

PDF help file

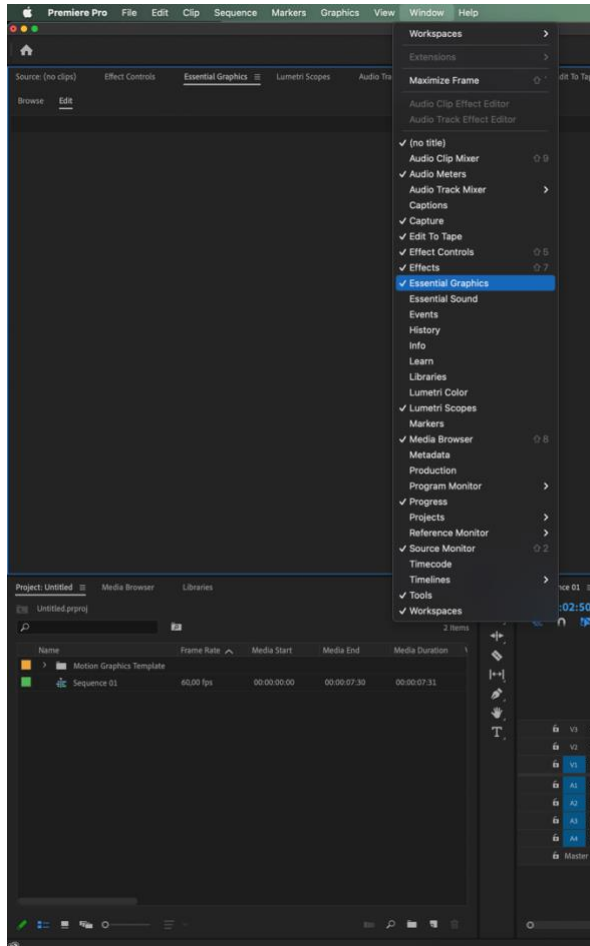

Hi, this is a little lesson for Instagram Stories. To get started, open in Premiere Pro.

01. Open Premiere Pro

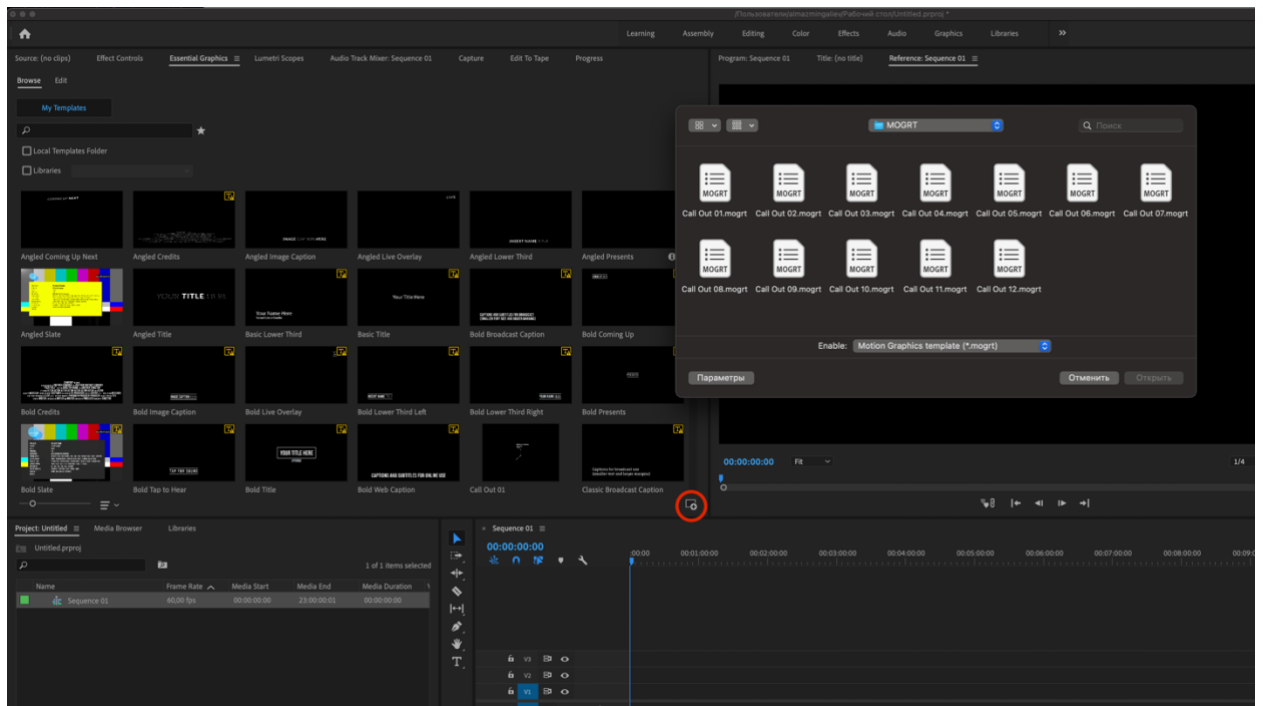

02. Create a sequence

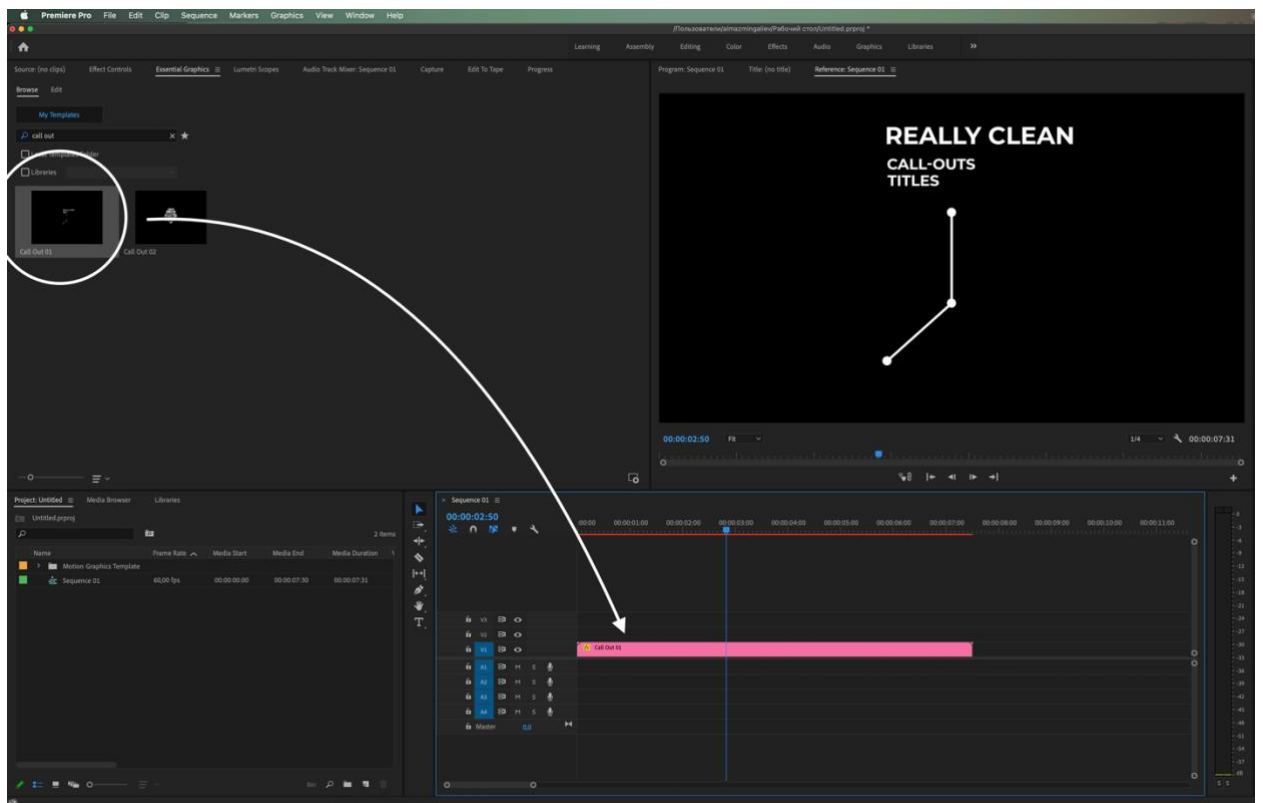

03. Open the Essential Graphics window

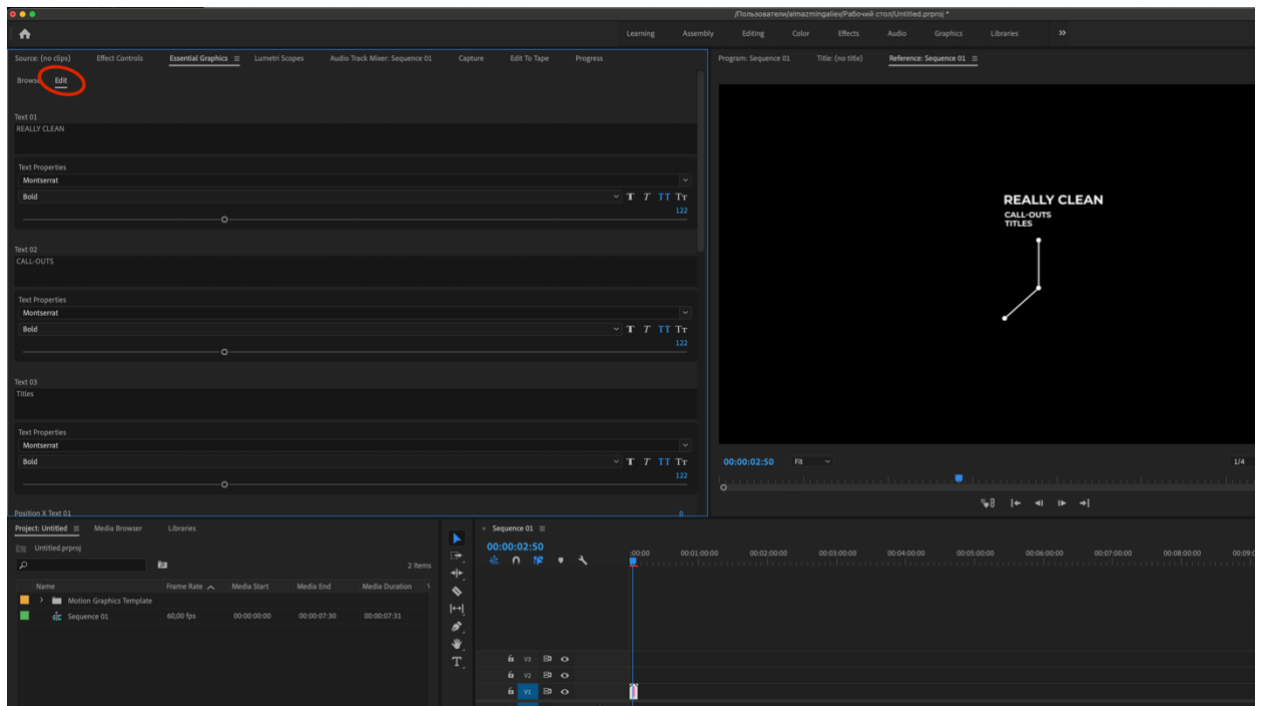

04. Add the mogrt you need

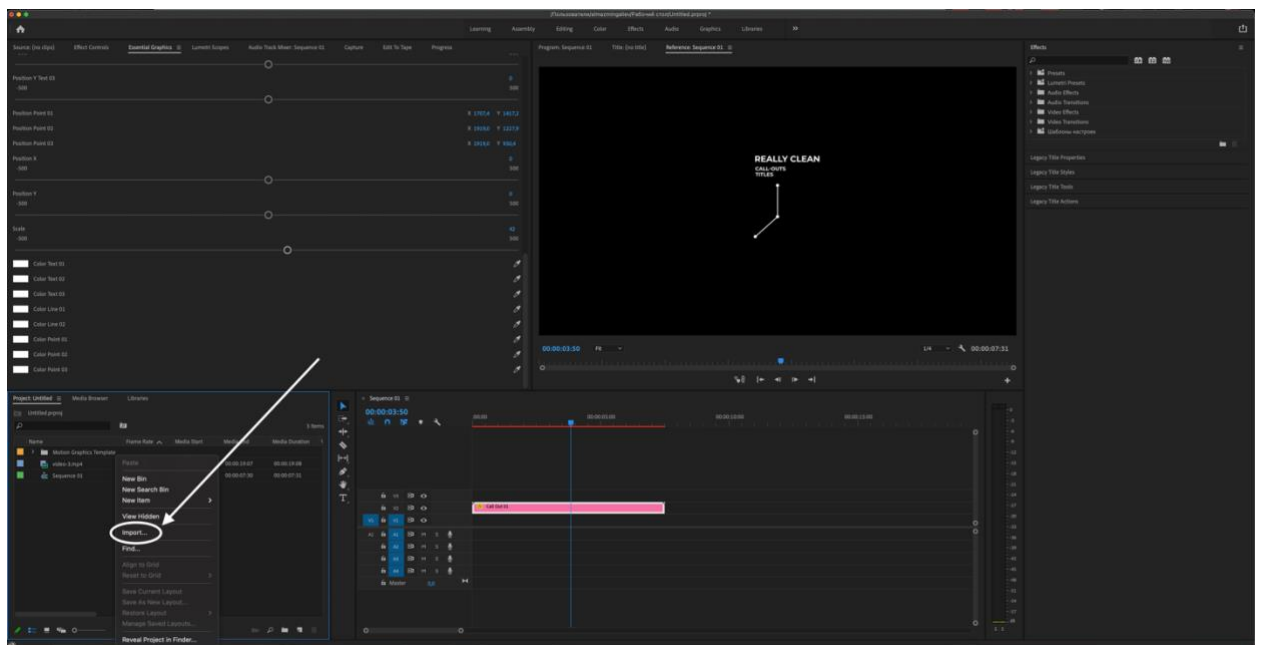

05. Transfer the mogrt to the timeline

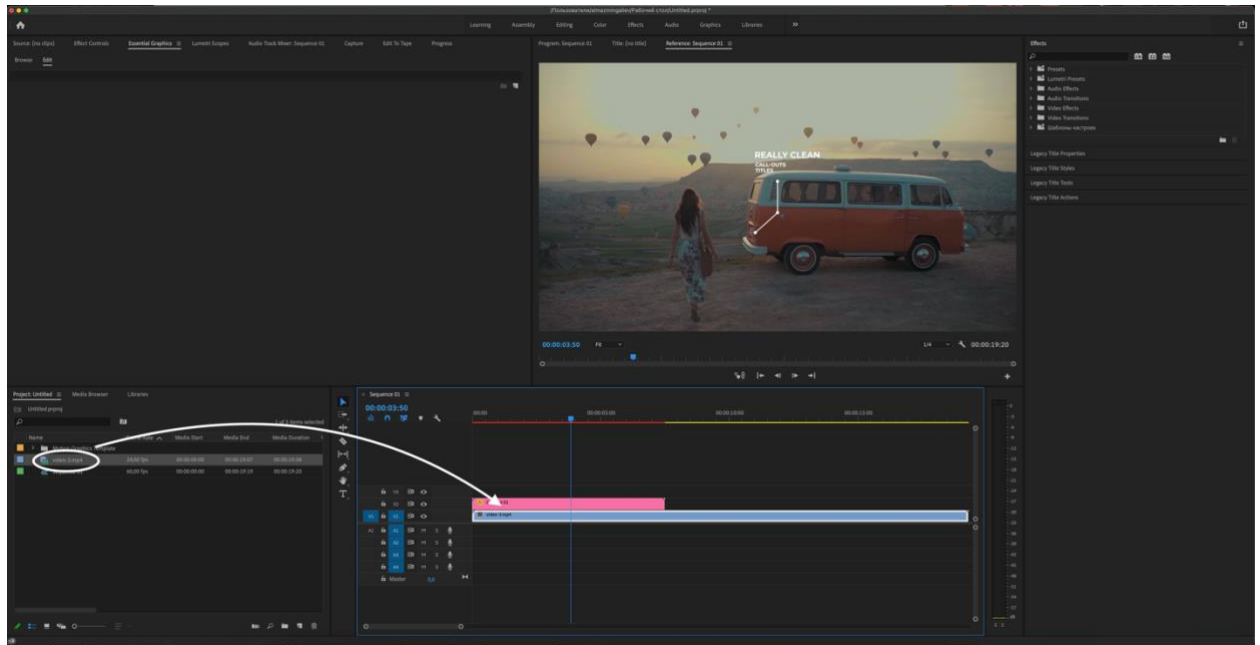

06. Edit as you need

To add a video / image, right click, then select import.

Choose the video / image you need. Move the selected video to the timeline.

Thanks for downloading my project, I hope you enjoy it!
I would be happy if you [subscribe to me on videohive](#), and also rate my project :)
