Hello. Thank you for your purchase.

For having Transitions in Final Cut Pro:
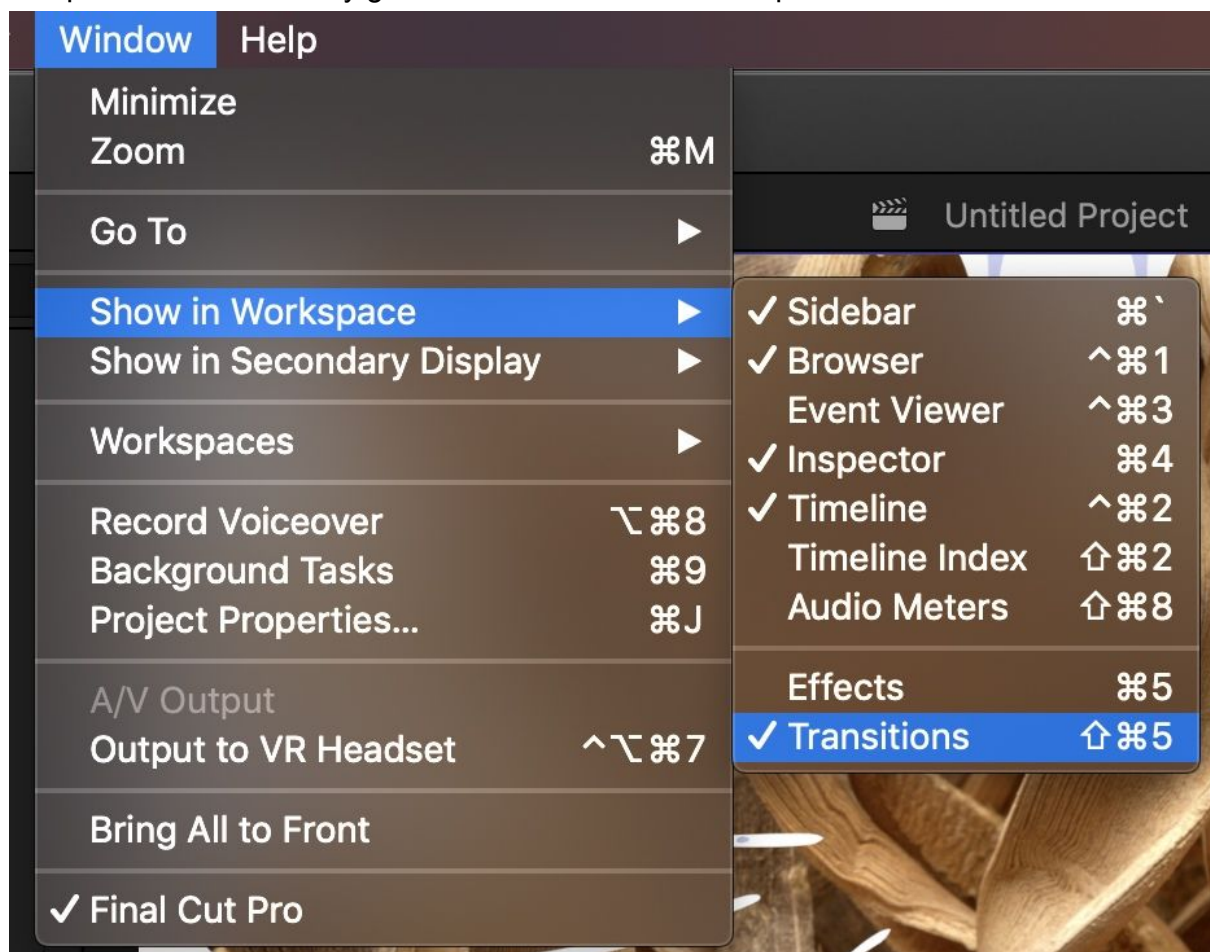

1 If you have Apple Motion instaled on your Mac, copy Transitions Folder to: /Movies/Motion Templates/Transitions.

2 If you do not have Apple Motion instaled on your Mac, copy Transitions Folder to: Aplications/Final Cut Pro/Contents/Plugins/MediaProviders/MotionEffects.fcp/Contents/Resourses/Templates/ Transitions
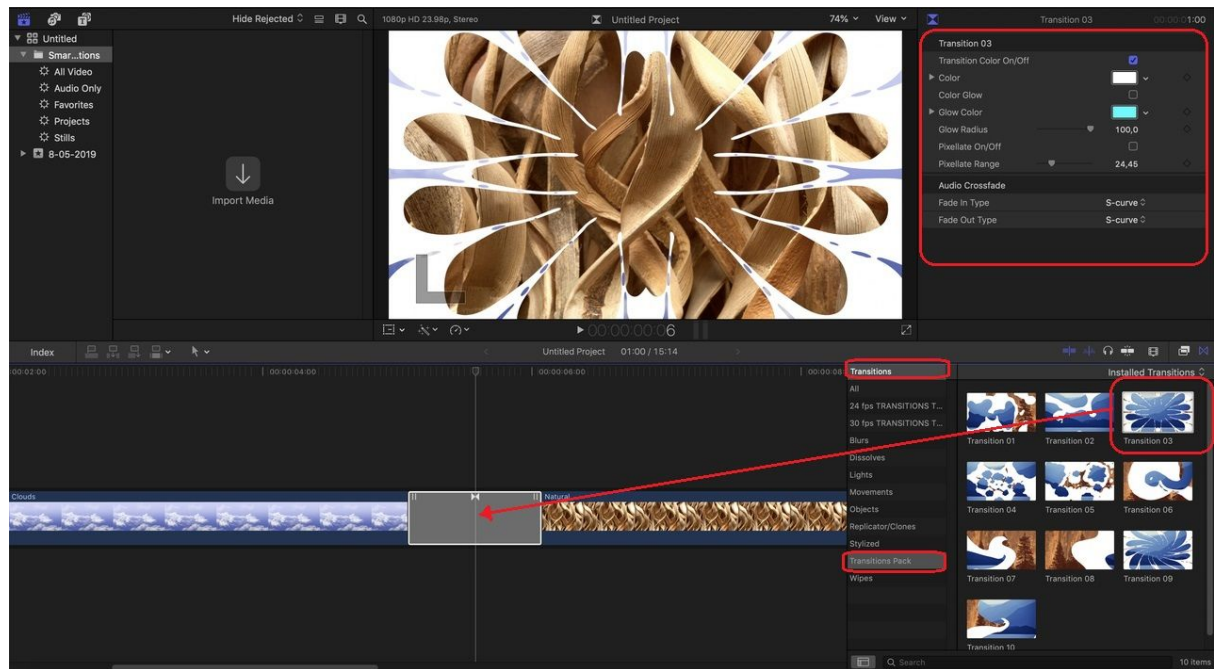

Relunch the Final Cut Pro to see the Transitions.

The folder with Transitions will appear in the transitions library.

To open transitions library go to Window>Show in Workspace>Transitions

To add and edit transitions, drag and drop it from Transitions library to timeline between your clips and adjust "Published Parameters".

You can switch on/off and adjust color transition between your layers. You can change the color and add glow and pixellate effects for transition.

That's all,

Best regards
