Now open the "Essential Graphics" window by choosing
Window/Essential Graphics.

In the Essential Graphics Window choose your Pop Up fron the
Master Drop-Down Menu.

Now you can see all the edit ableall parameters available.
Make your custom changes.
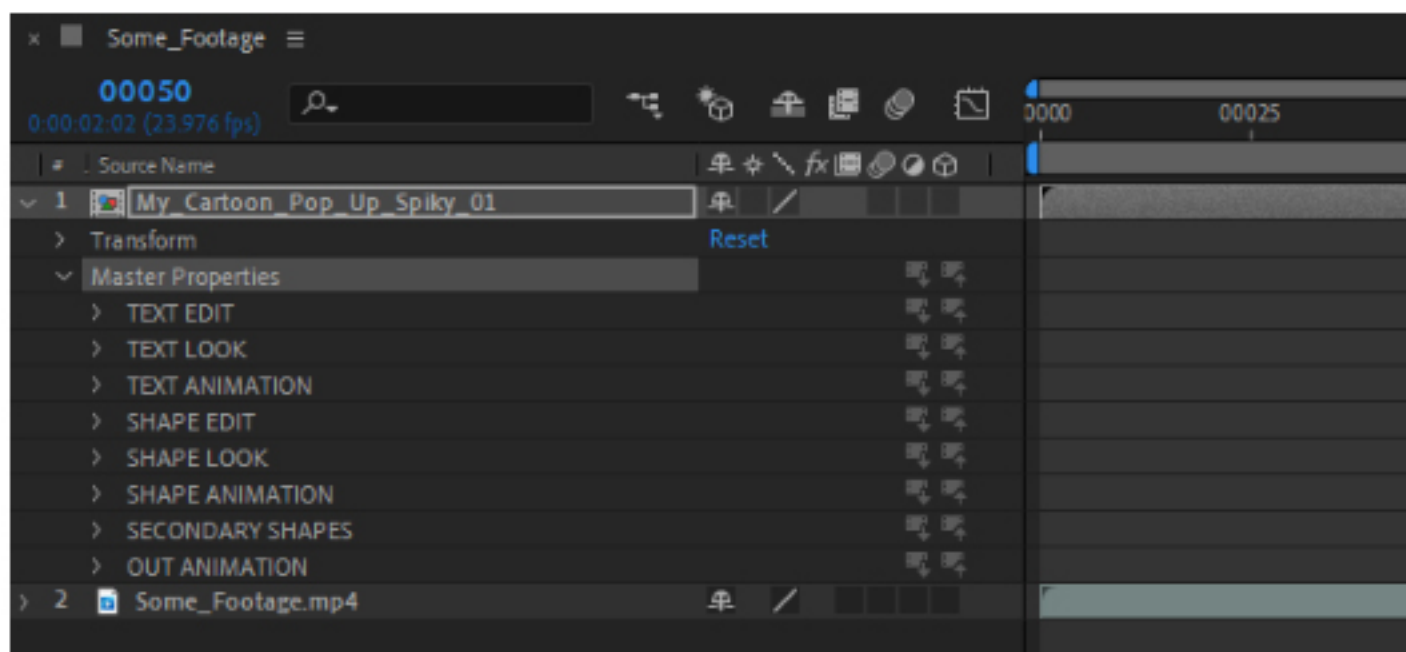

5. SOME MORE TIPS !

IMPORTANT: When you want to edit the size, position or rotation of
the Pop-Ups you need to do this in the Timeline window.

IMPORTANT: When you work with Essential Graphics, you should always make a copy of
a Pop-Up comp and remame it before editing. (As shown in this help file).
So you can make as many variations you like, without destroying the original file.

IMPORTANT: As an alternative to the Essential Graphics Window, you can also work
with the Master Properties in the Timeline window.
You don´t need to make a copy of the Pop-Up. You can drag a Pop-Up into any composition
without changing the original
