

## Infographics Manual

## Step 01

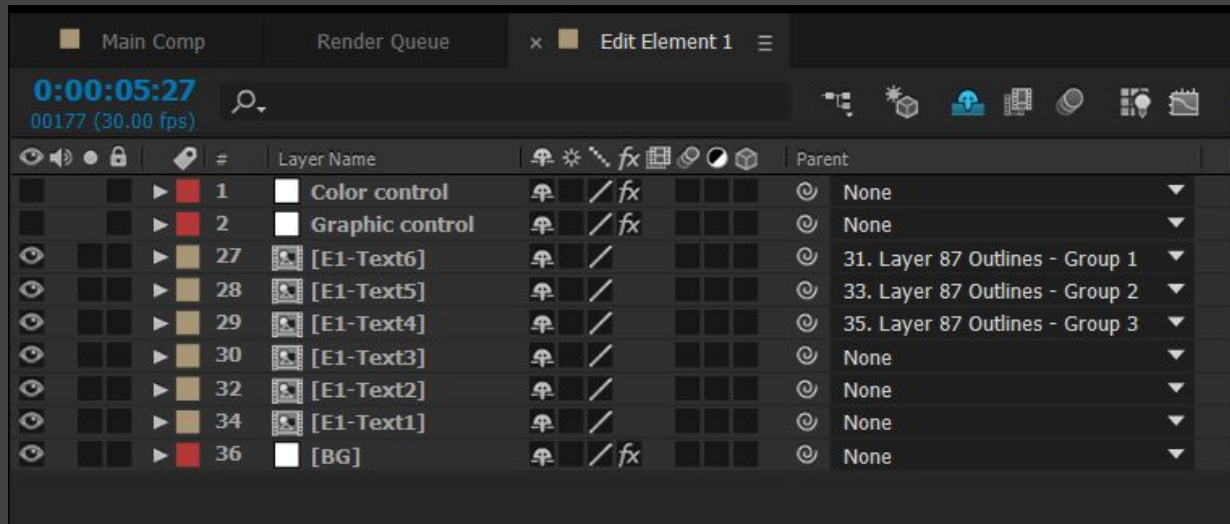

Open the folder “Comps”  
and choose a composition.

## Step 02

Inside each composition will be a layer with a color controller and other controllers.

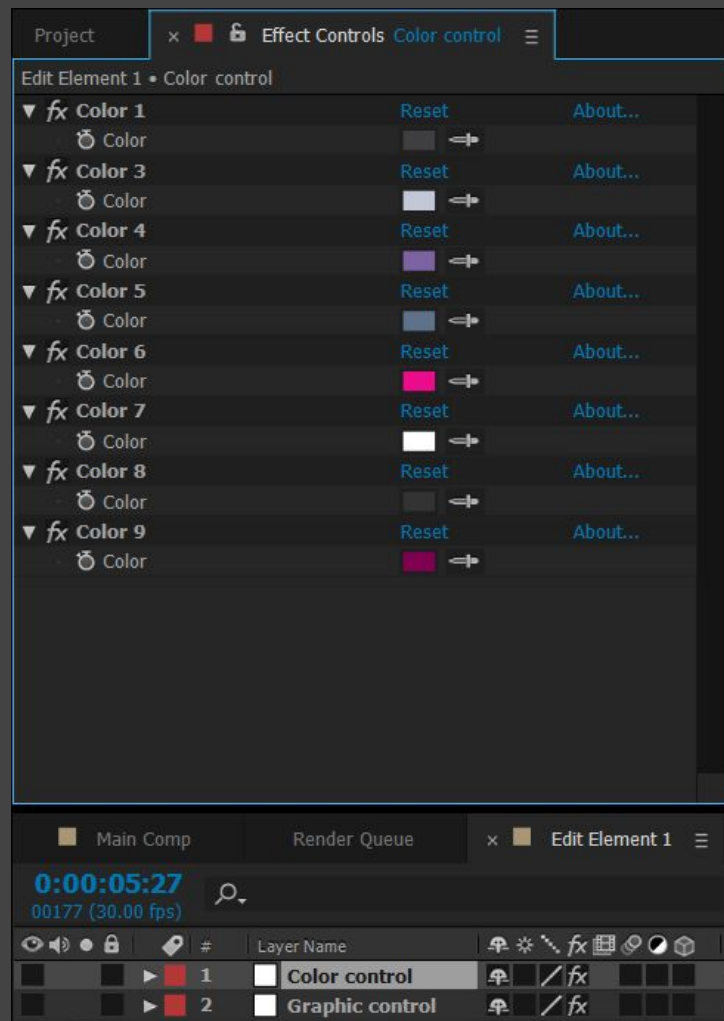

Use them if you want to change the value of color or numbers.

## Step 03

Simply select the color controller layer and open the Effect Controller tab

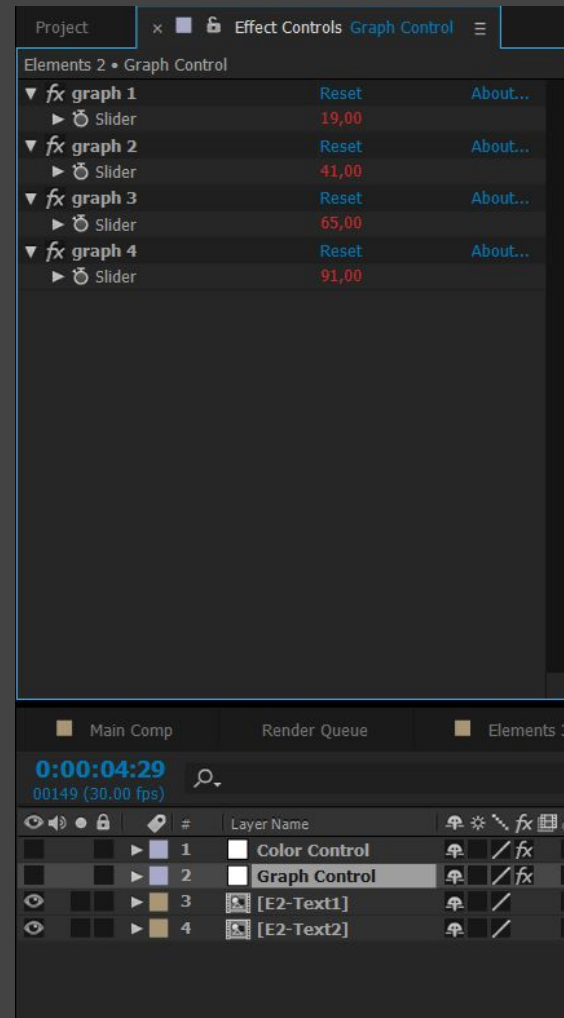

Here you can change any color to the one you want.

## Step 04

Select the Graph Controller layer and open the Effect Controller tab

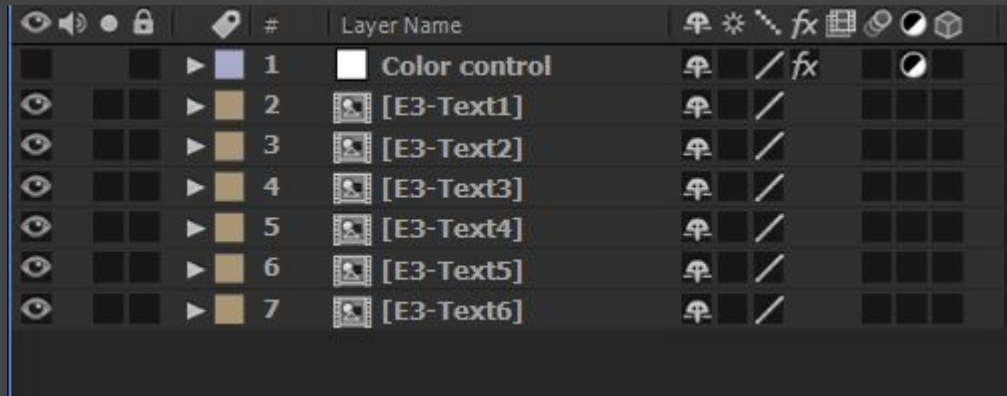

Here you can change the value of charts.

## Step 05

Each compositions has pre-compositions with text. Inside there is a text layer that can be changed.

To change the color of the text, go back to step 3.

Step 06

Enjoy
