How to edit a project.

1) To edit a project, open the Edit folder. In it, you will see sequences with text and images that you can change. All of them are marked on the timeline, so you can edit the project sequentially and not get confused

2) For example, open the Stories_04 sequence. The text editing sequence is called Stories_04 and is edited in Essential Graphics. You can insert your own image or video into the Stories_04 sequence using Essential Graphics.

Other sequences in the project are edited using the same principle.
