# Instructions for basic customization
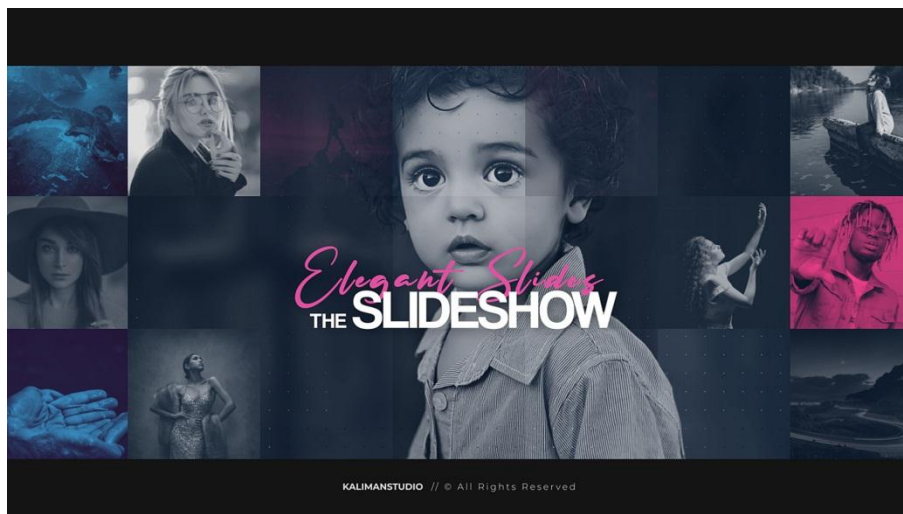

Copy your files to the project panel. Put them in the folder: **"Your Photo or Video"**.
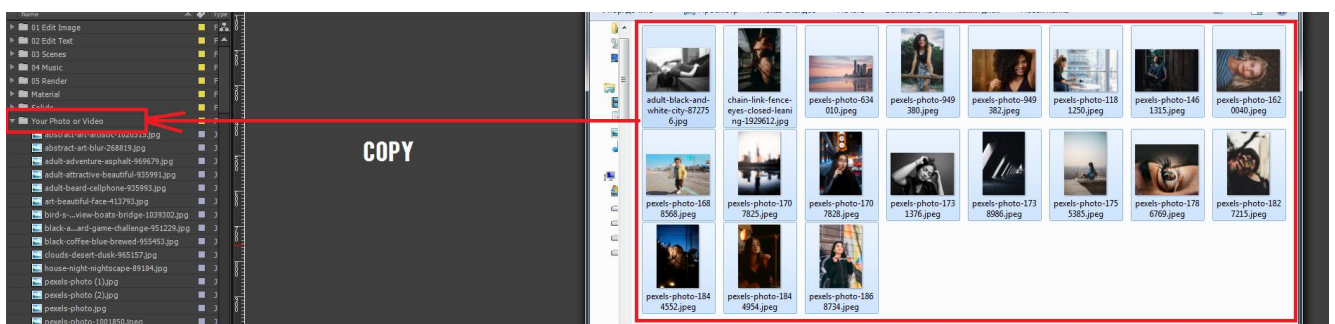

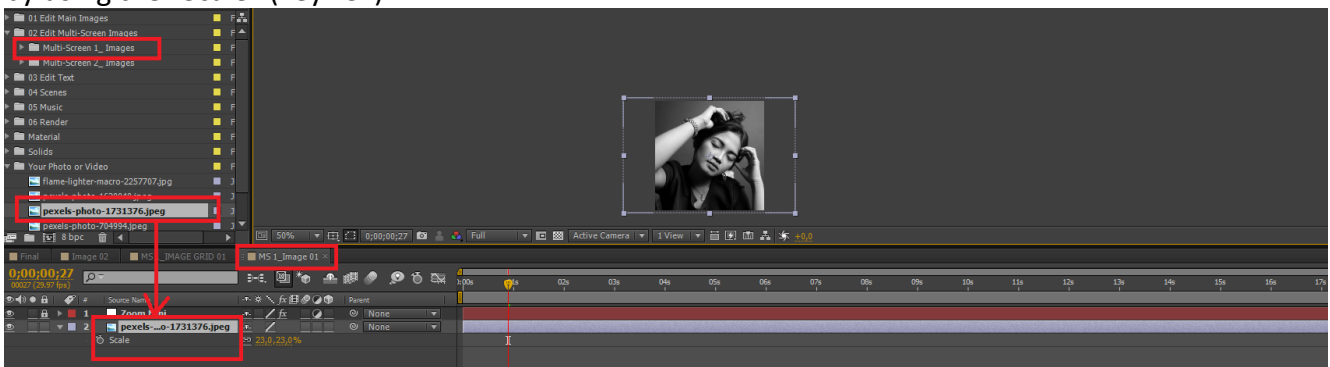

EDIT IMAGES or VIDEO:

Find the folder in the project panel called **"01 Edit Main Images"**. Open it. Select the desired composition from **(Image 01, 02, 03...)**. Double click on the composition name. Find the right photos in the folder **"Your Photo or Video"**, and move it into an open composition. Place a photo or video under a layer of **"Zoom"**. Resize your photos by using the "Scale" (key **"S"**).

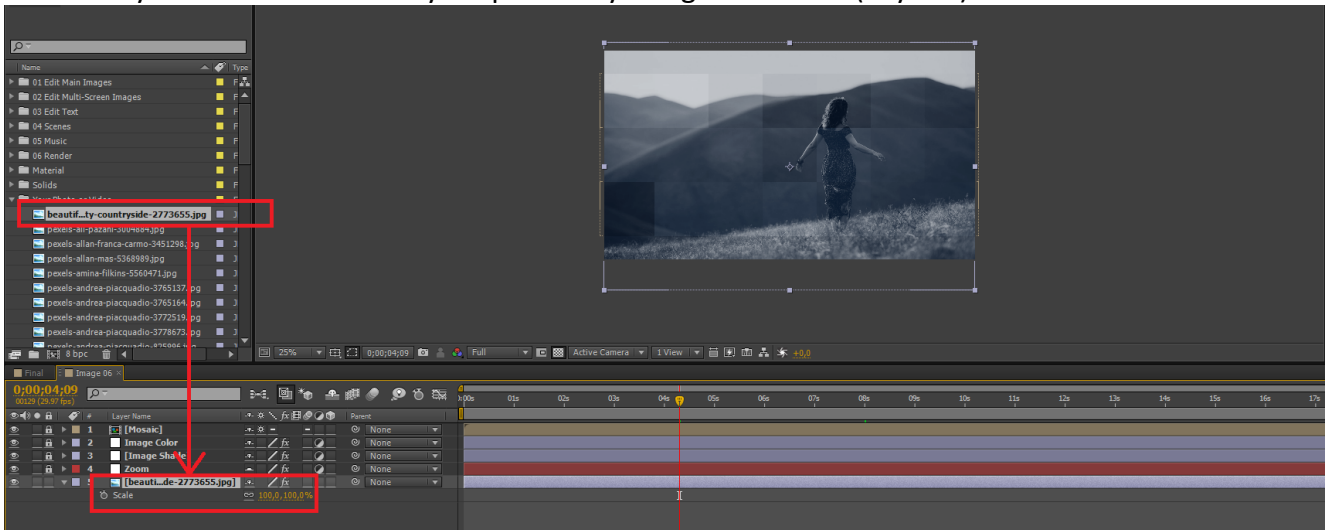

TRANSITION IMAGES

In addition to the regular placeholders, the project also includes two multi-screen placeholders that are used for transitions between scenes.

Find the folder in the project panel called **"02 Edit Multi-Screen Images"**. Open the **" Multi-Screen 1(2)_ Images"** folder. Select the desired composition from **(MS 1(2)_Image 01, 02, 03...)**. Double click on the composition name. Find the right photos in the folder **"Your Photo or Video"**, and move it into an open composition. Place a photo or video under a layer of **"Zoom Mini"**. Resize your photos by using the "Scale" (key **"S"**).

To see the order in which the images are located, open the **"# MULTI SCREEN 01 (02**)" folder, and the first composition **"MS 1(2) _IMAGE GRID 01"**.
NOTE: It is not necessary to open all compositions: **"MS 1 (2)   IMAGE GRID 02, 03, 04, 05"**.

OPEN TO SEE THE ORDER IN WHICH THE IMAGES ARE LOCATION
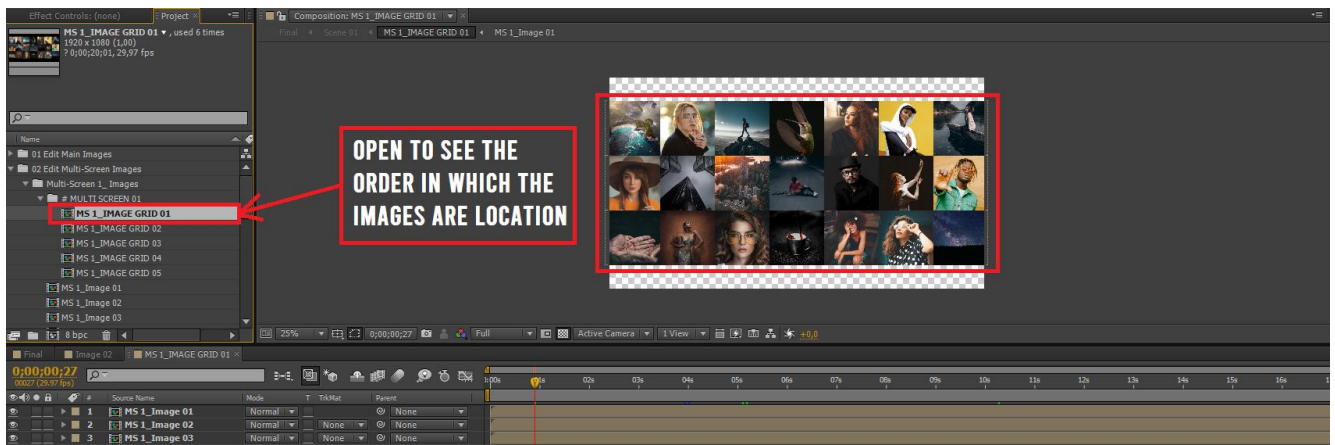

EDIT TEXT:

Find the folder **"03 Edit Text"**. Select the desired composition from **(Text 01, 02, 03...)**. Double click on the composition name. Double-click on the text layer you want and just edit it. To adjust the text, use the panel **"Character"**. Stick to the center of the screen.
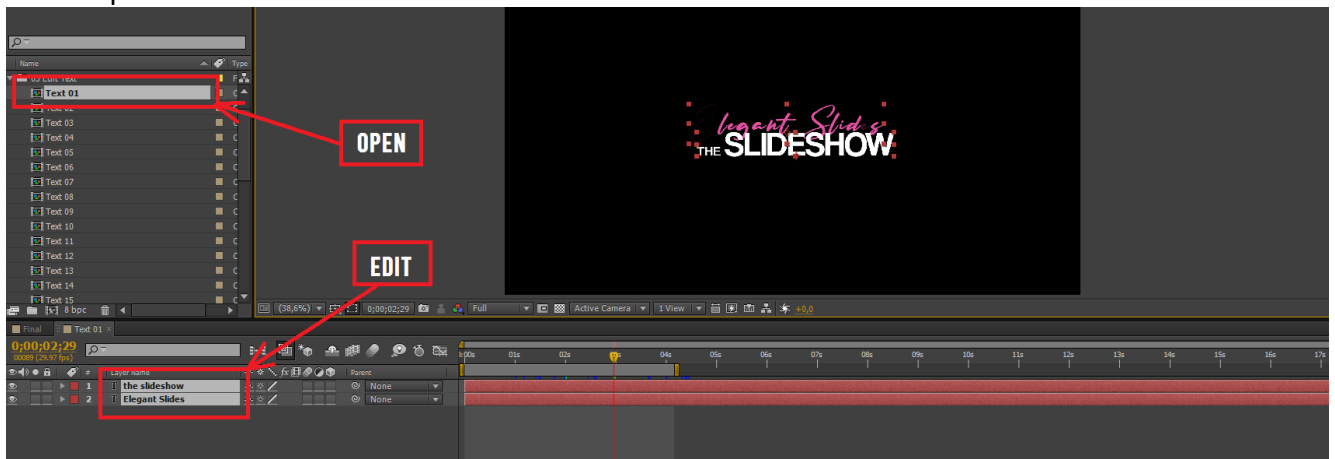

OPEN

EDIT

EDIT SCENE:

Find the folder in the project panel called **"04 Scenes"**. Open the desired scene. To change the position of the text on the screen select the yellow layer and just move the text on the screen. You can also drag the yellow layer to the right and left.

OPEN

MOVE

SELECT
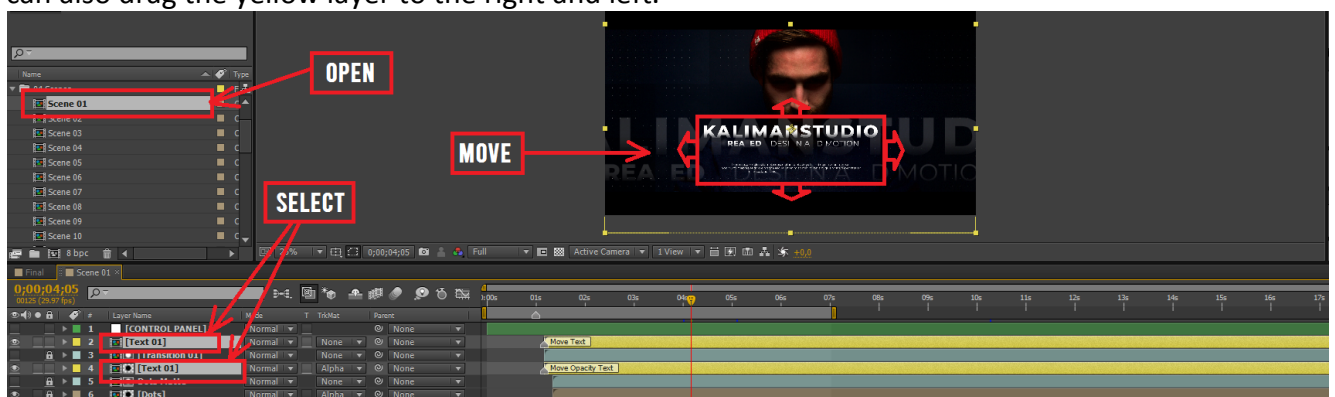

NOTE: The color of the transitions can be changed on the **"CONTROL PANEL"** in the **"Final"** composition.

The project includes two options for a set of small images for transitions: **"Multi-Screen 1_ Images"** and **"Multi-Screen 2_ Images"**. You can use them in turn in each scene if you have previously filled them with images.
To do this, select the topmost layer **"CONTROL PANEL"** and press **"F3"** on the keyboard.

**NOTE:** only one of the options should be enabled.

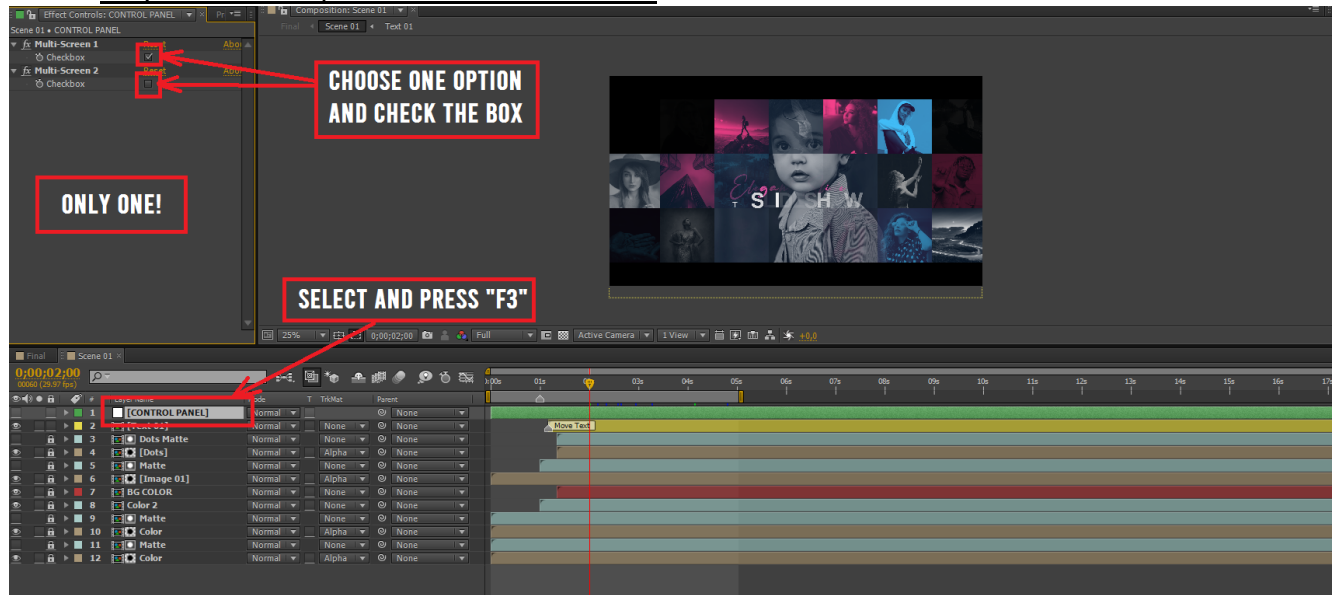

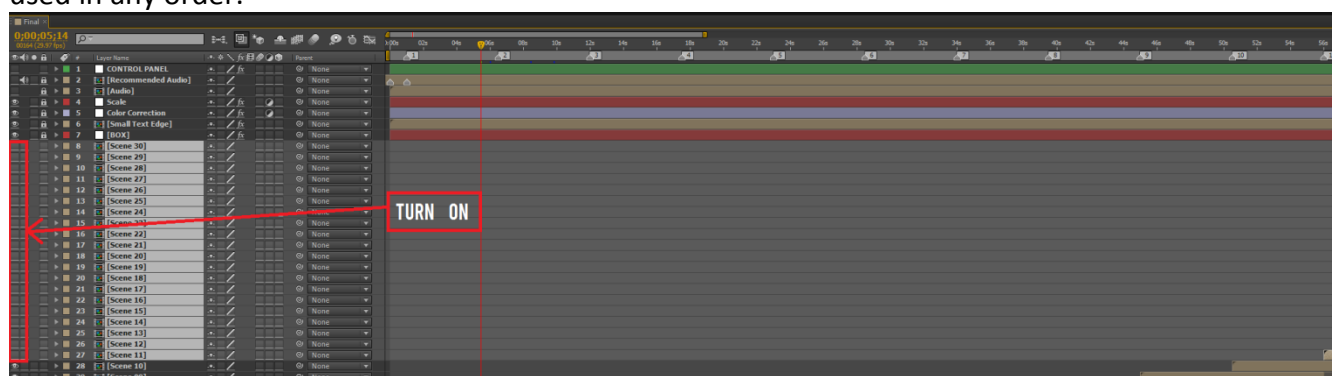

DURATION:

Change the duration of the project: Find the folder in the project panel called **"06 Render"**. Double click on the composition **"Final"**. Simply move the **"Scene ..."** layers.

Then you need to increase the visible length of the previous composition.

The project includes **30 scenes**, if you need to use them all, then just turn them on. Scenes can be used in any order.

CONTROL PANEL:

In the composition of **"Final"**, there is a **"CONTROL PANEL"**. Open composition **"Final"**, select the green layer **"CONTROL PANEL"**, press **"F3"** on the keyboard. Adjust the look of the project, the transitions color, and the flashing intensity of the mosaic, and other.
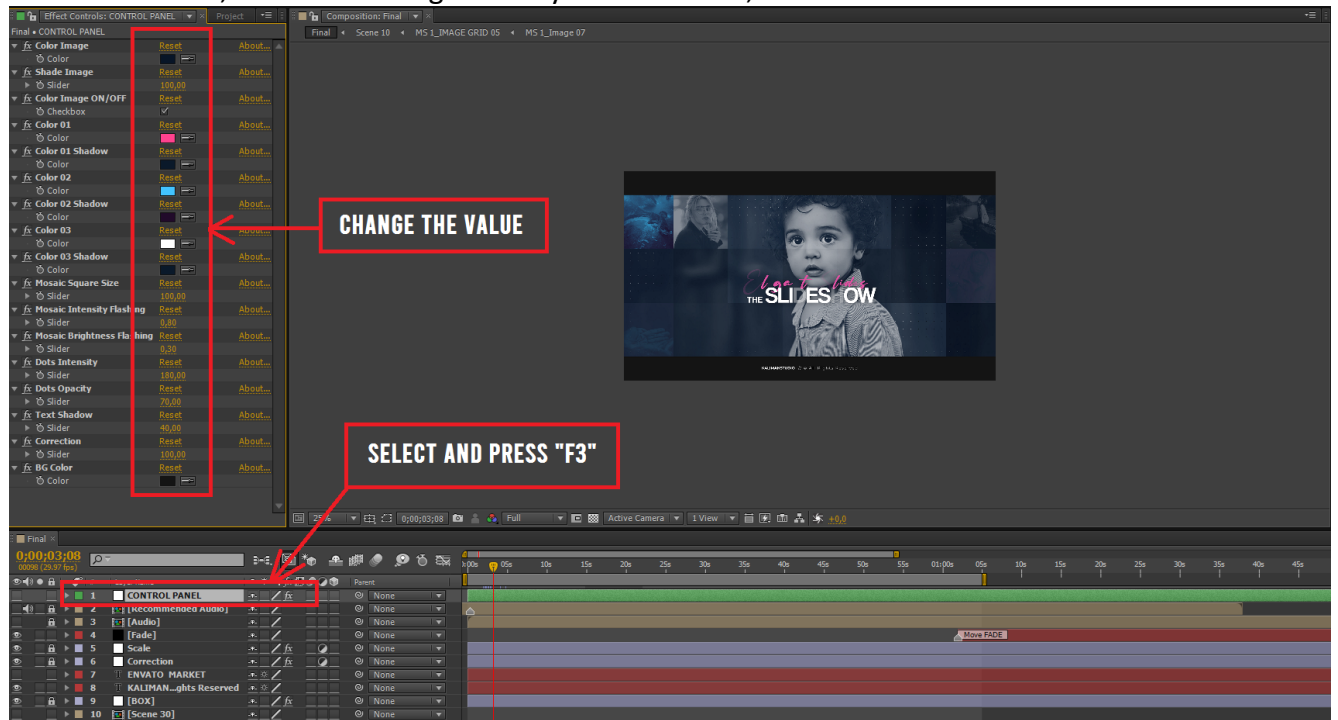

RENDER:

Open the folder in the project panel called **"06 Render"**. After, open the composition **"Final"**.
