

Hello! Thank you very much for purchasing Clean Logo Reveal project!

SO, LET'S BEGIN!

1. Download Gilroy font.

<https://www.dafontfree.io/download/gilroytypefamily/>

This font is used by default, but you do not need to use it.

2. Open After Effects project that you like.

INSTALLING YOUR LOGO

1. Import your logo file into project

PANEL PROJECT, LEFT-CLICK, IMPORT / FILE, CHOOSE THE DESIRED FILE

(It will appear in the project panel)

2. Open YOUR LOGO composition.

3. Drag to area where YOUR LOGO layer was and scale, if necessary.

SETTING THE TEXT / TITLES

1. Open YOUR TITLES composition.

2. Double click on the text layer and edit it when entering any text. You can set ANY text color you want and also shadows, strokes and fonts with native functions of AE.

(By default is used Gilroy font. Its free and available here:

<https://www.dafontfree.io/download/gilroytypefamily/>)

ADDING SOUND

1. Download the track.

Versions: 1, 4, 7

<https://audiojungle.net/item/inspirational-corporate-logo-2/10186255>

Versions: 2, 5 (also applies to versions 3,6)

<https://audiojungle.net/item/logo/30302536>

Version: 3 (also applies to versions 2,5,6)

<https://audiojungle.net/item/logo/26520784>

Version: 6 (also applies to versions 2,3,5)

<https://audiojungle.net/item/clean-logo/20729382>

2. To add a sound, open YOUR SOUND composition and add the desired audio file in it.

PANEL PROJECT, LEFT-CLICK, AND THEN IMPORT / FILE, CHOOSE THE DESIRED FILE.

3. After it appeared in the panel project drag in the composition and align to the beginning of timeline.

OPTIONS

So, our movie is almost ready, but you can customize it more. Open composition RENDER 4K / CONTROL.

Click on the CONTROL layer, select Customization .

(Then activate the EFFECT CONTROLS (F3 or menu Effect)).

Here you will see a panel with extra settings:

Linear Shadow - opacity settings for linear shadow

Linear Shadow Color - select color for linear shadow

Inner Shadow - opacity settings for inner shadow

inner Shadow Color - select color for inner shadow

Outer Shadow - opacity settings for outer shadow

Outer Shadow Color - select color for outer shadow

Reflection - opacity settings for the reflection effect at the end of the clip

Mask On/Off - enable or disable the appearance of color with the mask.

(If off, colors appear smoothly)

Inner Glow Color - select color for inner glow

Outer Glow Color - select color for outer glow (this setting is not present in all clips)

Background Color 1/ 2 - select color for background

Titles On/Off - include or not titles

Titles Position - change in title position

Titles Scale - change in title scale

Lens Flare - opacity adjustment for lens effect at the end of the video

Lens Flare Color - select color for lens effect

Vignette - opacity adjustment for vignette effect

Brightness - change the brightness of the image

RENDERING

So, all settings are made, it's time to render our videos. Open composition **RENDER 4K / CONTROL** - for 4K rendering

or **RENDER FullHD** - if you need 1920x1080.

Then go to the **MENU / COMPOSITION / ADD TO RENDER QUEUE (OR PRESS CTRL + M)**

Then choose size, format, name and location of the final rendering.

That's all, rate our projects and if you have any ideas (wishes) of our future products, let us know!
