

Designin Corporate Presentation - Premiere

Created: September 2020

By: FMedia <https://videohive.net/user/fmedia>

Thank you for purchasing my file. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thanks so much!

Introduction

This file is very simple, clean and easy to edit with basic knowledge of Premiere software. No plugin is used, it's easy to work on time line.

Using Essential Graphics Panel on Premiere Pro CC 2018 version it's very simple to change the source Text, position, size, color and Slideshow Theme color.

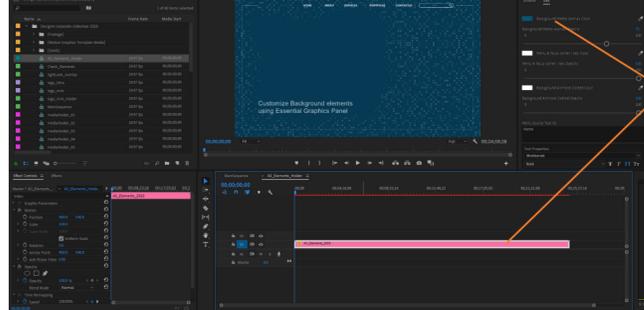

This slide is suitable for corporate presentation, video display, company profile, Motion slideshow, company brand and other company/Business event.

General

All slides are placed inside the **MainSequence** sequence. You can change the slide order by changing the layer order.

The theme color control is placed inside the **All_Elements_Holder** sequence on **All_Elements** clip.

Click over the **All_Elements** clip. You can see the Theme option on the Essential control Panel on Edit section

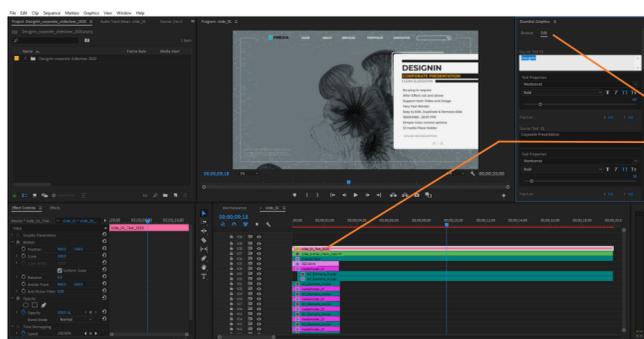

Select the **All_Elements** clip and see the Essential Graphics Panel on the Edit section. You can directly edit the Theme properties.

Edit Text

1. Open Essential Graphics Panel
2. Select the **slide_num_Text** on the **slide_01**

You can directly Edit the Text, color, position, size and source text (see **figure 01**).

Select the **slide_Num_Text** on the **slide_01** sequence that you need to edit on the Essential Graphics Panel. On Essential Graphics on Edit tab you can change and edit the Text.

Change Text Font (ver 2018) and Graphics

In Premiere Pro 2018 version to change the font please follow the below steps:

1. To change the Text Font you need to open the **Edit_fonts_Graphics.aep** file in After Effect software (you can see this file inside the [footage] folder)
2. Double click over the **slide_Num_Text** on Project panel and Edit the Text using the Character Panel
3. After Edit the Text, Select the **slide_num_Text** on the Essential Graphic Panel and Export into Motion Graphic Template. You can directly Edit the Text, color, position, size and source text (see the below images).
4. Import the Export file on the Essential Panel on the Premiere Pro Software on **Premiere_modern_simple_slideshow** file.
5. Directly Drag and Place the Clip on the Essential Panel over the Track.

Note:

To Edit the Animation and Theme Graphics. Edit the **All_Elements** comp on that After effect file and Than Export into a Motion Graphic Template same as changing the font and Import on the Premier Pro Software on the Essential Graphics Panel. Finally Place the **All_Elements** clip on the **All_Elements_Holder** That's all.

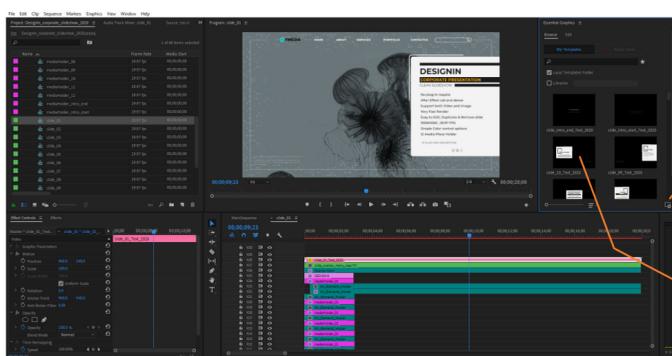

1. Double click over the **slide_Num_Text** to open the comp

2. Edit the Font Text using Character Panel

3. Open the Essential Graphics Panel and Select the **slide_Num_Text** on the Drop down menu

Finally Export the file into the Motion Graphic Template.

1. Click the add button on the Essential Graphics Panel and Import the new Motion Graphics Template file (mogrt)

2. Drag the clip and placed on the Track

Change Video / Image

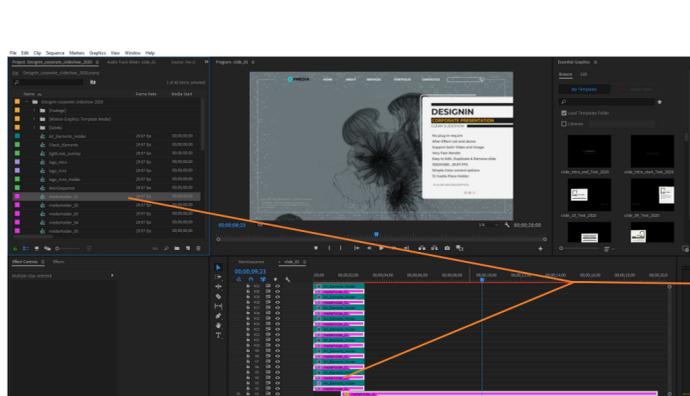

Click over the **mediaHolder_Num** sequence and place the imported media

Duplicate Slide

To duplicate the slide follow the below steps.

1. Duplicate **slide_Num** sequence on the project panel that you want to replicate.
2. Duplicate **mediaHolder_Num** that placed inside the **slide_comp**.
3. Double click over the new duplicate **slide_Num** on the project panel.
4. Replace the **mediaHolder_Num** sequence that placed inside the new duplicate **slide_Num** sequence. (select all **mediaHolder_Num** layers on **slide_Num** comp over and select the new duplicate **mediaHolder_Num** on the project panel + Press alt key and drag it over the **mediaHolder_Num** layer on the **slide_Num** comp)

Select all **mediaHolder** sequence and Alt+Drag the new **mediaHolder** sequence and place over the old **mediaHolder** sequence on the Track
