Here are a few instructions that will help:

Folder " Edit "

Here you can add photo and video files for your project .Drag your picture into the comp, then resize it

It also allows you to change all text composition

File Edit Composition Layer Effect Animation View Window Help

The screenshot displays the Adobe After Effects interface with three main panels: Project, Effect Controls, and Timeline.

Project Panel: Located on the left, it shows a project named **//FINAL_OUTPUT** with a resolution of 1920 x 1080 (1.00) and a frame rate of 29.97 fps. The project structure includes folders for **1.WEDIT_COMP**, **/EDIT_TEXT**, **AUDIO**, **IMAGE/VIDEO**, **LOGO**, **1.WORK_COMP**, **3.ASSETS**, and **Solids**. A red box highlights the Project panel.

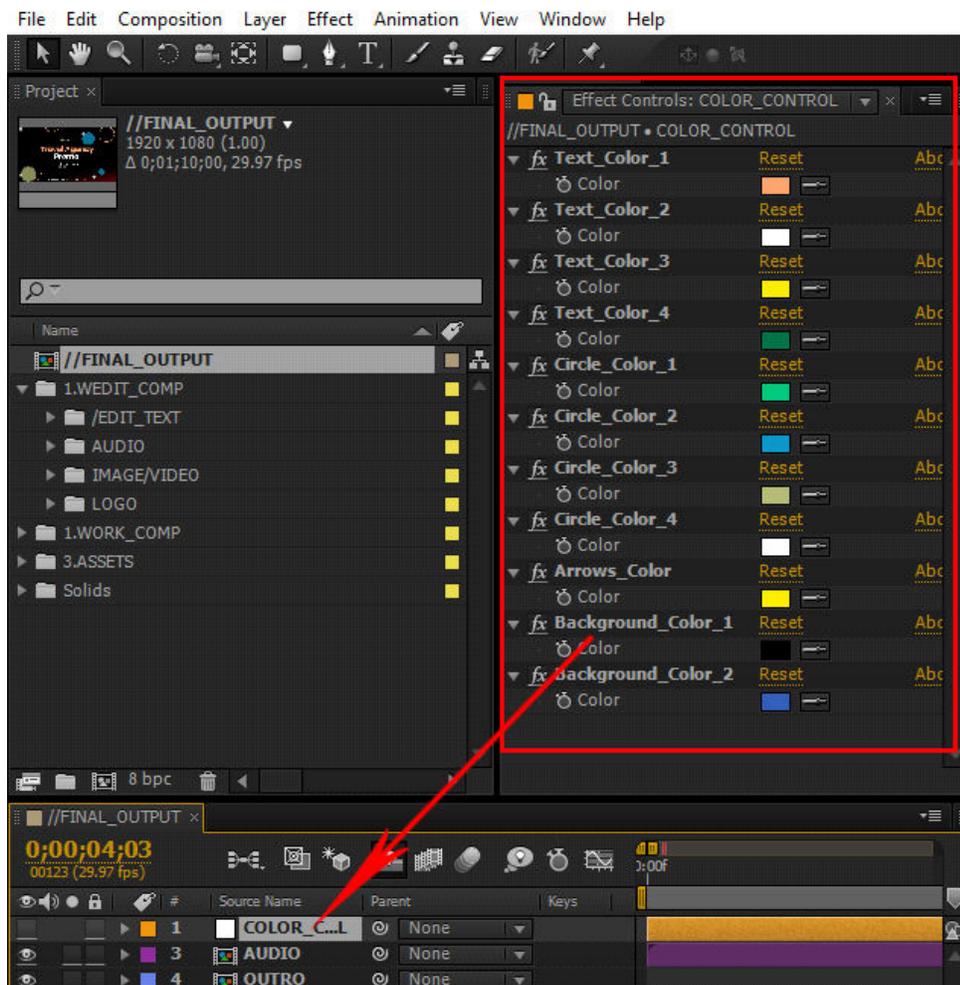

Effect Controls Panel: Located on the right, it shows the **Effect Controls: COLOR_CONTROL** panel for the **//FINAL_OUTPUT + COLOR_CONTROL** composition. It lists various color effects with their respective color swatches and 'Reset' buttons:

- Text_Color_1** (Orange)
- Text_Color_2** (White)
- Text_Color_3** (Yellow)
- Text_Color_4** (Green)
- Circle_Color_1** (Green)
- Circle_Color_2** (Blue)
- Circle_Color_3** (Light Green)
- Circle_Color_4** (White)
- Arrows_Color** (Yellow)
- Background_Color_1** (Black)
- Background_Color_2** (Blue)

Timeline Panel: Located at the bottom, it shows the **//FINAL_OUTPUT** composition with a timecode of **0:00:04:03** and a frame rate of 29.97 fps. The timeline includes a **COLOR_C...L** layer (orange), an **AUDIO** layer (purple), and an **OUTRO** layer (blue).

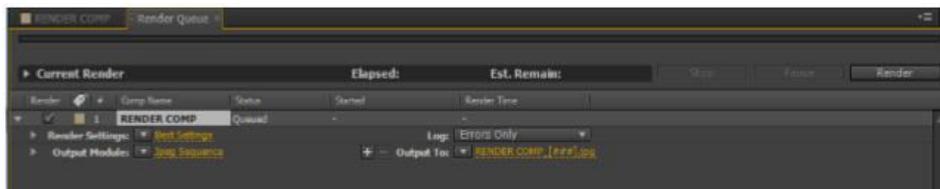

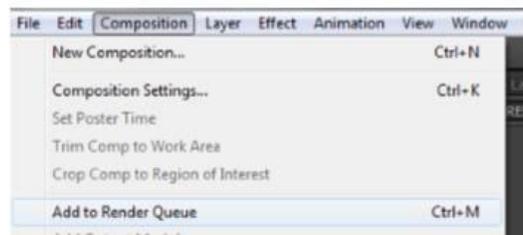

Color Control

Open the layer property “**Control Project**” in the Project. Here you can easily replace the color of all text layers

Render your video

Double-Click on the RENDER COMP to open it in the timeline.
After that, go to Composition – Add to Render Queue and the Render Queue will open in the timeline window with the new Render Job added to it.

Make sure the Render Settings are set to Best Settings. Click on whatever is written right to the Output Module and a new window will open up. In that window, you can change the codec and file format. Also, if you have used sound in this project, make sure you activate Audio Output at the bottom of that new window. Else your video will be mute.

Last, click on whatever is written right to the "Output to" text and set the folder where you want your video to be saved in.

When you have set everything to your needs, click Render and wait for it to finish. Depending on the project as well as your computer specs, this can take some time.
