

# Youtube Subscribe Pack - After Effects CC 2018 Project

6 unique categories of buttons styles  
more than 60 elements in package  
“In” and “Out” animation for buttons  
Easy and Detailed customization  
4K 3840 x 2160, 25 fps  
No Plug Ins required  
No music/video/photo included

Youtube pack contain 6 After Effects projects with different styles of buttons. All projects have same structure, so you need no spend time to learn how it works.

In main compositions you can set titles duration: for that just set points of IN animation and OUT animation. Just move markers left-right to change duration of title.

Btw you can copy this layer in your work composition and set duration here, markers will be work anyway.

In [**Settings/Text**] compositions you can change text and adjust titles like you want.

You can select type of cursor or turn it off.

Select **Settings** layer and go to Effects controls of it to see all available adjustments

In **Settings** Layers you can adjust some parameters – colors, size of elements etc.

Render it with alpha channel or import you video in project and place composition with title above it.
