

# Clean Modern Presentation

## Customization:

Before opening this project, please download the free font:

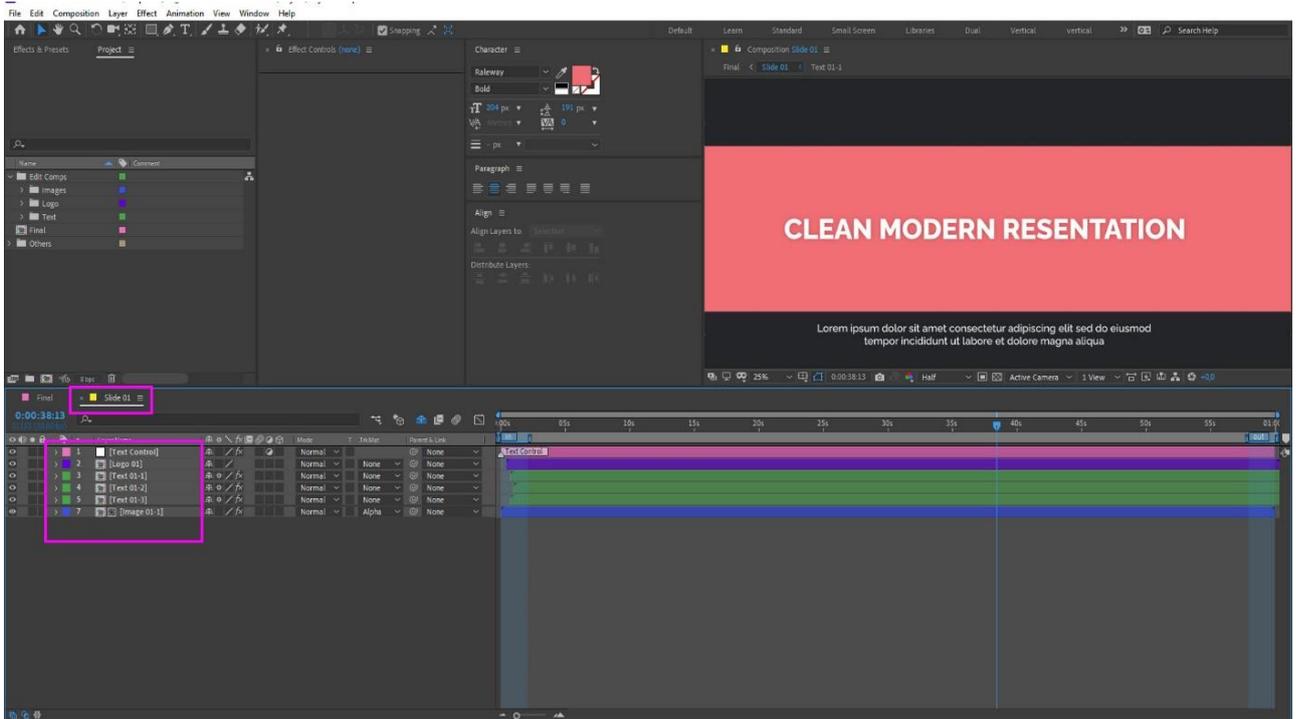

<https://www.fontsquirrel.com/fonts/raleway>

## 1. Project Overview:

- The **FINAL** is a final composition for rendering;
- The **EDIT COMPS** folder includes all compositions for editing;
- Ignore the **OTHERS** folder.

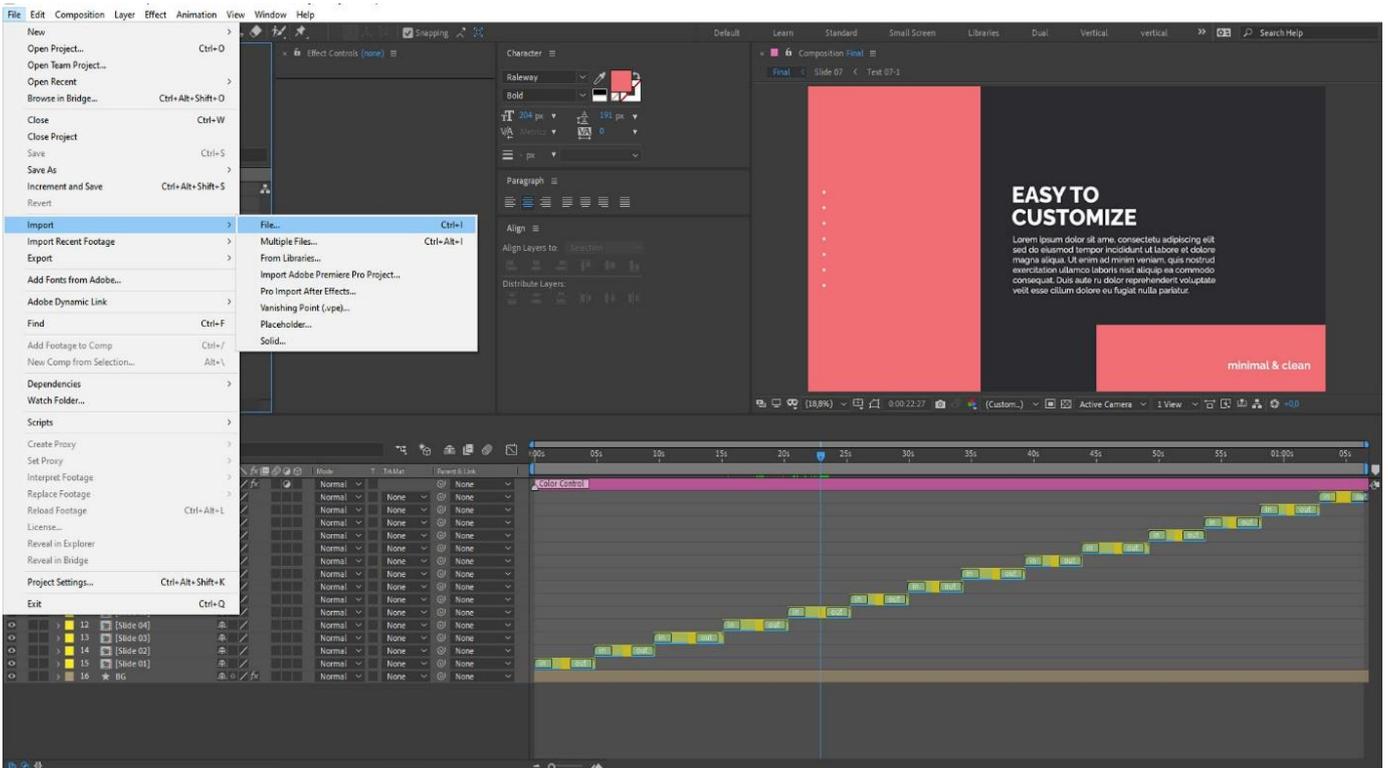

## 2. Slide overview:

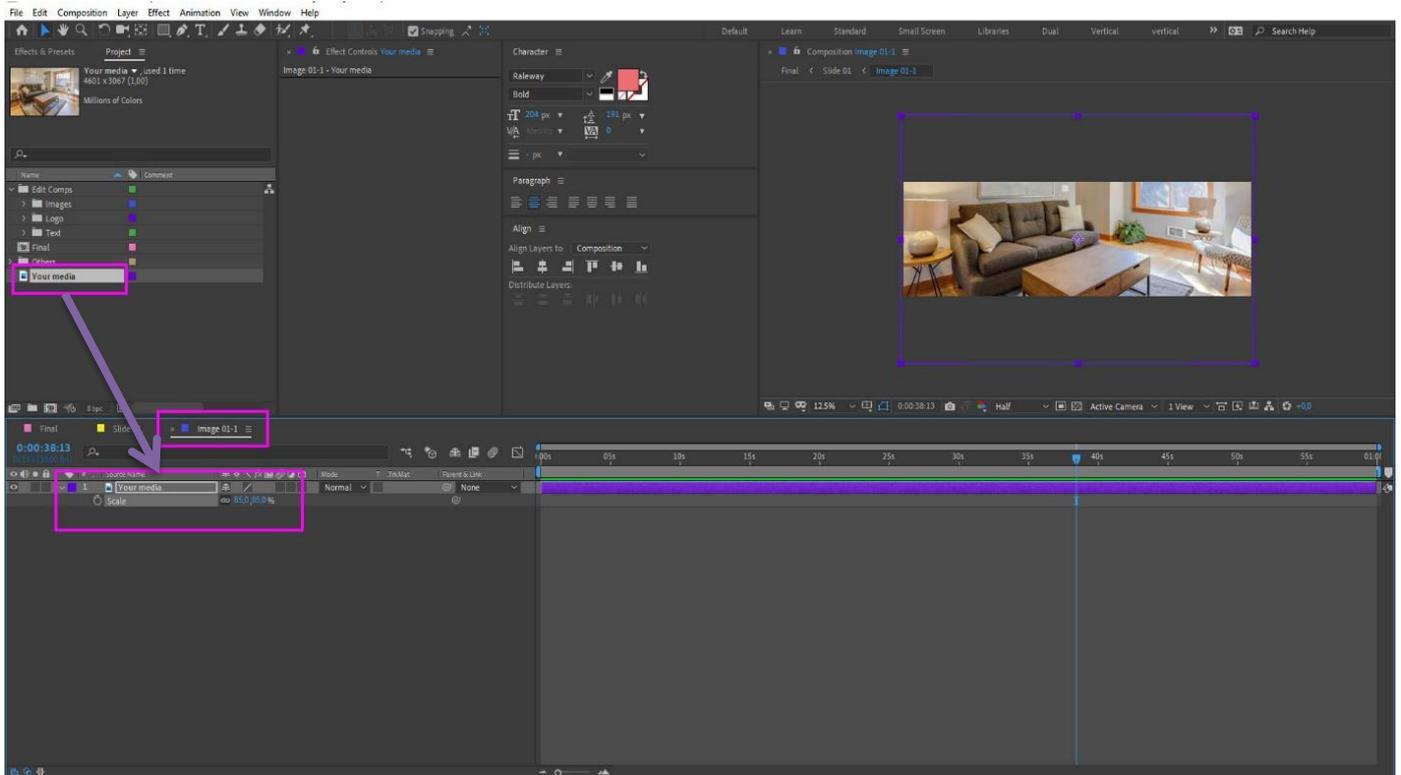

Each slide contains several text and media placeholders and a text controller.

## 3. Edit Images:

Import all the media you want to use in the project. This project works only with photo/images.

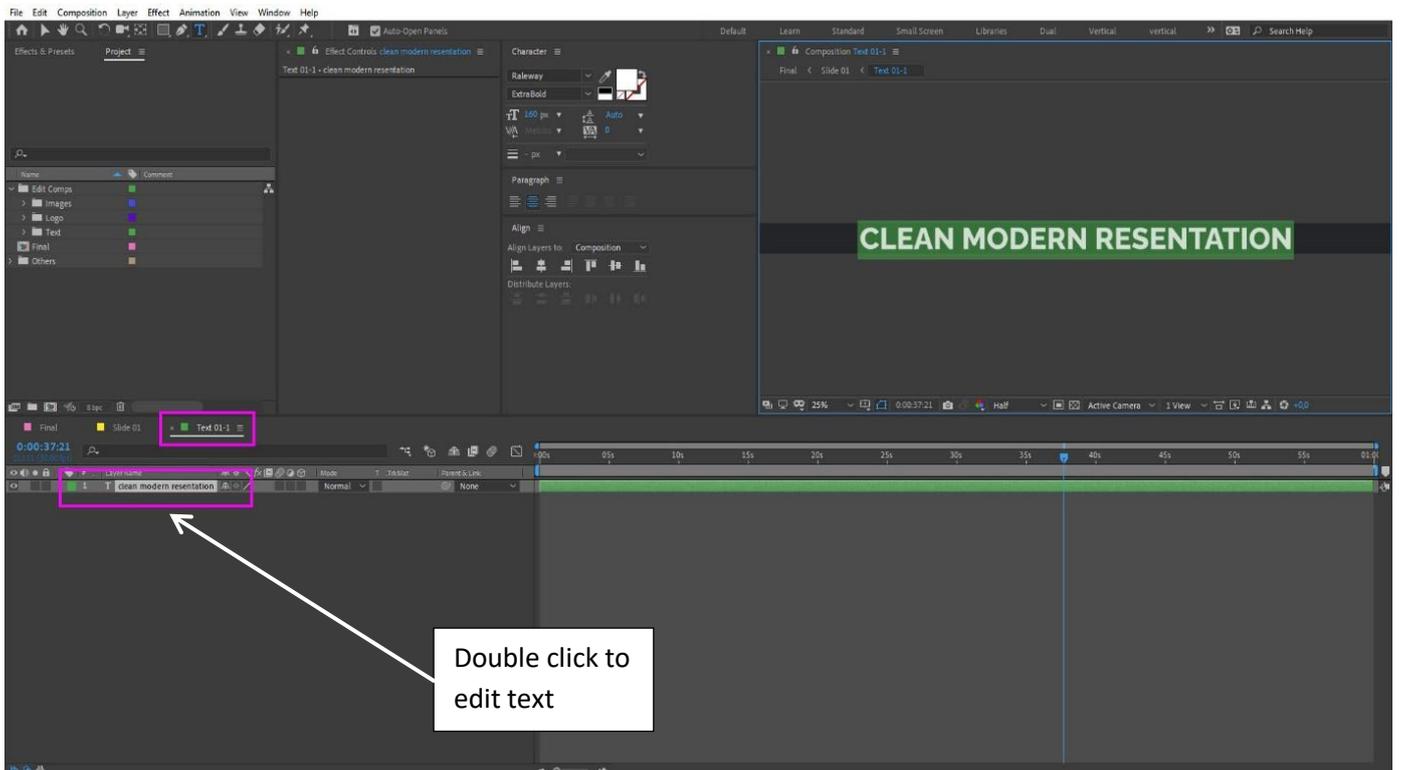

Open the Image Placeholder, drag and drop your media file on the timeline. Resize your media according to the composition size (click “S” key).

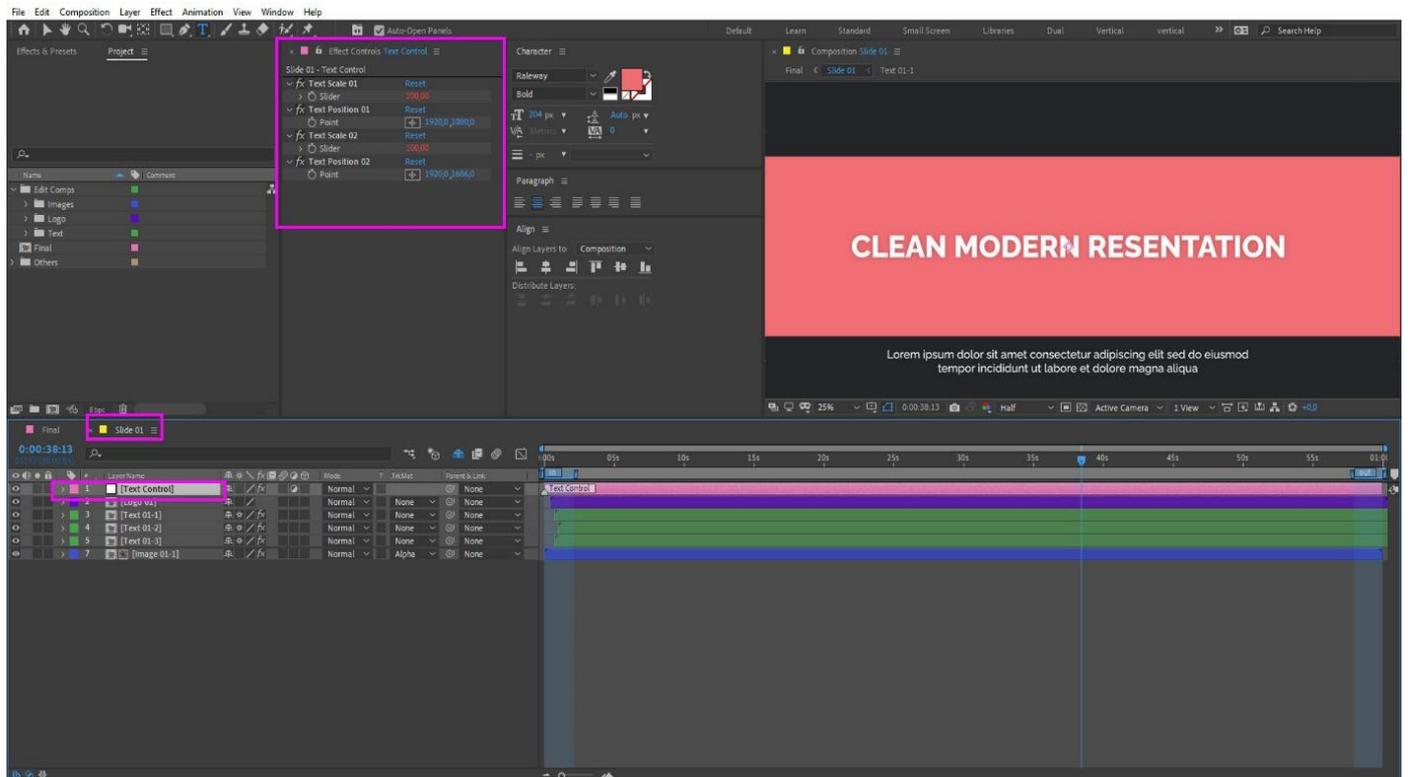

#### 4. Edit Text:

Open up the **Text** composition, double click on it to say whatever you want.

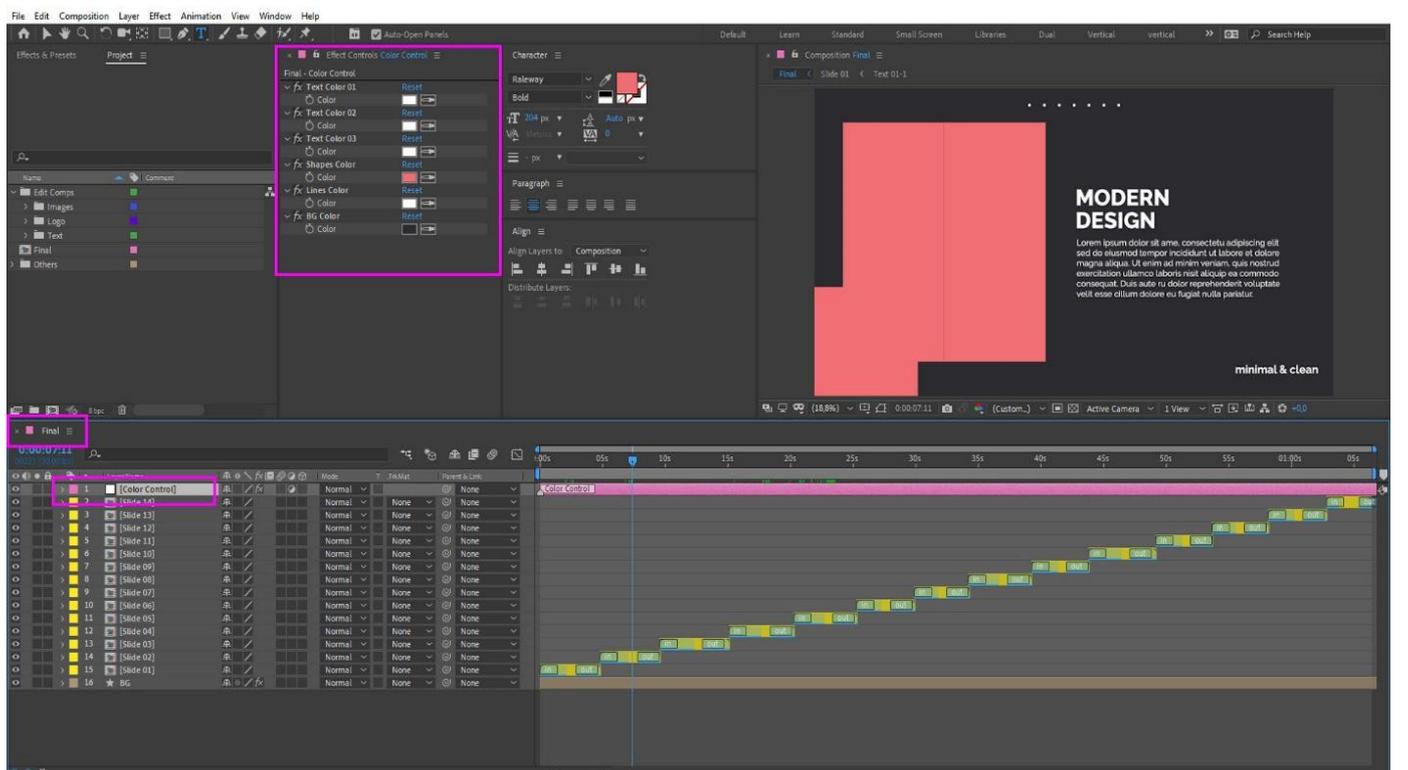

Repeat with each text composition of the project. Align the text if it necessary.

Using the text controller, you can change scale and position of the text.

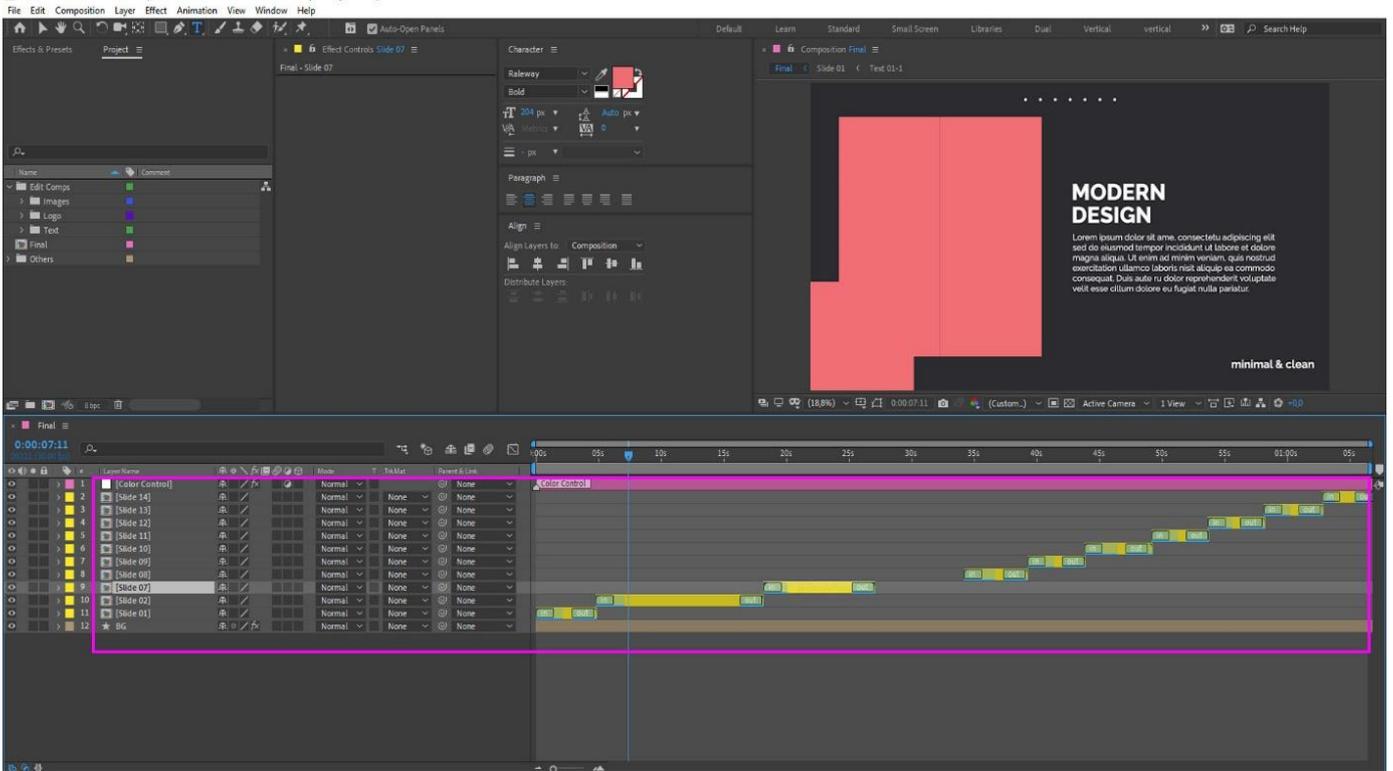

## 5. Color Controller:

Using the **Color Control Layer** (in the **FINAL** composition) you can change colors of the project.

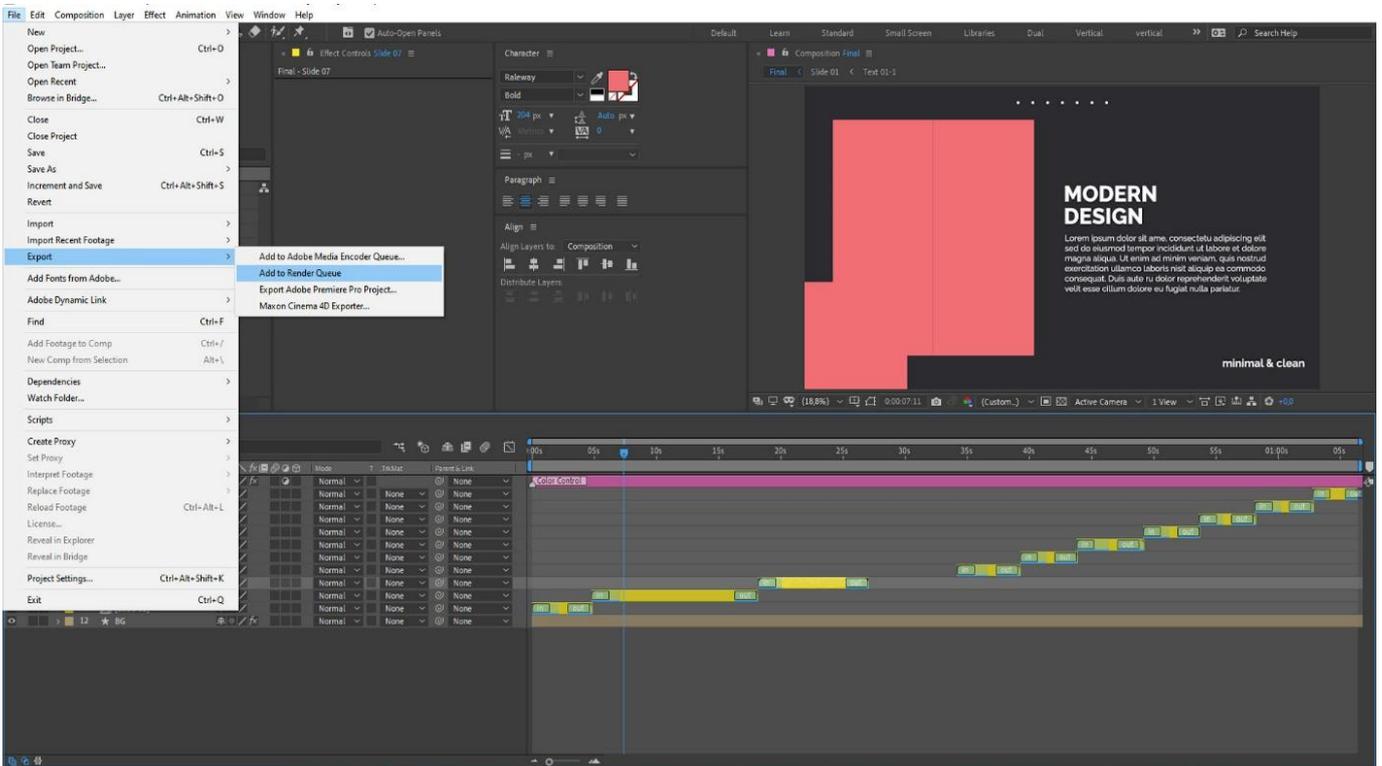

## 6. Modular Structure:

The project has modular structure so you can remove unnecessary slides, change the duration.

After all the necessary changes, your project is ready for export.

Well, that is it. I hope you enjoy this template.
