## How to edit a project.

1) To edit a project, open the Edit folder. In it, you will see sequences with text and images that you can change. All of them are marked on the timeline, so you can edit the project sequentially and not get confused

2) For example, open the file Part\_2. The text editing sequence is named Part\_2 and is edited in Essential Graphics. You can insert your own image or video into the Part\_2 sequence using Essential Graphics.

Other sequences in the project are edited using the same principle.
