

Hello! Thanks for buying this template!

It's really easy to customize: The project has a modular structure. Slides are in the “Final comp” composition. To set up Slide 01:

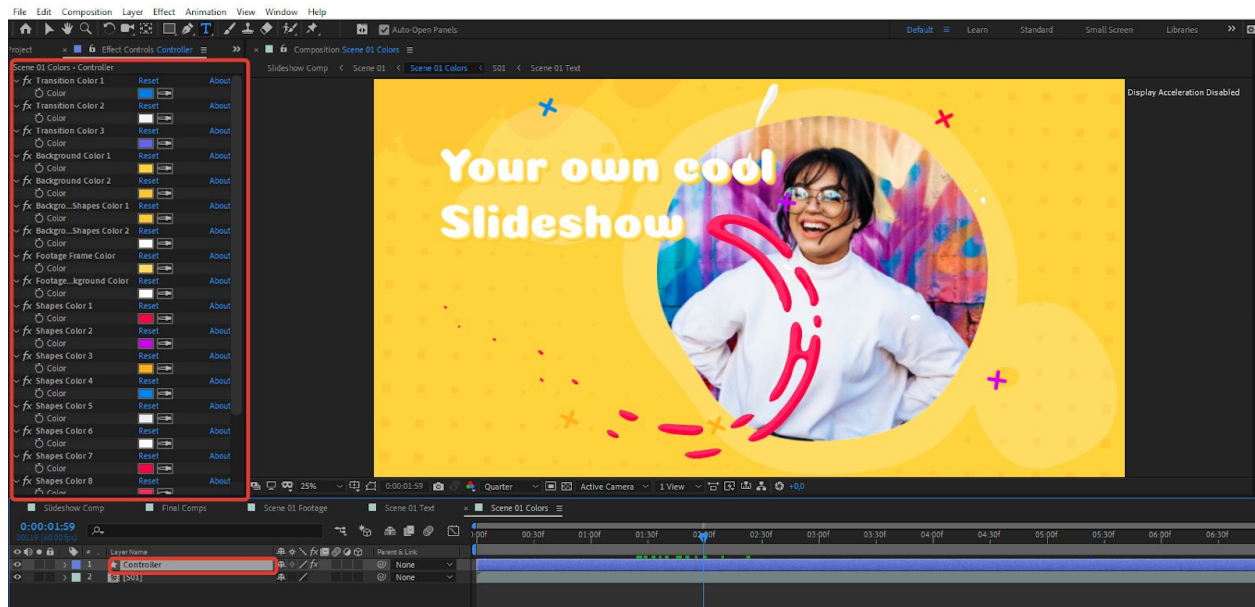

1. Put your photo or video in “Scene 01 Footage” composition.

2. Type your text in “Scene 01 Text” composition.

3. Open “Scene 01 Colors” composition and select “Controller” layer. In the “Effects Controls” panel you can adjust colors.

4. Do the same with the other slides. You can arrange the slides in the desired order in the “Final Comp” composition. Slides should be placed one above the other.

That's all. Hope you like it and again - thanks for buying. Please do not forget to rate if you like!

Regards
