

# Hello!

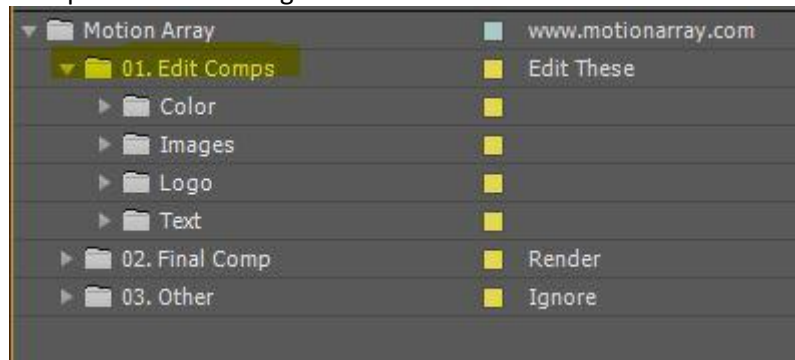

1. Open project file with After Effects CS5.5 or above.

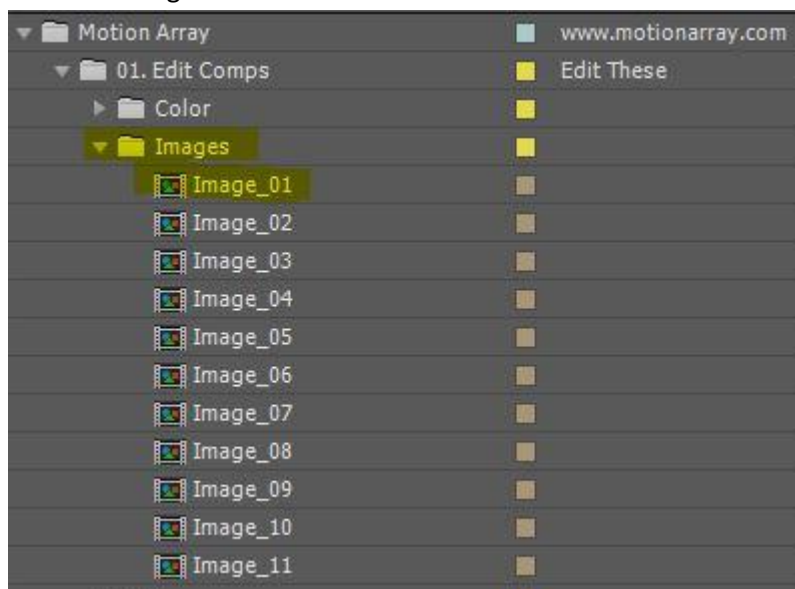

2. Right click on empty space and import your media files ( photo, audio, image or video files).

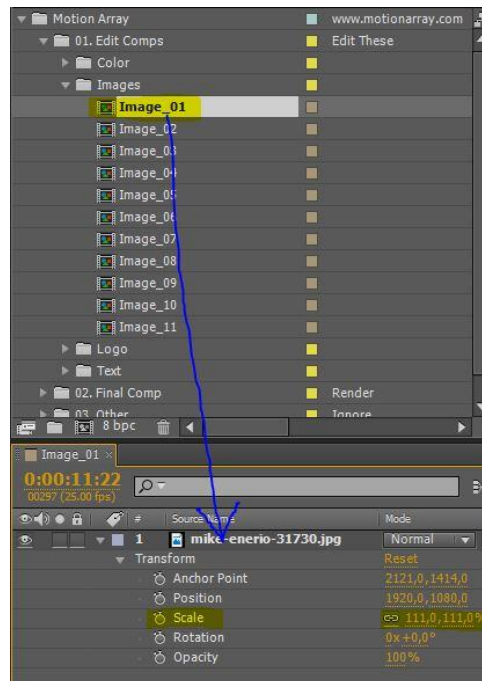

3. Open “01. Edit Comps” folder to change Text and Media

4. Open Images Folder to change it.

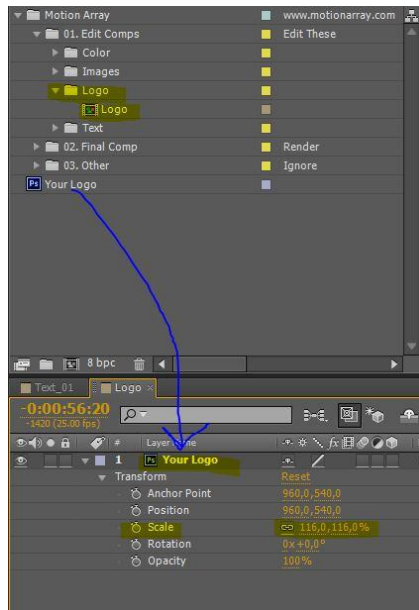

5. Double click any “Image” composition to open it. Drop your image or video file on timeline and scale it to comp size if needed. Do the same with others “Image” compositions.

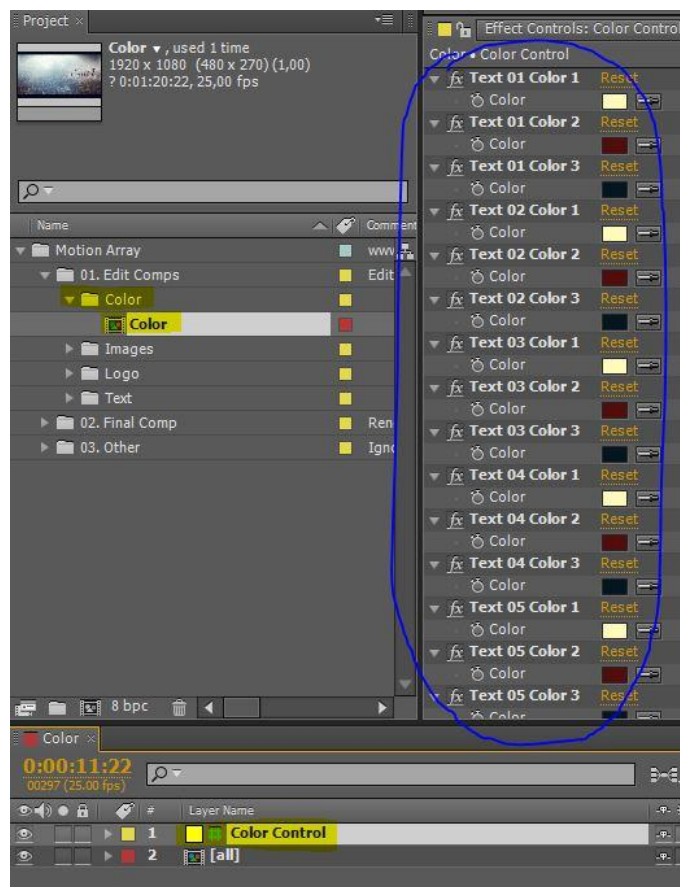

6. Open Text folder to change text. Double click any “Text” composition to open it. Double click text layer on timeline and enter your text. Do the same with other text compositions.

7. Open “Logo” folder, double click logo composition and drop your logo on timeline, scale it to comp size.

8. Open Color Folder, double click Color composition, choose color layer on timeline and change colors.

9. Choose "Final Comp" Folder, double click "Final Comp" composition and render it for final result.
