

# USER GUIDE

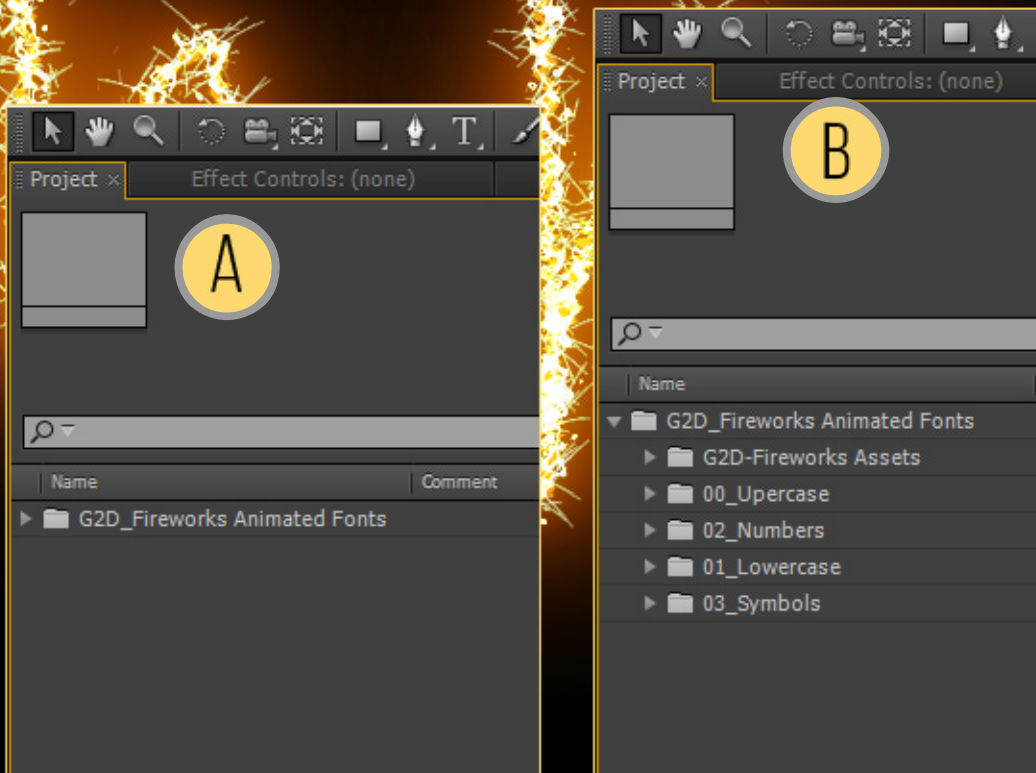

## FIREWORKS ANIMATED FONTS with FONT PLACER SCRIPT

[www.videohive.net/user/guna2d](http://www.videohive.net/user/guna2d)

# WHAT'S IN THE PROJECT

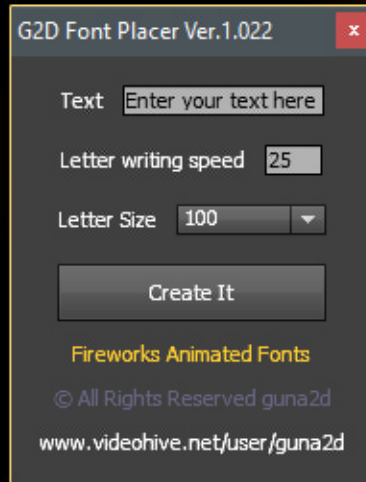

When you open the [FireWorks Font Pack\\_V1.00](#) project, in the After Effects project panel you can see there is a main folder named [G2D\\_Fireworks Animated Font](#). (See [image A](#))

Inside this main folder, there are 5 sub folders that contains compositions for Uper-case characters, Lowercase characters, Numbers, Symbols and Project Assets. (See [image B](#))

You can use the [Fireworks Font Placer Ver.1.12.jsxbin](#) script that comes with your purchased item to create any text that you want to use in your project.

# THE SCRIPT

The Script automates your work without needing you to duplicate characters and placing them manually which is a very difficult and time-consuming process.

All you have to do is,  
Just enter your text inside the **Text** Field  
Enter writing speed in the **Enter Letter writing speed** Field  
Select font size from **Letter size** Dropdown and...  
Click **Create It** Button .

**TIP:** Letter writing speed is in frames per second.  
Example: if you enter 25 in this field each letter takes  
\*1 second to write in.  
\* assuming you are working on 25fps project.

# HOW TO USE THESE FONTS IN YOUR PROJECT.

## Step 1:

Import FireWorks Font Pack\_V1.00.aep file in to your ongoing project  
( From the AfterEffects main menu select File -> Import -> File... )

## Step 2:

Run the script file Fireworks Font Placer Ver.1.12.jsxbin  
( From the AfterEffects main menu select File -> Scripts -> Run Script File... )

## Thank You

If you have any question about this project,  
please e-mail us via our videohive profile page

and

If you have any suggestions please let us know.  
We do our best to include as many features as possible  
In future versions of this product.

ENJOY THE PRODUCT !
