

Hello! Thanks for purchasing. We hope you enjoy using it. If you have any questions about the project, send us a message from our profile page.

And also, please don't forget to give this project a rate and tell us your experience with this template.

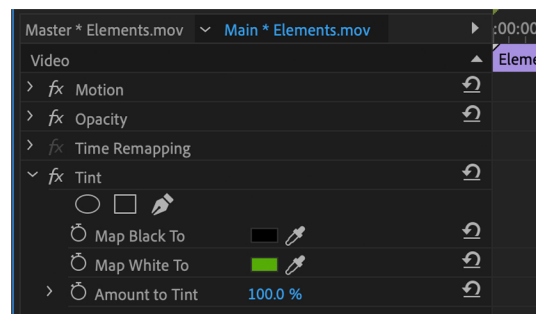

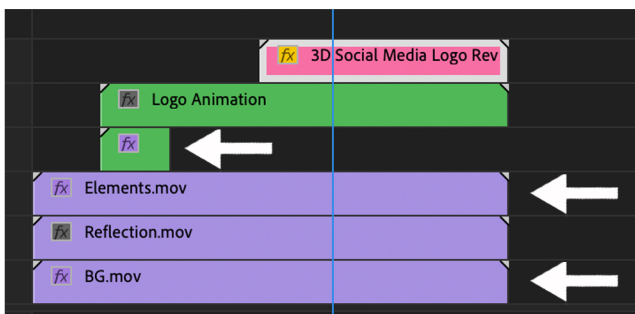

Custom Logo

- 1) Open the Premiere project file.
- 2) Import your logo and put it into Logo placeholder sequence.
- 3) Click on your text layer and then Edit tab in Essential Graphics window.

Here you can retype the text to yours, change text color, size and position. In case Essential Graphics window is closed, go to Window > Essential Graphics.

- 4) Click on the Background layer, and in Effects Controls window you can select a different color by changing it in the Tint settings. Elements color can also be changed with the Tint effect.

If you need to change the logo depth color, select Logo Animation layer and change the Tint settings as well.

- 4) Render out Main sequence: File > Export > Media...

Social Media Logo

1) In the Essential Graphics window go to Browse and click on Install Motion Graphics template. Select our **3D Social Media Logo Reveal Pack for Premiere Pro** file from the project folder.

2) Add this graphics to any sequence you want and in the Edit tab, you can change the version and retype the text to yours.

3) If you need additional styling adjustments, activate Customize Style.

Then it's possible to change: background color; logo depth color; elements color, text color, size and position; and turn off and on the floor effect during the animation. And you can add this graphics to the sequence as many times as you need.

Font: Roboto

Music: **Smooth Logo 2** from **desikøi**
