

Hello! Thanks for buying this template! It's really easy to customize.

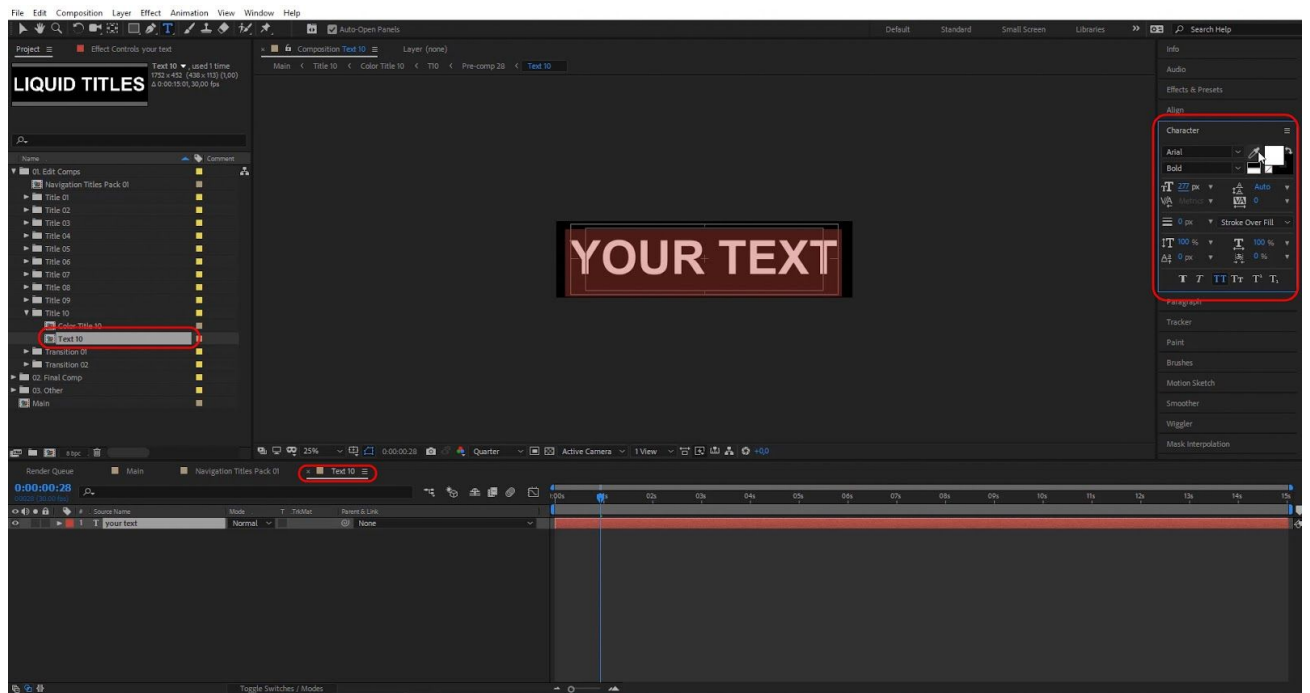

## 1. Open “Navigation” composition and choose the title

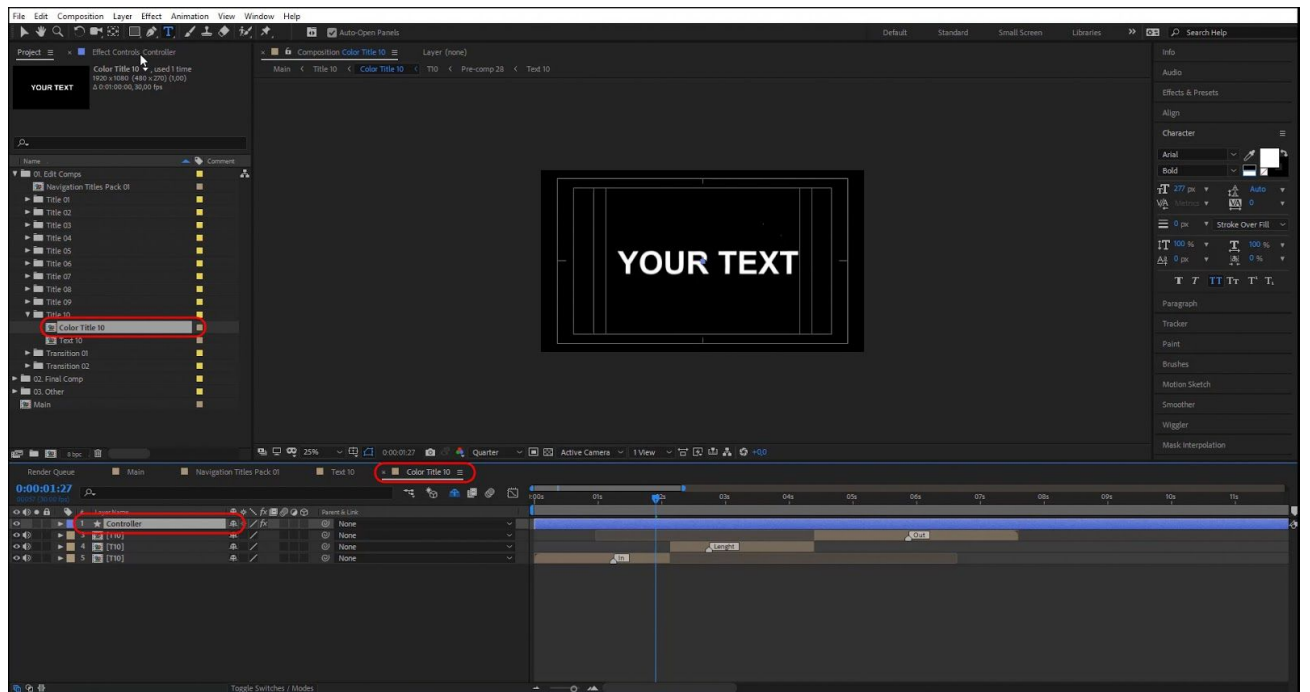

## 2. Copy title (Ctrl+C) and paste (Ctrl+V) into your work composition

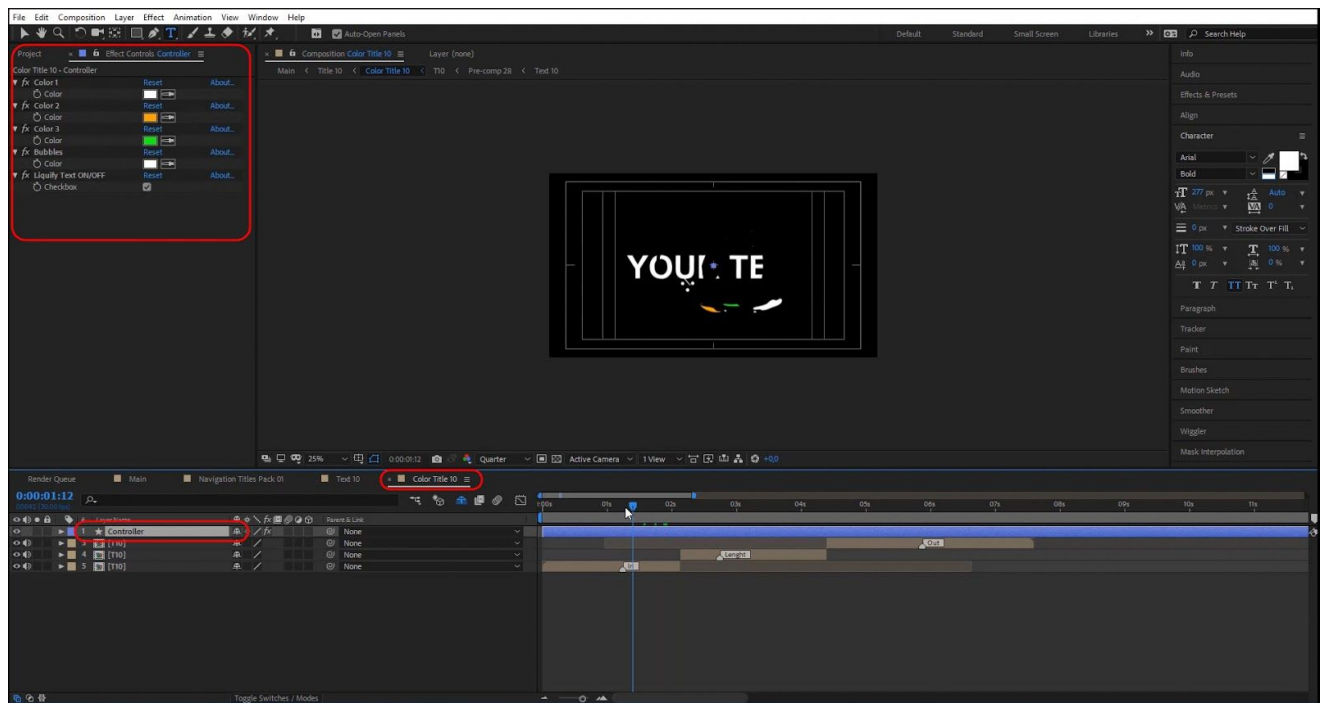

- Open "Text" composition and change the text. Adjust font, size and other parameters in the "Character" panel

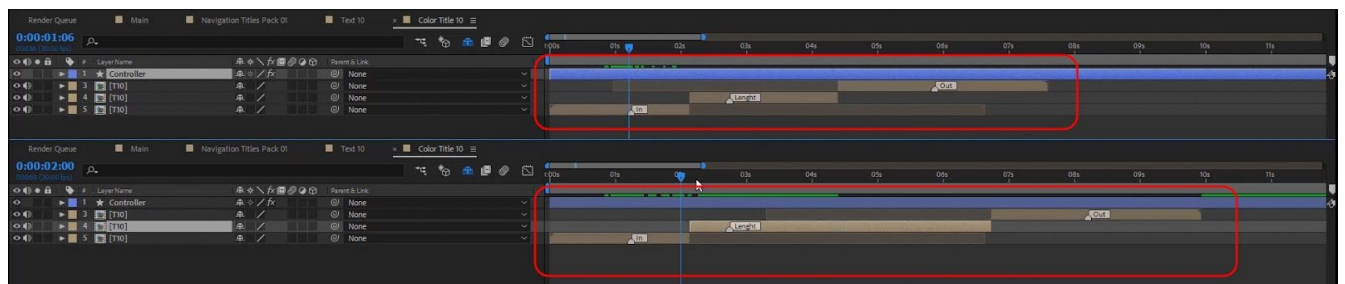

- Open "Color" composition and choose "Controller" layer.

5. Adjust colors and other parameters into "Effect controls" panel

6. To adjust the length of the title, change the length of the "Lenght" layer

That's all.

Hope you like it and again - thanks for buying. Please do not forget to rate if you like!

Regards
