# How to add photos to .aep(MOGRT) : Youtube Pack

6 different categories
More than 60 elements
In and Out animation
4K 3840×2160, 25 fps
Required installed After Effects
Quick and easy adjustment
No Plug Ins required
No photo/audio included

Step 1. Open .aep file with After Effects to import your photos.

Open **Buttons(MOGRT).aep** file in After Effects (version CC18 and higher).
Here in project window you can see Layer "**Replace**".

Right click on it -> Replace Footage -> File
And in opened window set path to your logo file or image
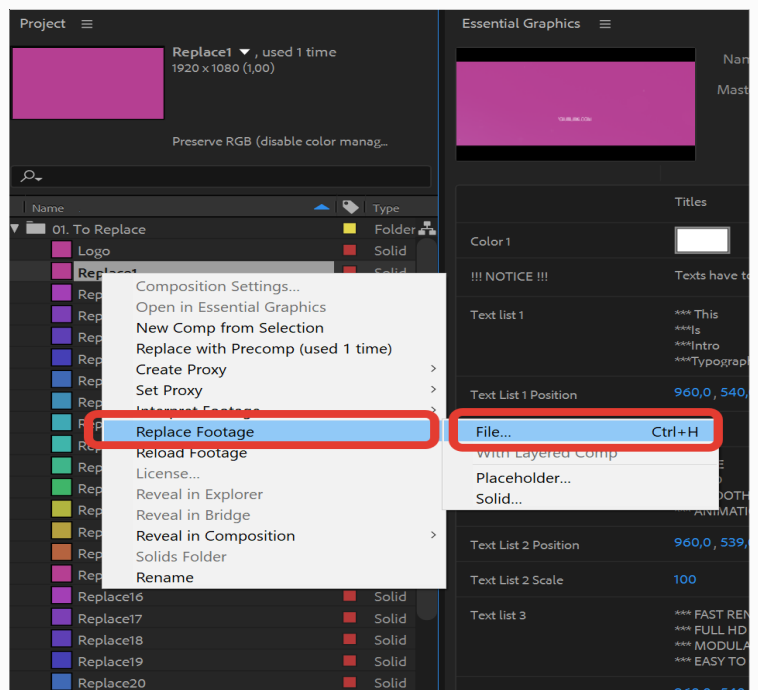

Open Essential Graphics
window (if it`s not)

In top panel of After
Effects click on "Window"
and select Essential
Graphics from list.

In opened window press "Export Motion Graphics Template" button and
save .mogrt file to your comp.
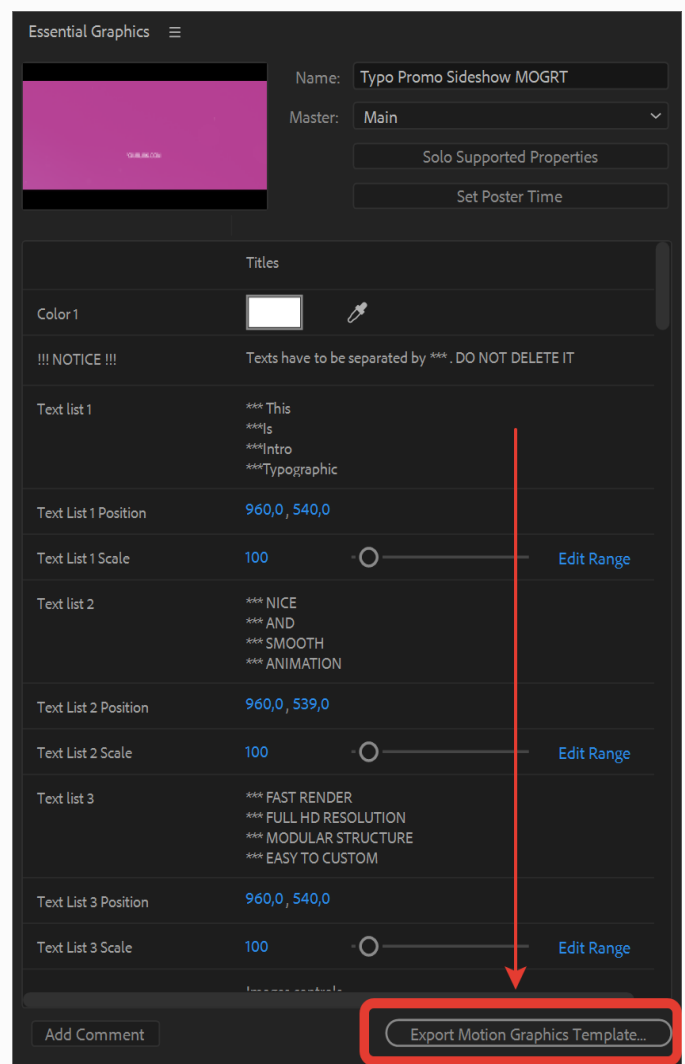

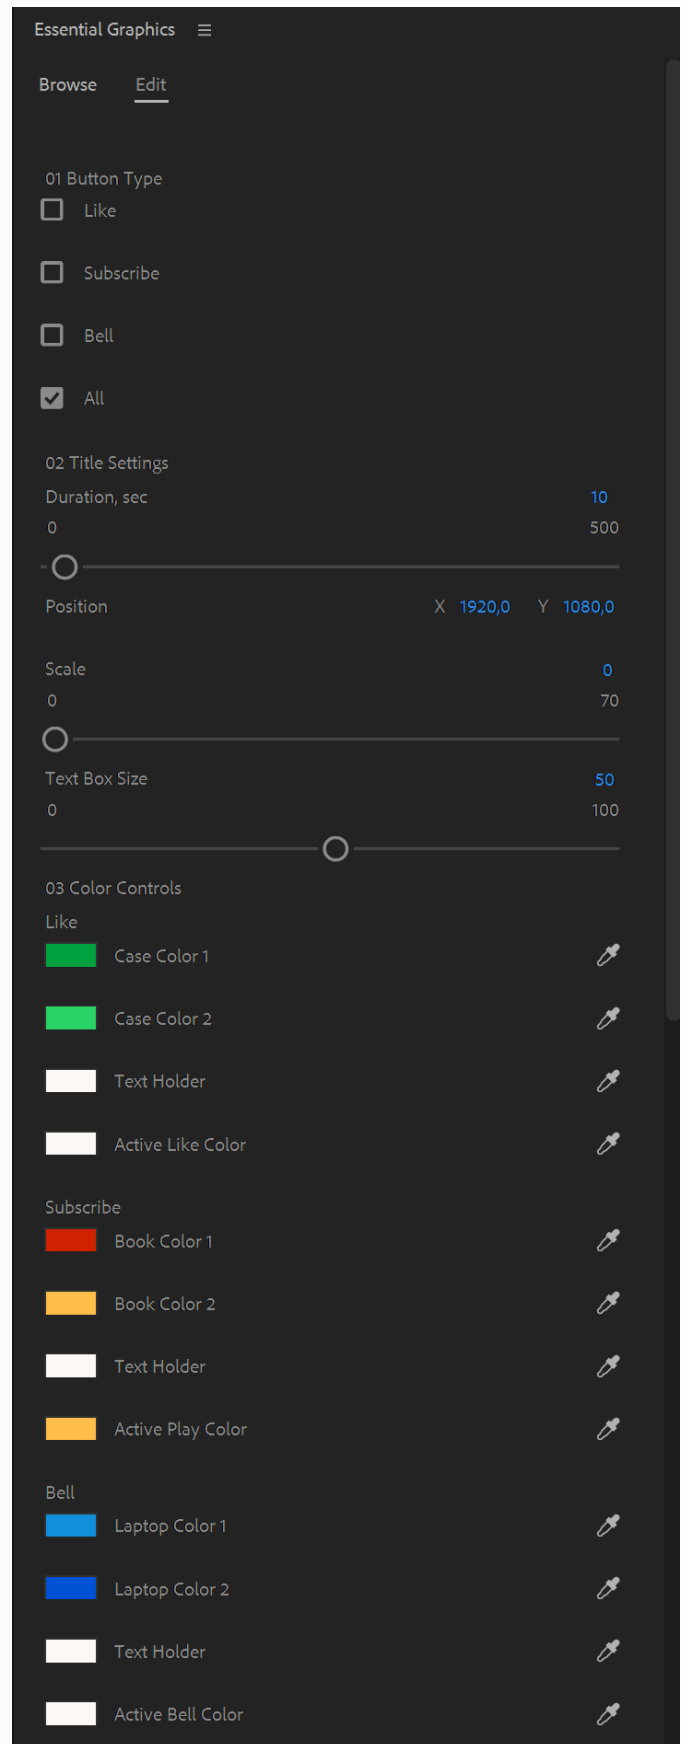

Open Premiere Pro (CC18 and higher)
Make new sequence

Than change workspace to Graphics and import previosly saved .mogrt file.

In browse window of it click on Install Motion Graphics Template icon and open .mogrt file, that you just exported from After Effects.

Now in browse window you can see this template. Select it here and drag to the timeline.

Place it in beginning of timeline. Select layer to see all available settings in Essential Graphics window in Edit menu
