How to use

Powerful Action Opener

Essential Elements
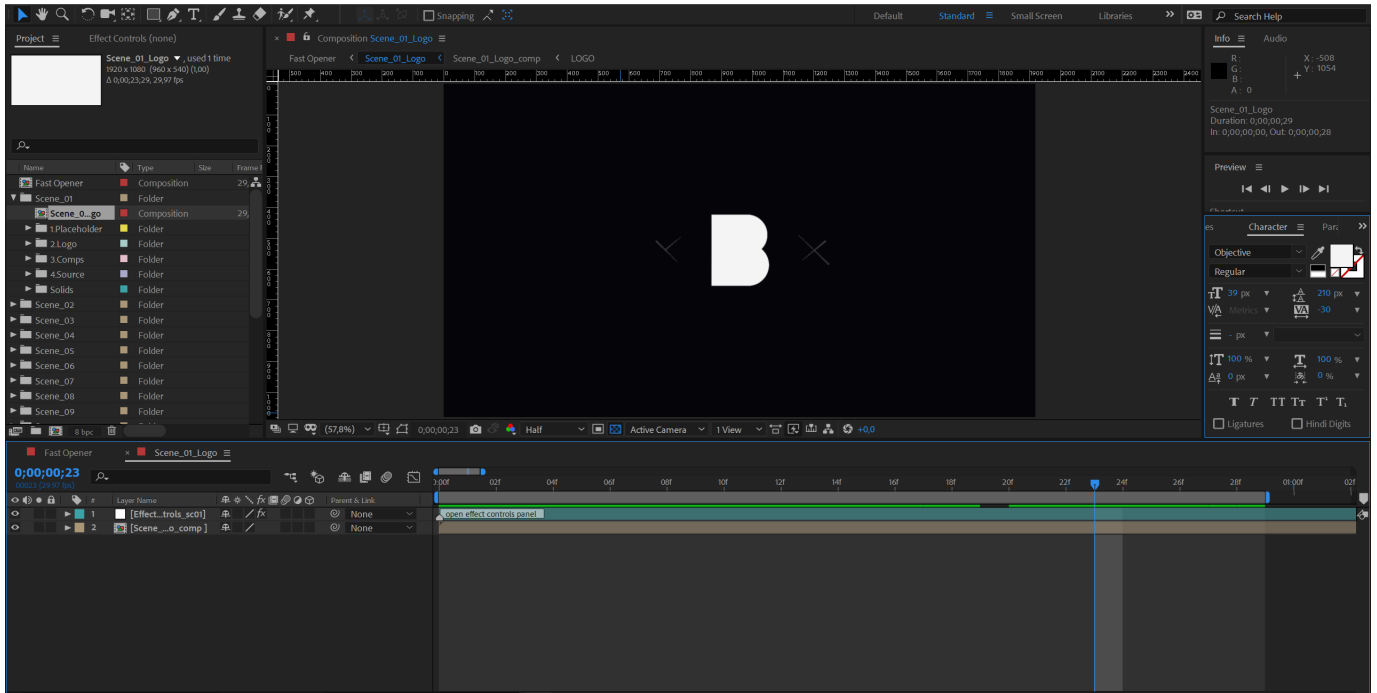

Open the project file in the Adobe After Effects.
The project includes: main comp **'Powerful Action Opener'** (as video preview) and **23 scenes.**

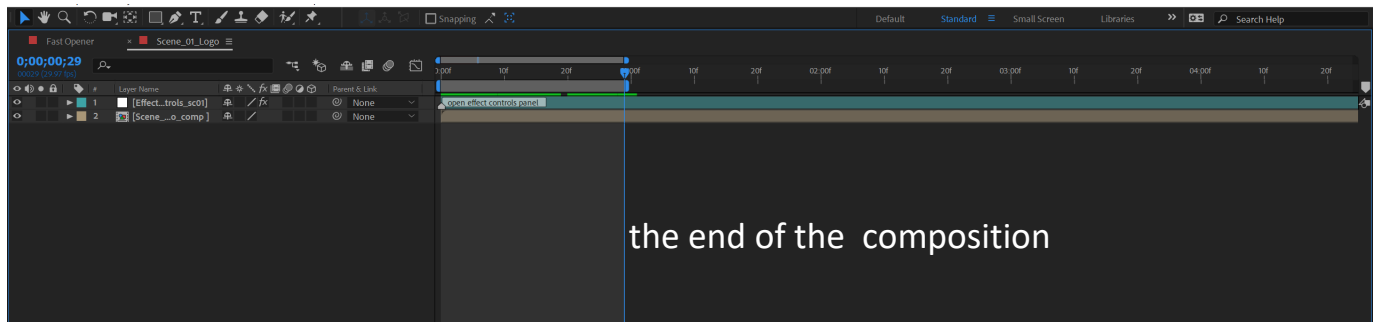

You can use only the necessary scenes for you. Just drag and drop or delete unnecessary scenes folders.
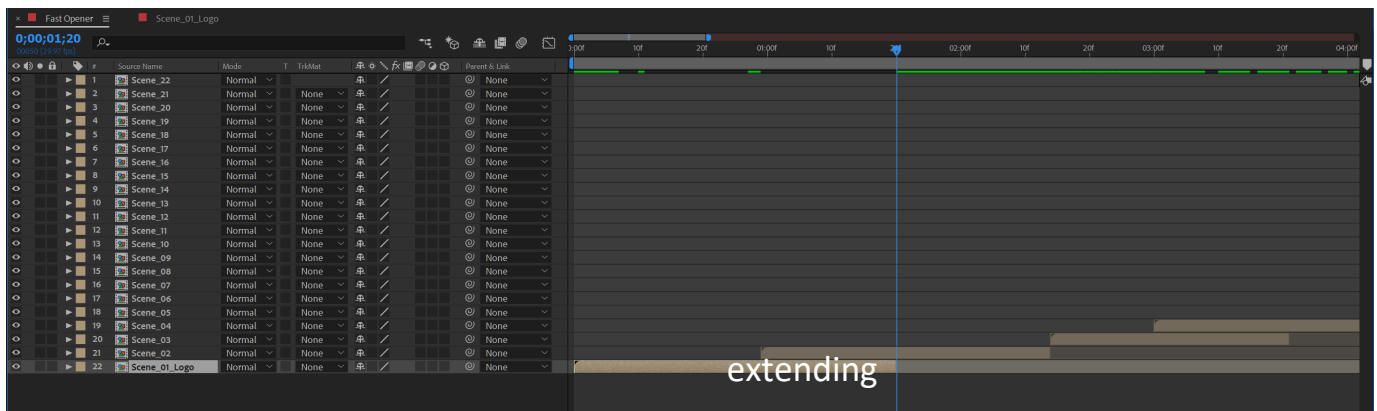

Editing Scene

Select the scene and open the folder. For example Scene_01. Open the composition named **Scene_01_Logo**.

The length of the working area is the same as in 'Fast Opener' composition.

You can stretch the length of the scene. Just pull the layer of the composition.

1. Adding media files

E. g. Open the composition: *Scene_01 - 1.Placeholder - Placeholder_01sc01*.
Upload your media files. The **file-import-file** ... Put your file on the timeline in the composition *Placeholder_01* above the *"preview image_01.jpg "* layer. Cut the length of the layer on the marker named 'cut'.

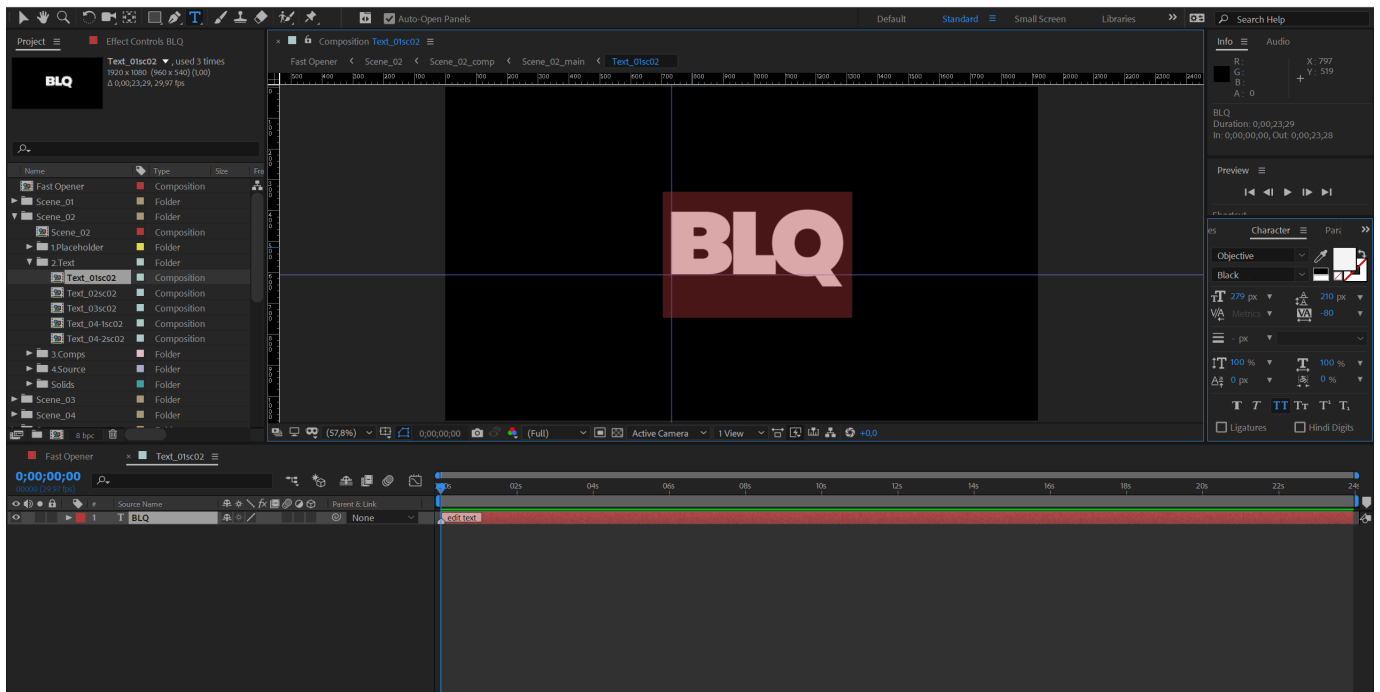

2. Editing text

The first you need to install the font. Link:
https://www.dafontfree.io/objective-font-family/

Eg. Open the composition: Scene_02—2.Text-- **Text_01sc02**.

Select the text layer and move the Current Time Indicator to the **'edit here'** marker.
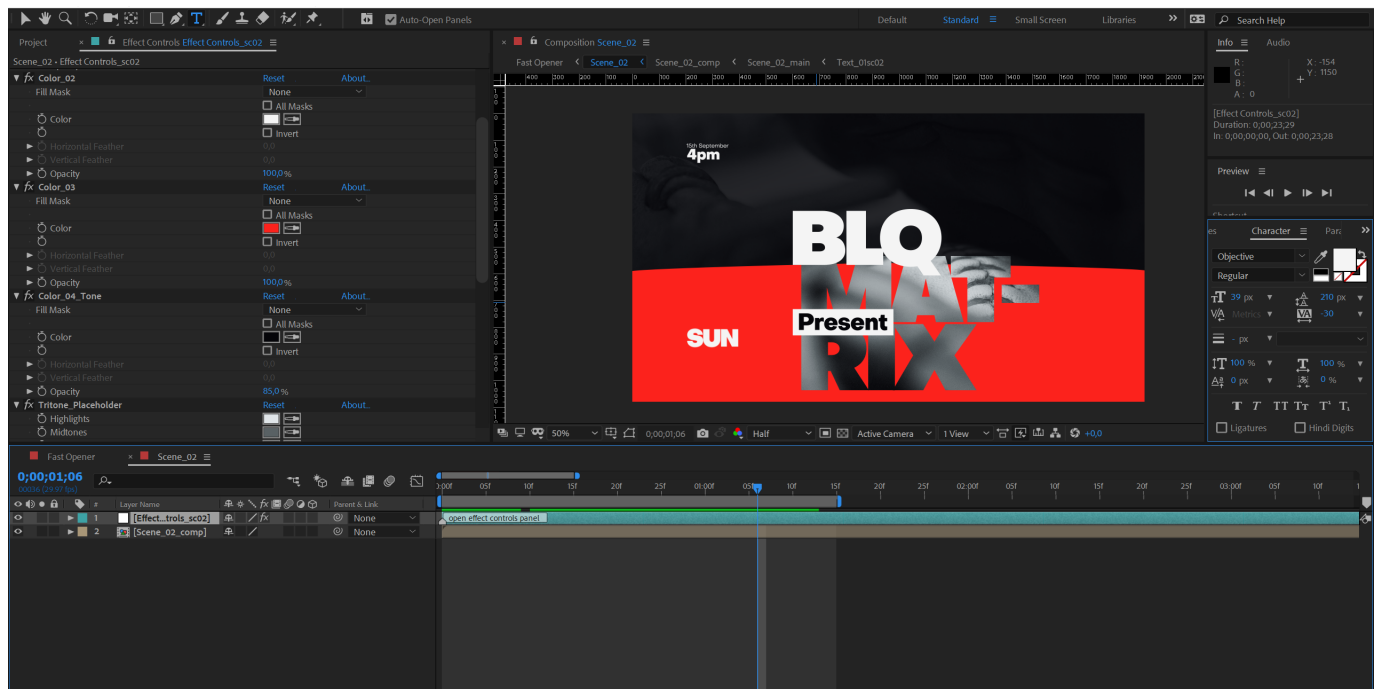

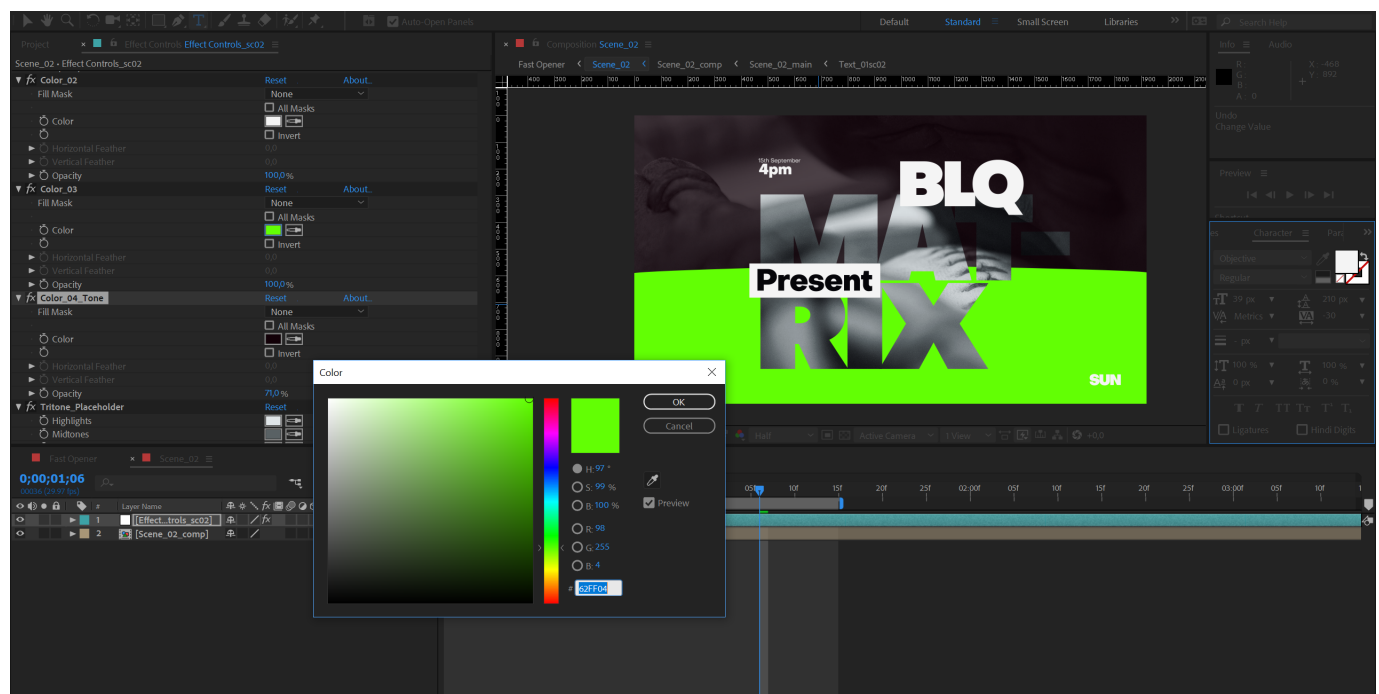

3. Editing text property and color setting

Eg. Open the composition: *Scene_02- Scene_02*. Select the **'Effect Controls_sc02'** layer -open **'Effect Controls'**.

Use point,color and slider controls to create your own texts composition.

Make the same steps (1,2,3...) with other scenes.

If you use all the scenes just replace all texts. Change the colors and properties if you wish. Open the main composition 'Powerful Action Opener'. Put your soundtrack on the bottom. Send the composition to render.

Enjoy!
