Clean Dynamic Intro

Customization:

Before open, this project please download free fonts:

https://www.dafontfree.io/objective-font-family/
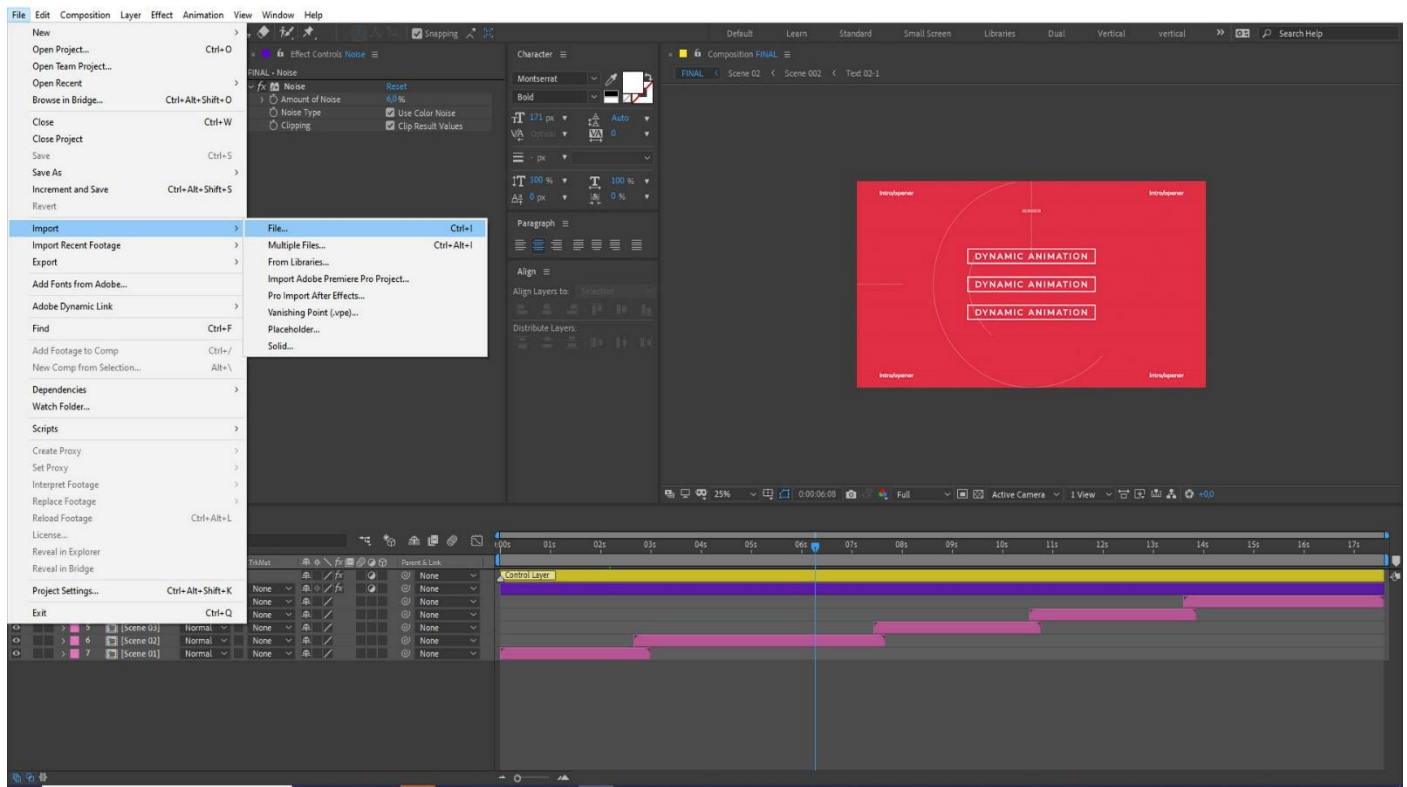

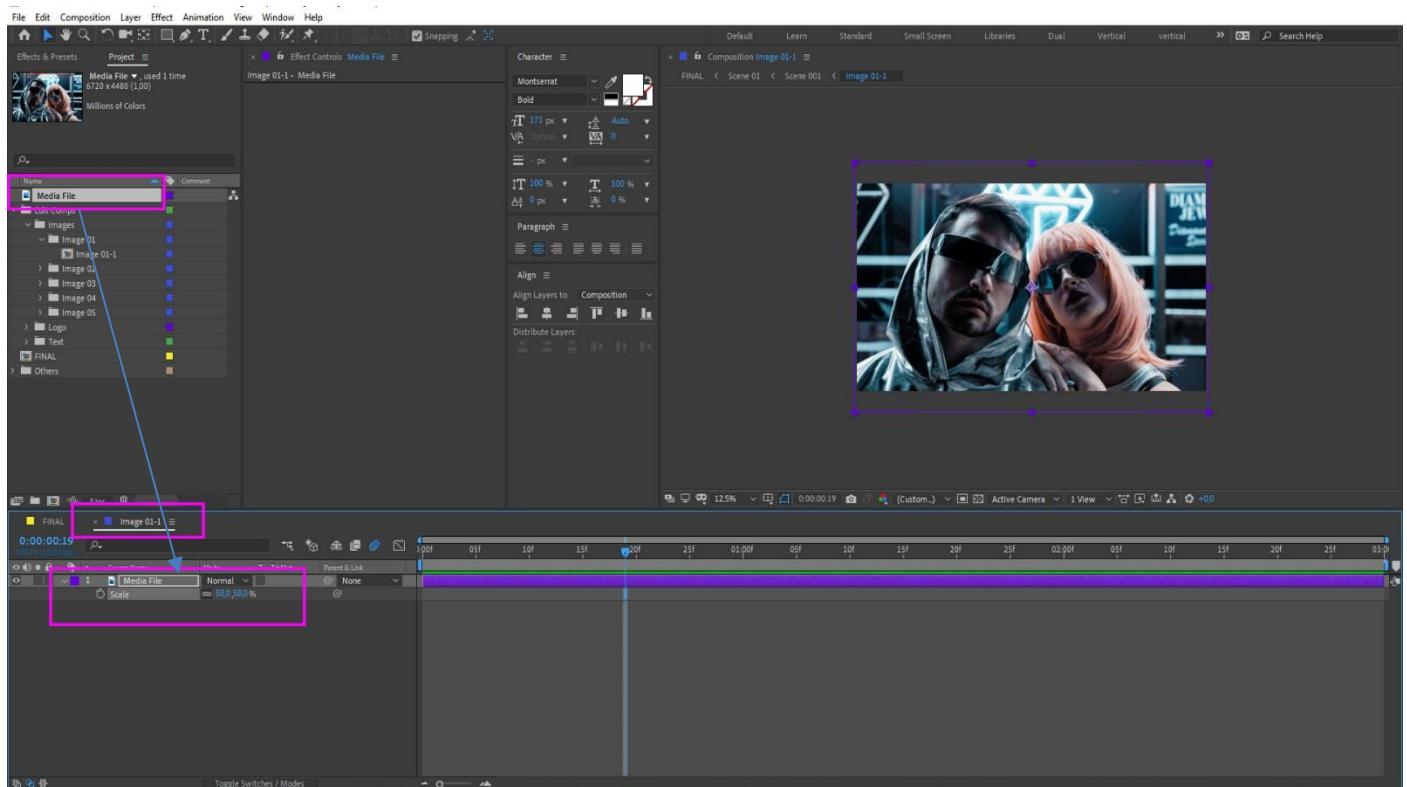

1. Project Overview:

- **FINAL** is a composition for render;
- Folder **EDIT COMPS** includes all compositions for editing;
- Ignore Folder **OTHERS**.

2. Edit Images:

Import all media files that you want to use in the project.

Open a Placeholder, drag and drop your media file on the timeline. Resize your media according to the composition size (click "S").

Repeat with each placeholder of the project.

3. Edit Text:

Open up **Text** composition; double click on it to say whatever you want.

Repeat with each text composition of the project. Align text if it necessary.

NOTE: do not delete original layer it has an animation, double click on the text layer to edit it.
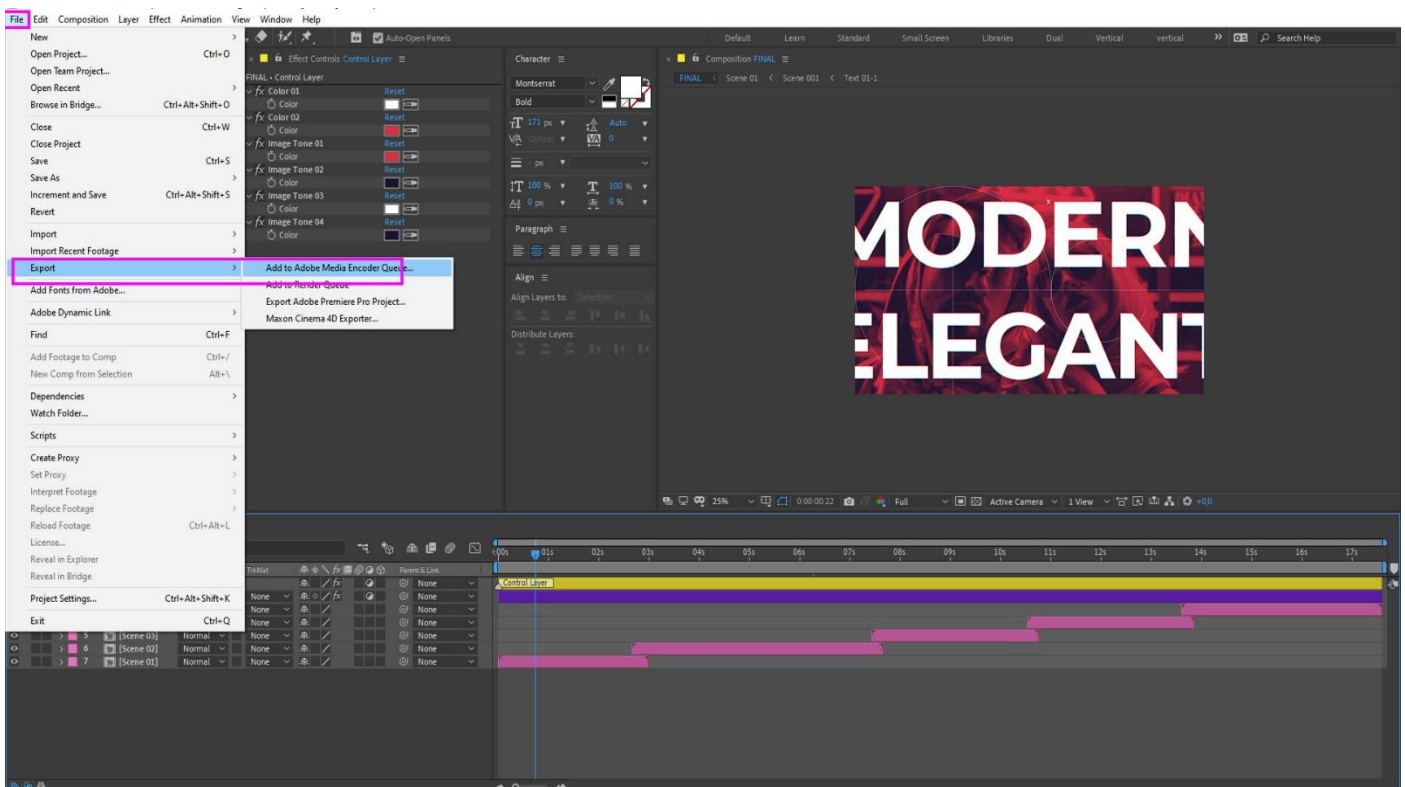

4. Color Control Layer

Using the **Control Layer** (in the **FINAL** composition), you can change colors of the project.

The project has modular structure so you can remove unnecessary scenes, swap them, change duration.

Now your project is ready for render.

Well, that is it. I hope you enjoy this template.
