# How To Use Tutorial

1. How To Change Position/Scale

* To change the position of the whole title file, open **Video Inspector** and in the **Transform** section adjust the **Position and Scale sliders.**

* To change the position of individual text lines simply click on the text in the preview window and move it around.

* To change the position and scale of only one of the graphic elements, open **Title Inspector** and adjust the **Graphics X Scale** and **Graphics X Position** controllers.
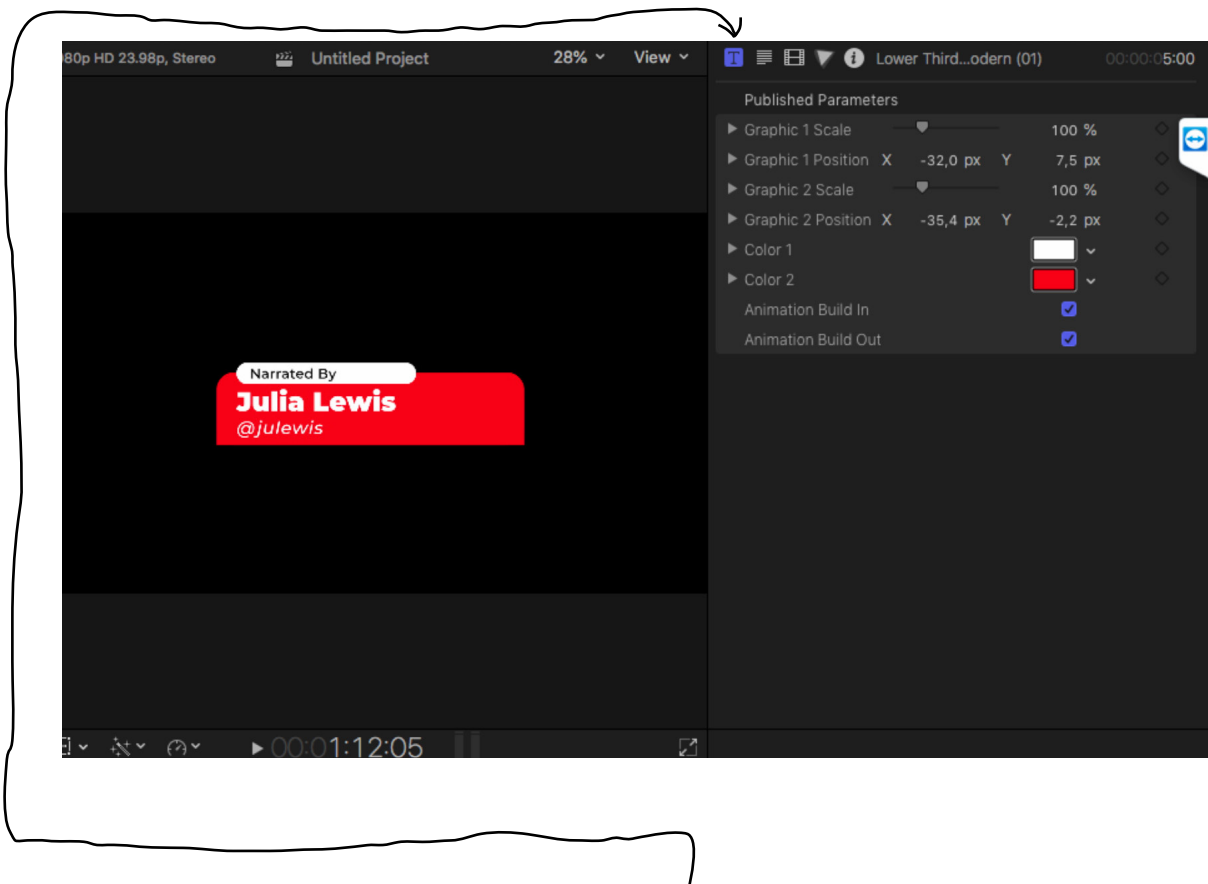

2. How To Customize Text

* To change the text, simply click on the text and type in your words.

* To change the font, spacing, colors and other text options, open the **Text Inspector** and use the below options to customize it.

3. How To Change Colors and More

* To change the graphics colors, open **Title Inspector** and simply click on the **"Color X"** color swatches.

Additionally, if you want the title to only animate in or out, or to just stand still, you can achieve that by un-checking "**Animation Build In**" or/and "**Animation Build Out**" check-boxes.

Thank you for downloading my template! I hope you'll enjoy it :)
