

Flat Concept - User Manual

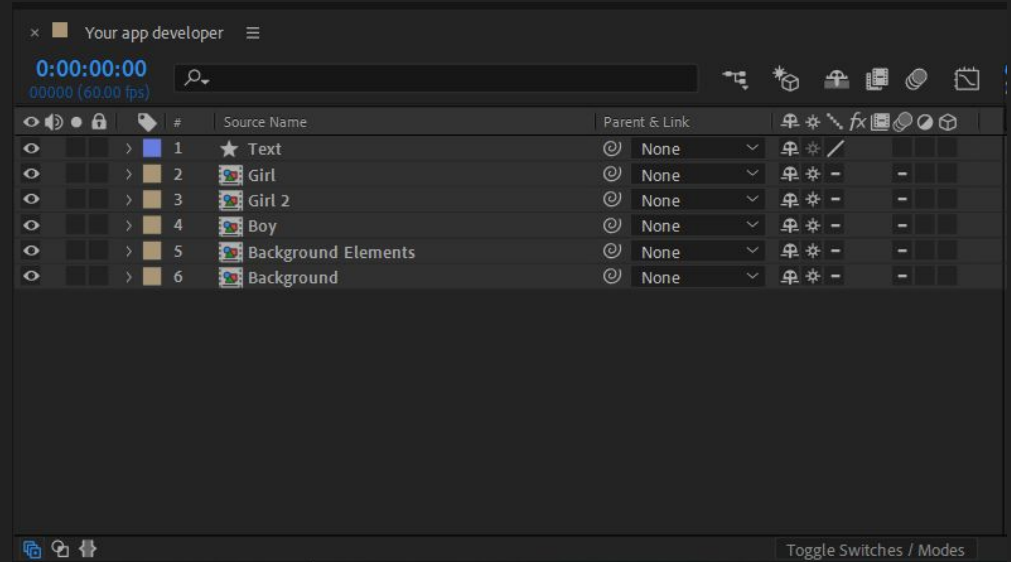

Step - 01

The "02 Final Comps" folder contains the main composition. Select the desired theme and open it.

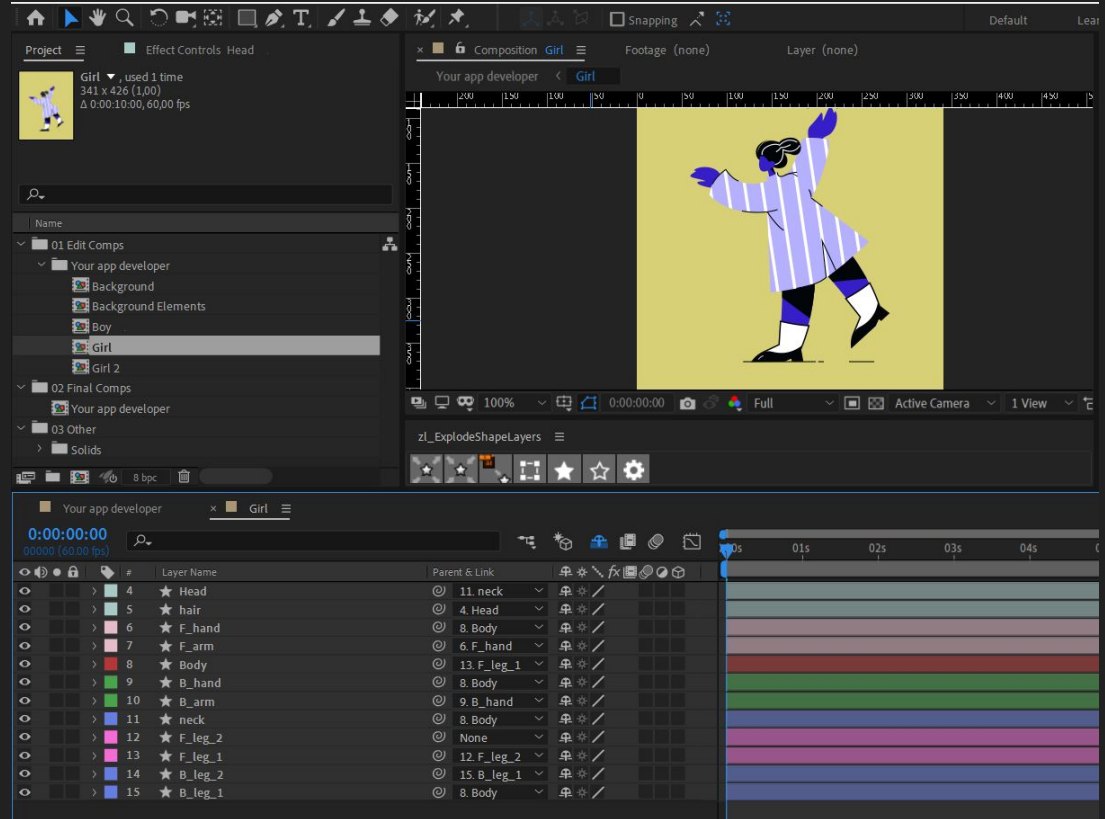

Step - 02

Inside the main composition elements are located in the pre composition. You can delete, move and change any values as you like.

Step - 03

There will be layers inside any pre-composition. The color of which you can change with the standard After Effects tools. Unfortunately, for the animation to be adapted to the Bodymovin plugin we could not make color controllers.

Step - 04

Create your own concepts and make your video, website or presentation as colorful as possible.

Thank you, for the purchase and good luck.
