

Photo Memories And Moments Slideshow

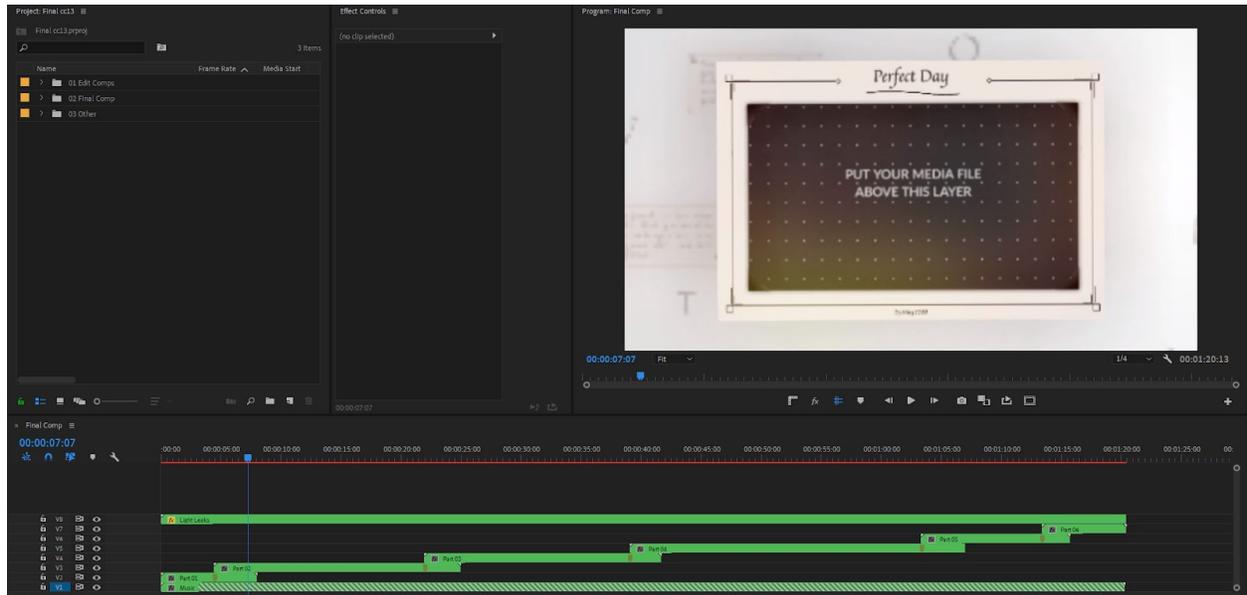

Thank you for purchasing this template, hope it will help you on your professional journey.

Features:

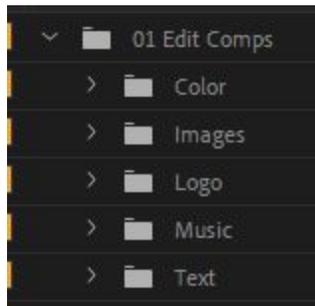

- **Modular Structure** – You can build your own version of the slideshow.
- **PDF Help Included** – There you will find answers on how to use this template.
- **Multi Purpose**
- **Full HD 1920x1080**
- **Premiere Pro 2019 and above**
- **No Plugins Required**

How to use it:

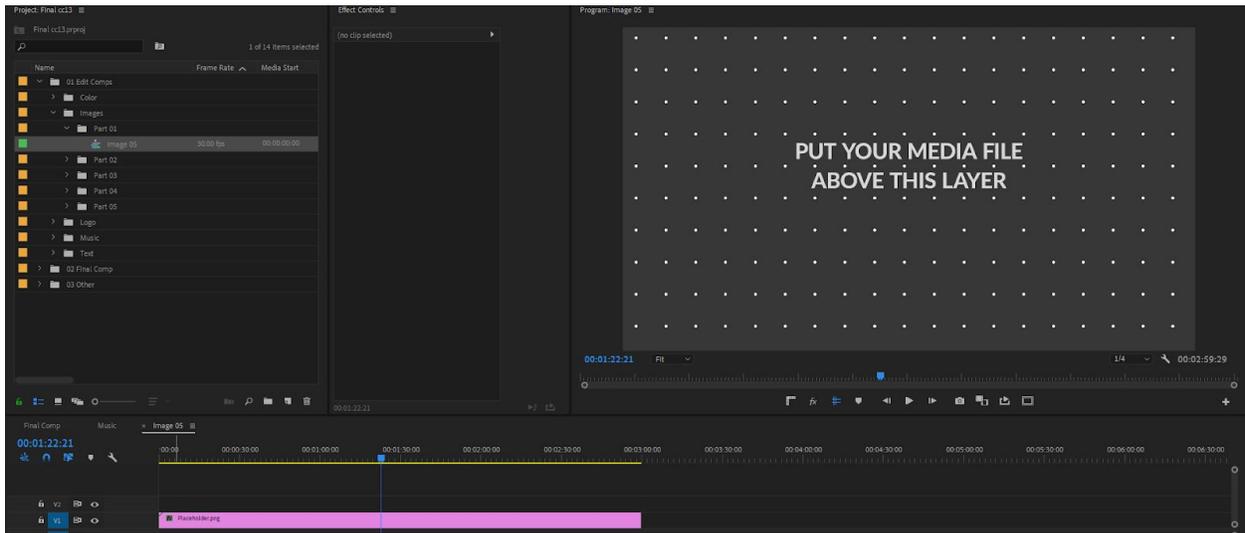

In opened project you will see Final Comp composition. This is the main composition, where you can move scenes or remove them:

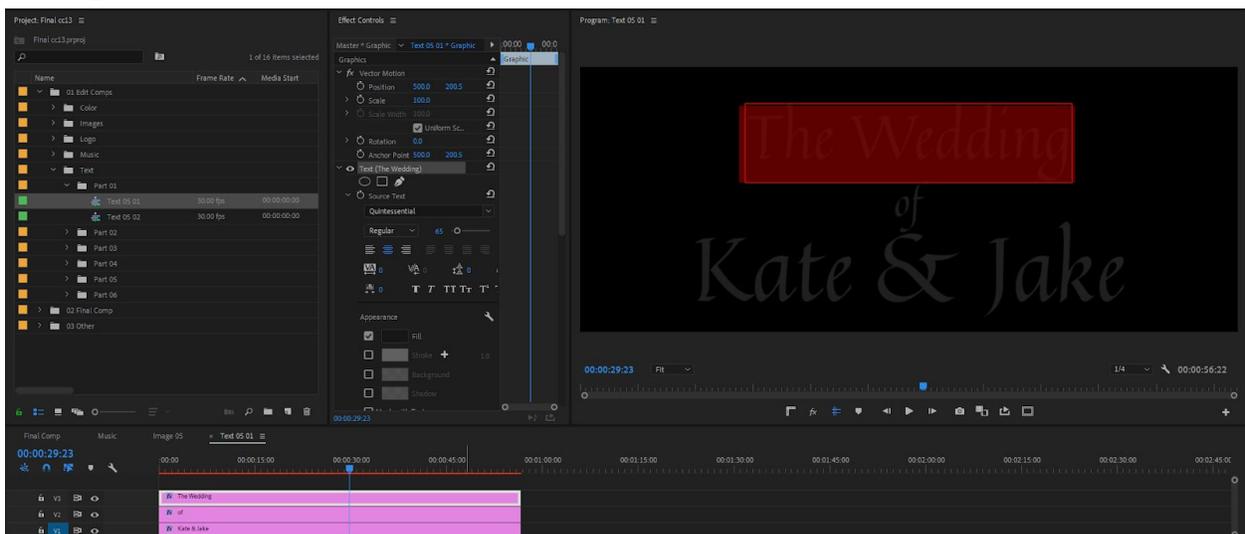

All editing happens in *01 Edit Placeholders* folder. There you will see Media and Text placeholders:

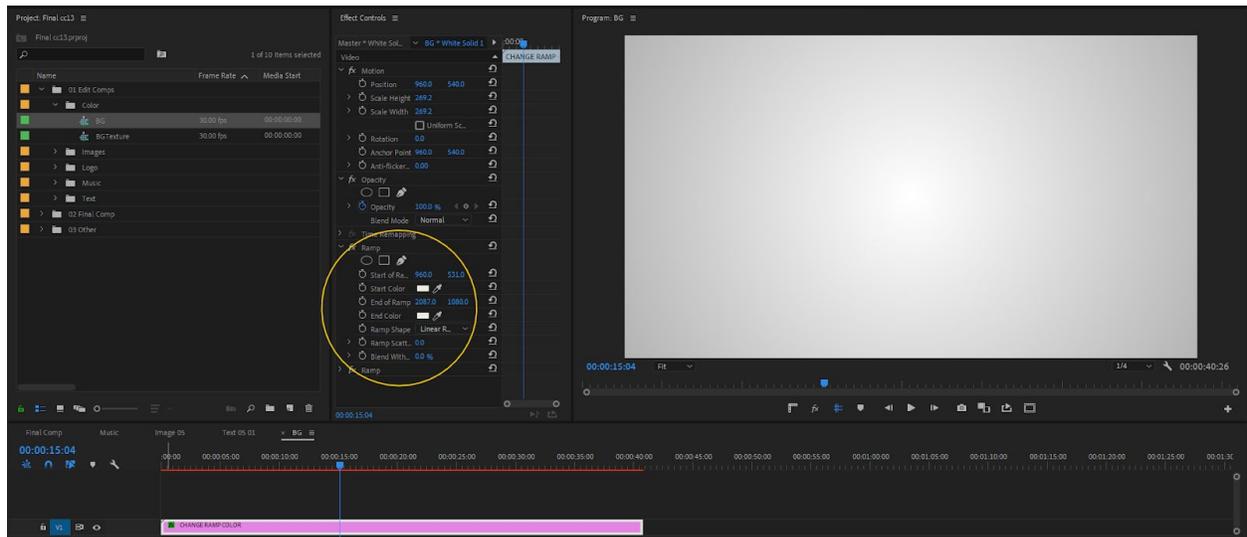

If you need to add images in Part 01, open **Images -> Part 01-> Image 05**. There you will see compositions that you need to open. In Media placeholders you can just drag and drop your images above the placeholder file.

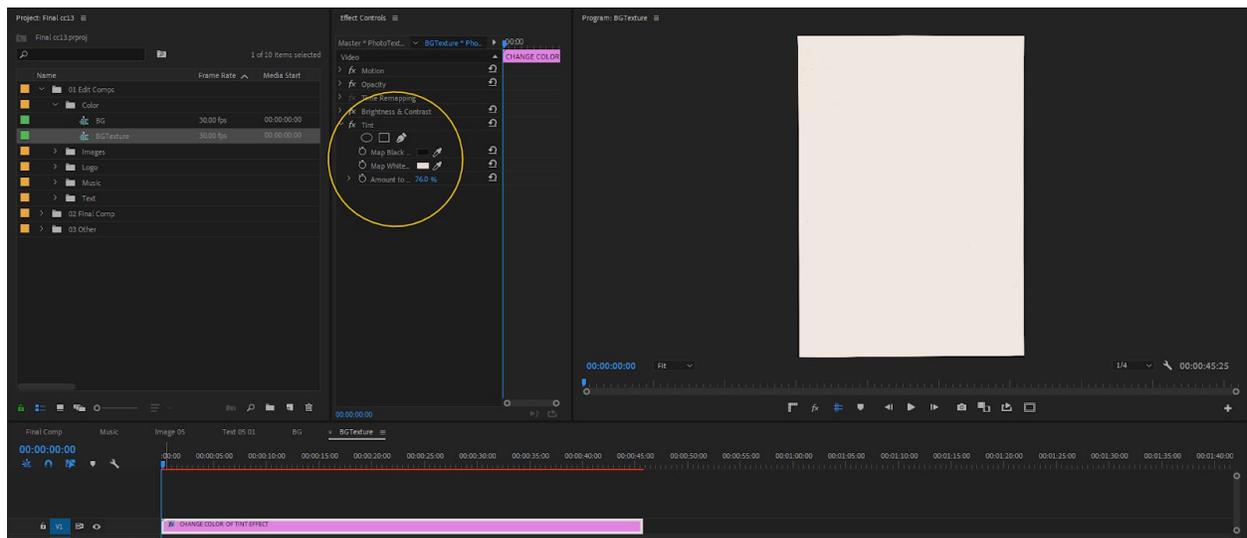

Change text in **Text -> Part 01-> Text 05 01**. In Text placeholders just change text by clicking on the text.

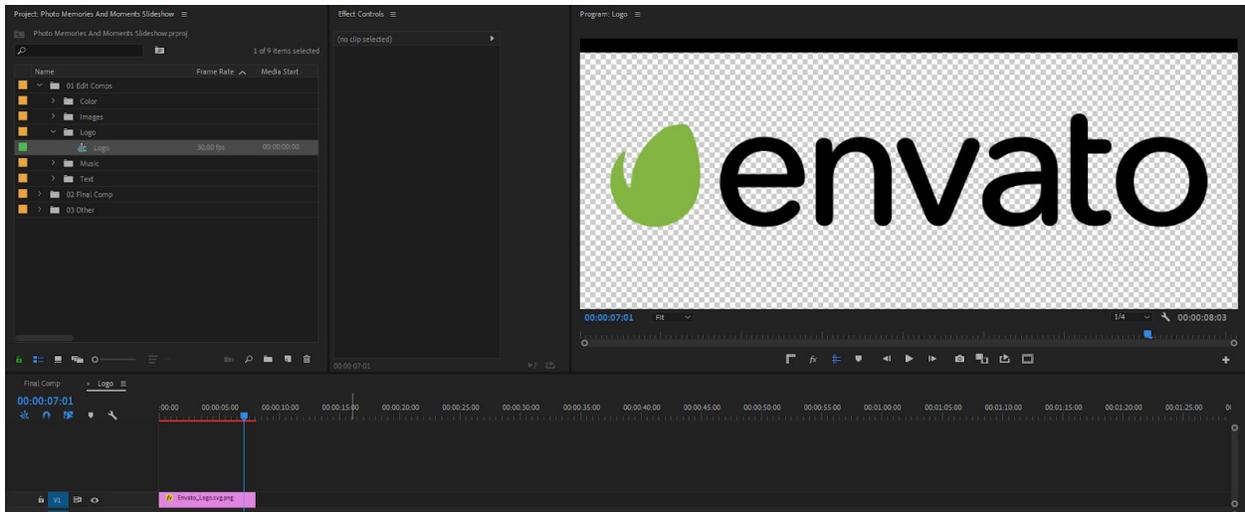

Change BG color in **Color -> BG -> Select layer and change colors in the first Ramp effect.**

Change paper color in **Color -> BGTexture -> Select layer and change colors in the Tint effect.**

Add logo in **Logo** -> **Logo** -> Remove **Logo Placeholder** and drag & drop your logo here.

Add music in Music sequence

Change the opacity of Light Leaks or just remove it from the Final Comp sequence if you do not need it.

Once done with all scenes, open **Final Comp** composition and hit render.

Enjoy!
