## 1. Project Structure

- **Edit Here** folder contain some folder.

1. Photo Holder folder

- 0. Photo Holder Start
- 1. Photo Holder 1 - 50
- 2. Photo Holder 51 - 114
- 3. Photo Holder 115 - 175
- 4. Photo Holder End

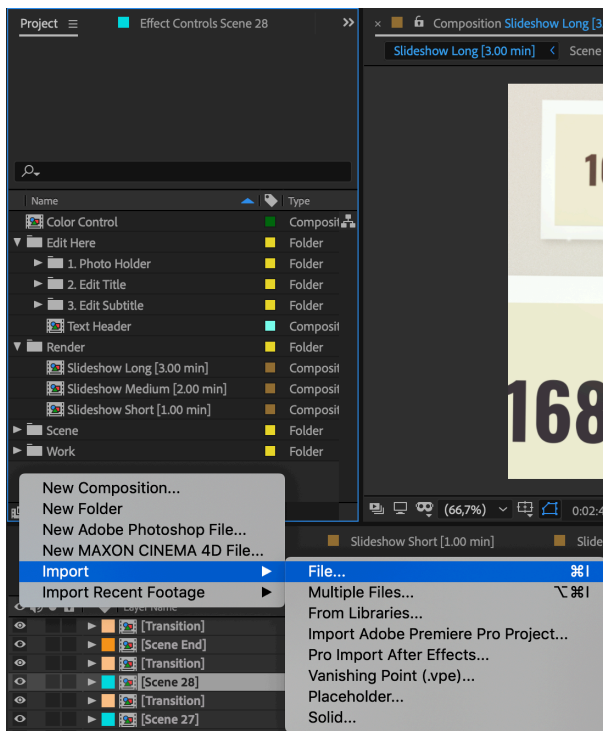

2. Edit Title folder

3. Edit Subtitle folder

- **Render** folder contain 3 Composition of Main Project, render in this comp.

- Forget about Scene and Work folder.

## 2. Importing Files

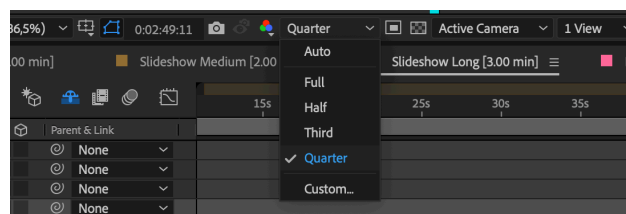

To import files, **“Right Click”** on blank space on Project panel. Then choose your **Photo/Video**.

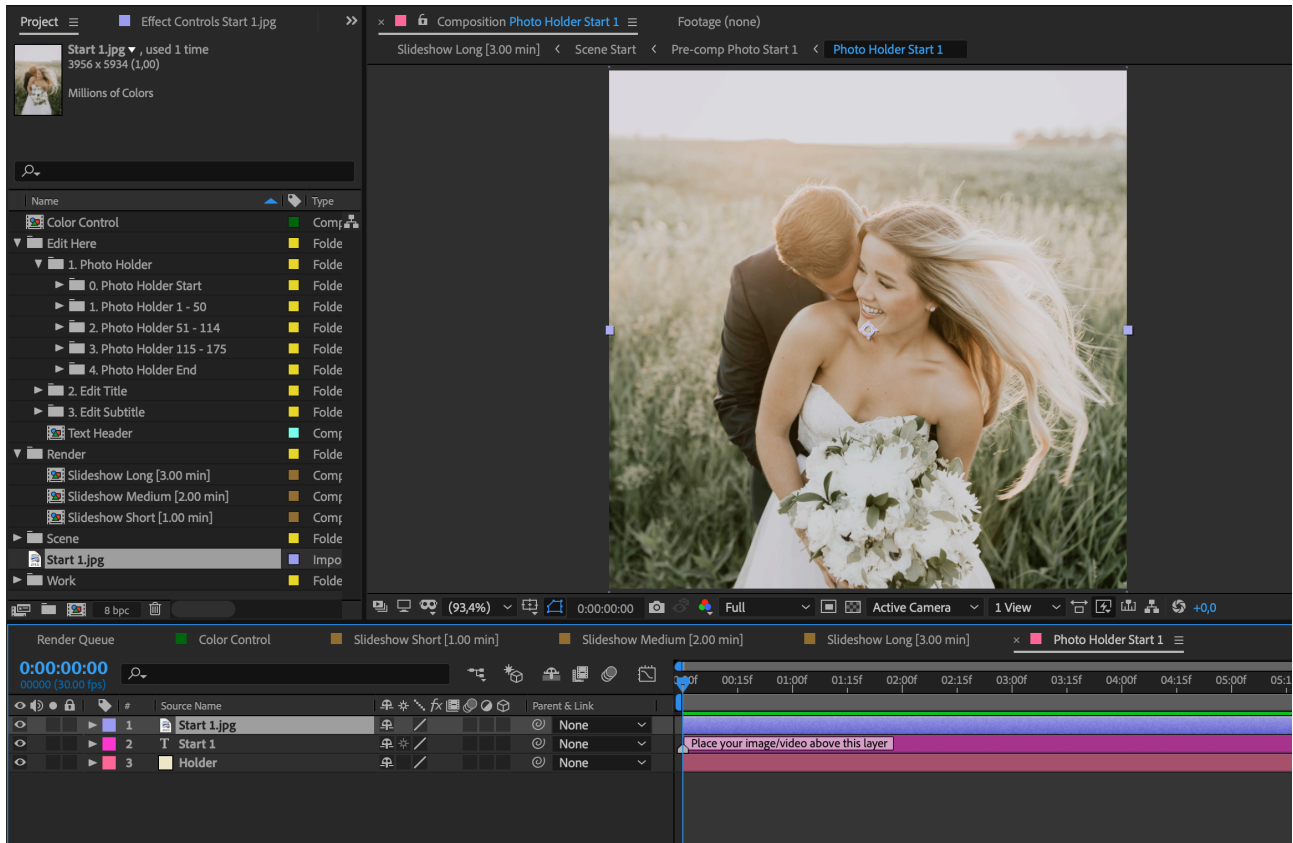

**Tips :**

If you want to make render your project faster ( and your work feels light) adjust your photo/ video to 1000x1000 px with 72 pixel/inch).

Switch Preview to Quarter when edit project.

### 3. Add Photo/ Video to Timeline

- Open **1. Photo Holder** folder and open composition inside that, then **drag and drop** your photo/ video to timeline.
- Adjust **Scale** and **Position**
- **Repeat** the process until the last **Photo Holder**.

#### Tips :

- If you use the **Short Version** of the project, you just need to Add Photo/Video on 1. Photo Holder 1 - 50 folder and Photo Holder Start & End folder.
- On **Medium Version** you need to Add Photo/ Video on 1. Photo Holder 1 - 50. 2. Photo Holder 51 - 114 folder and Photo Holder Start & End folder.
- When you use **Long Version** you need to Add Photo/ Video on all photo holder.

### 4. Edit Title Text

- **Title Holder Start** composition on Text Holder folder to edit Title Text.
- **Title Holder End** composition to edit End Title.
- **Title Holder 1 - 14** to edit title scene.

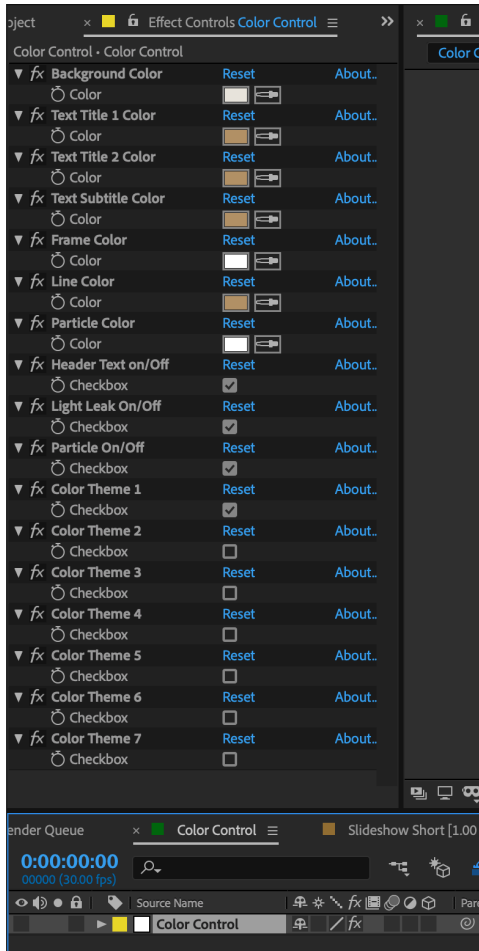

#### Title :

- **Short Version** Text Holder 1 - Text Holder 4
- **Medium Version** Text Holder 1 - Text Holder 9
- **Long Version** Text Holder 1 - Text Holder 14

## 5. Edit Subtitle & Header Text

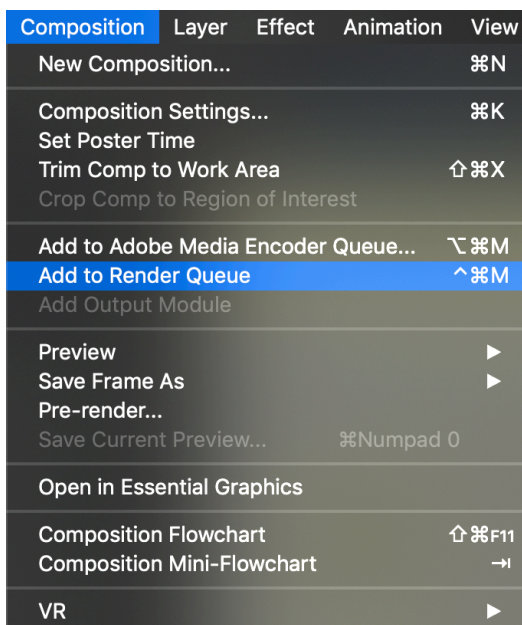

- Text Header is just one holder. Edit it and all photo header change.
- Subtitle 1 - 17 (Short Version), Subtitle 1 - 35 (Medium Version), Subtitle 1 - 57 (Long Version)

## 6. Color Control & Others

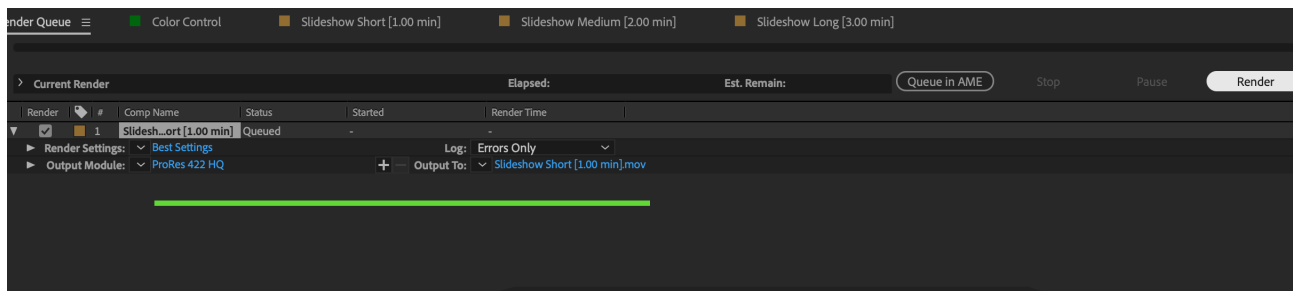

Here Color Control composition. You can edit color, enable disable effects and choose theme.

## 7. Rendering

Choose **Render Composition** then Choose menu **Composition —> Add to Render Queue**.

Set Output setting on **Output Module:** and set file location on **Output To :**
