Ah, the things you can do with Adobe After Effects! Its impressive set of tools and functionalities has made it the preferred choice of filmmakers, video designers and animators—professionals and amateurs. [Created by Adobe](#), this monster of an editing application was built for creating video animations, visual effects, motion graphics and compositions. Just turn on the TV for a few minutes—a good part of whatever you're watching is probably made with After Effects.

With After Effects project files, or templates, your work with motion graphics and visual effects will get a lot easier. In short, they are customizable After Effect files, neatly organized and labelled. You can easily change colors, text and other design elements without having to spend time on creating timelines and effects. It's all there—you just need to customize it to fit your project.

[Render project CS 6](#)

Vertical video to horizontal

[Video](#)

Why is render so long???

In the new year's project uses a lot of effects, so the video output time can be more than 4 hours, this is normal. Just put your computer on overnight.

The project does not work! A lot of mistakes!

The project requires an English-language program, switch to English.
