

## After Effects Template Tutorial

Thank you for downloading this After Effects template.

Please read this help file before starting.

1. Open text file in the "Font" folder and install fonts from the links, if it is necessary.
2. Open the project file in Adobe After Effects.

### 3. Adding placeholders (photo/video, audio, logo)

Name		Comment
▼ 01.Edit comps	■	edit here
▶ Color	■	
▶ Images	■	
▶ Music	■	
▶ Text	■	
▶ 02.Final Comp	■	render this
▶ 03.Others	■	ignore this

**"0.1 Edit Comps"** folder: its contents can be changed.

**Images folder** include all media files of project (photo/video and logos)

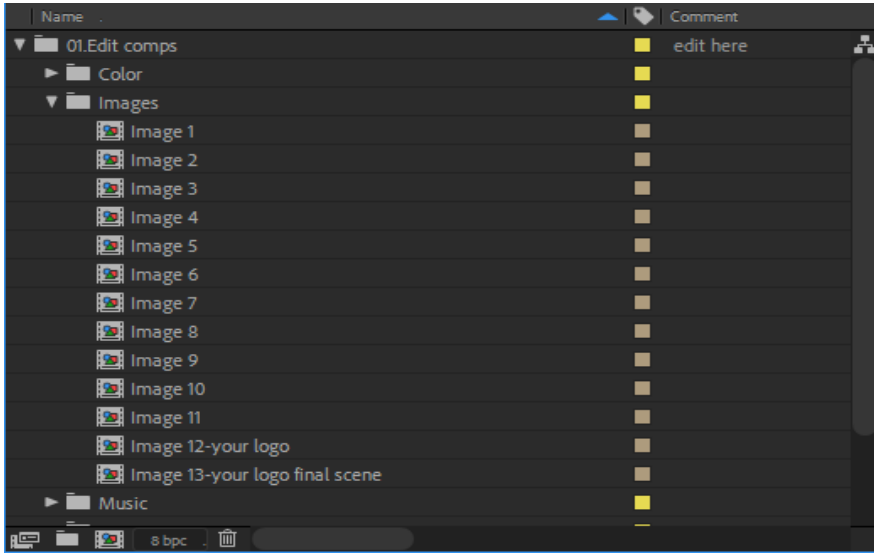

**Text folder** include all texts of project

**Music folder** include audio file of project

In the **"02.Final Comp"** folder your can find "Final Comp" composition, containing all scenes of project. From here your can export the finished project.

The contents of folder **"03.Other"** should not be changed.

## 3.1 Adding photo/video

Here we work with "**0.1Edit Comps**"/**Images** folder

Open any media placeholder by double clicking and drag and drop your media on timeline

Open logo placeholder by double clicking and drag and drop your logo on timeline

### Hot key

S -scale

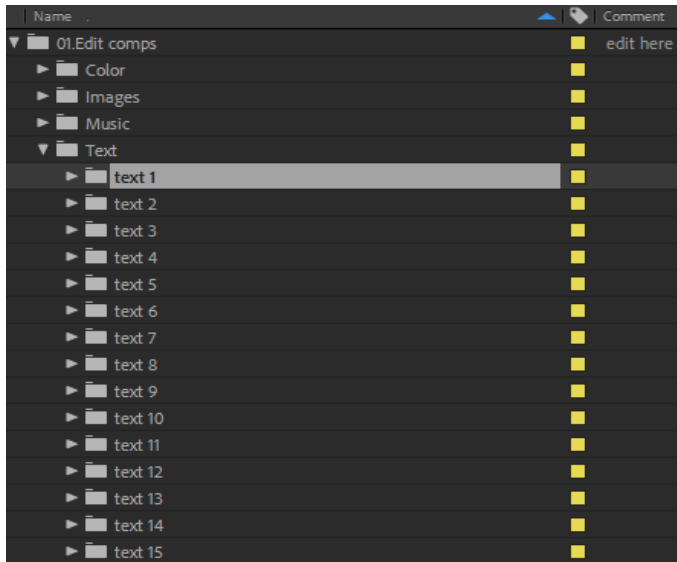

P- position

T- opacity

## 3.2 Adding text

Here we work with "**0.1Edit Comps**"/**Text** folder

Open any text placeholder by double clicking and select text by double clicking, write your own text

### Hot key

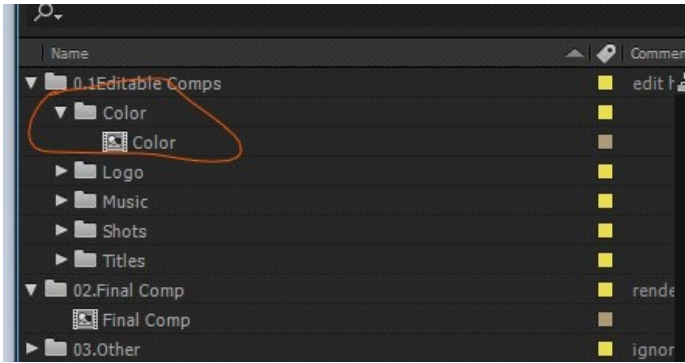

S -scale

P- position

T- opacity

## 4. Scene Customization

Here we work with "**0.1Edit Comps**"/**Color** folder. Open "Color" sequence by double clicking. Select solid "Color" on timeline and find controllers on "Effect controls" panel.

Here you can change templates setting

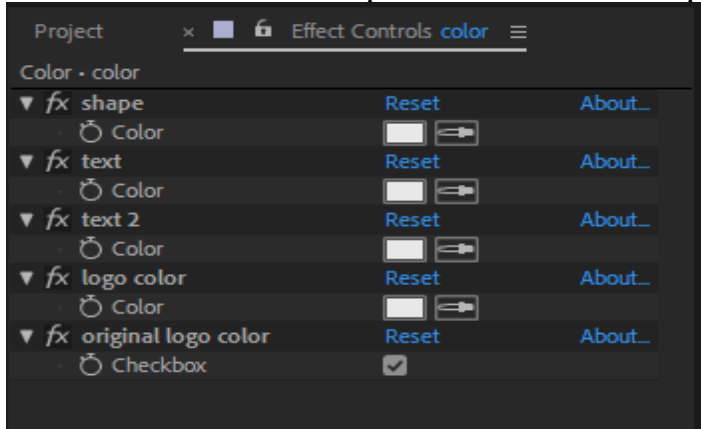

**Text Customization** In the "Color controls" panel find effect "Text " and "Text 2". Change color of controllers using color picker.

**Logo Customization** In the "Color controls" panel find effect "logo color". Change color of controller using color picker.

**Original Logo Customization** In the "Color controls" panel find effect "Original logo color". Change color to original (or new) using controller.

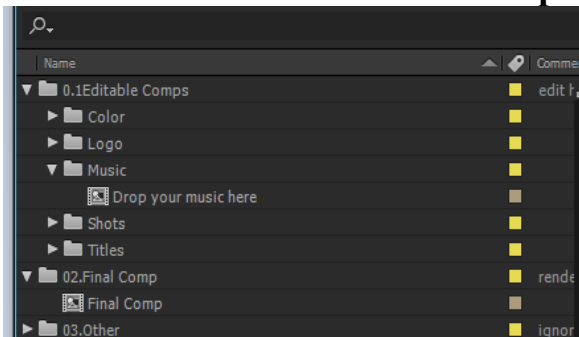

### Shapes Customization

In the "Color controls" panel find effect "shape". Change color of controller using color picker.

## 5. Music Customization

Here we work with "**0.1Edit Comps**"/**Music** folder

Open music placeholder by double clicking and drag and drop your media on timeline
