - fx Elements_Color_02: Color (white)
 - fx Elements_Color_03: Color (blue)
 - fx Background: Color (white)
- Timeline Panel:** Shows a list of sources with their durations and parent relationships:

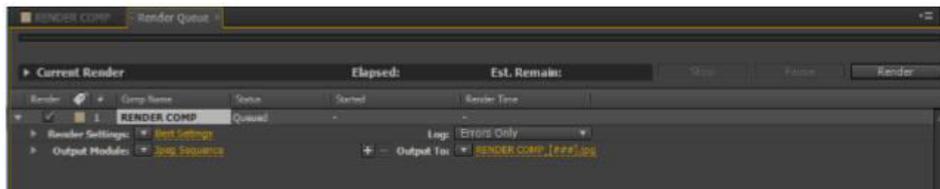

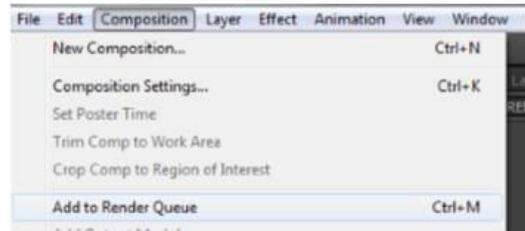

#	Source Name	Parent
1	Color_Control	None
5	Audio	None
6	OUTRO	None
7	SLIDE_12	None
8	SLIDE_11	None
9	SLIDE_10	None

A red arrow points from the 'Color_Control' source in the Timeline panel to the corresponding 'Effect Controls: Color_Control' panel.

Render your video

Double-Click on the RENDER COMP to open it in the timeline.

After that, go to Composition – Add to Render Queue and the Render Queue will open in the timeline window with the new Render Job added to it.

Make sure the Render Settings are set to Best Settings. Click on whatever is written right to the Output Module and a new window will open up. In that window, you can change the codec and file format. Also, if you have used sound in this project, make sure you activate Audio Output at the bottom of that new window. Else your video will be mute.

Last, click on whatever is written right to the "Output to" text and set the folder where you want your video to be saved in.

When you have set everything to your needs, click Render and wait for it to finish.

Depending on the project as well as your computer specs, this can take some time.
