

Hi, Friend!

Thanks for buying my template.

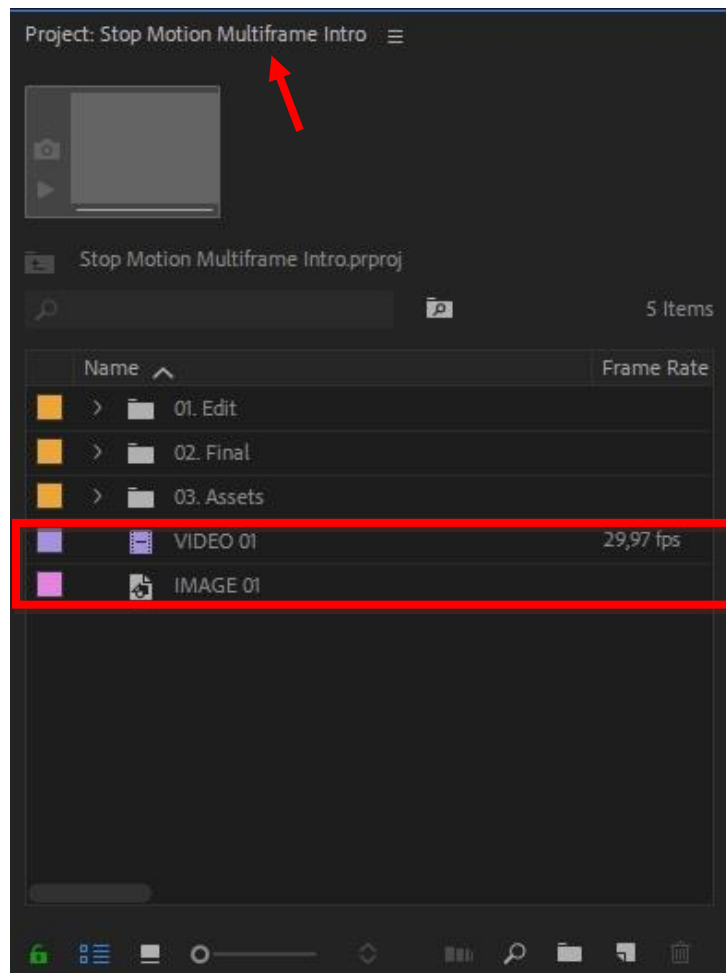

Please read this help file.

1. This is final sequence and panel «Project».

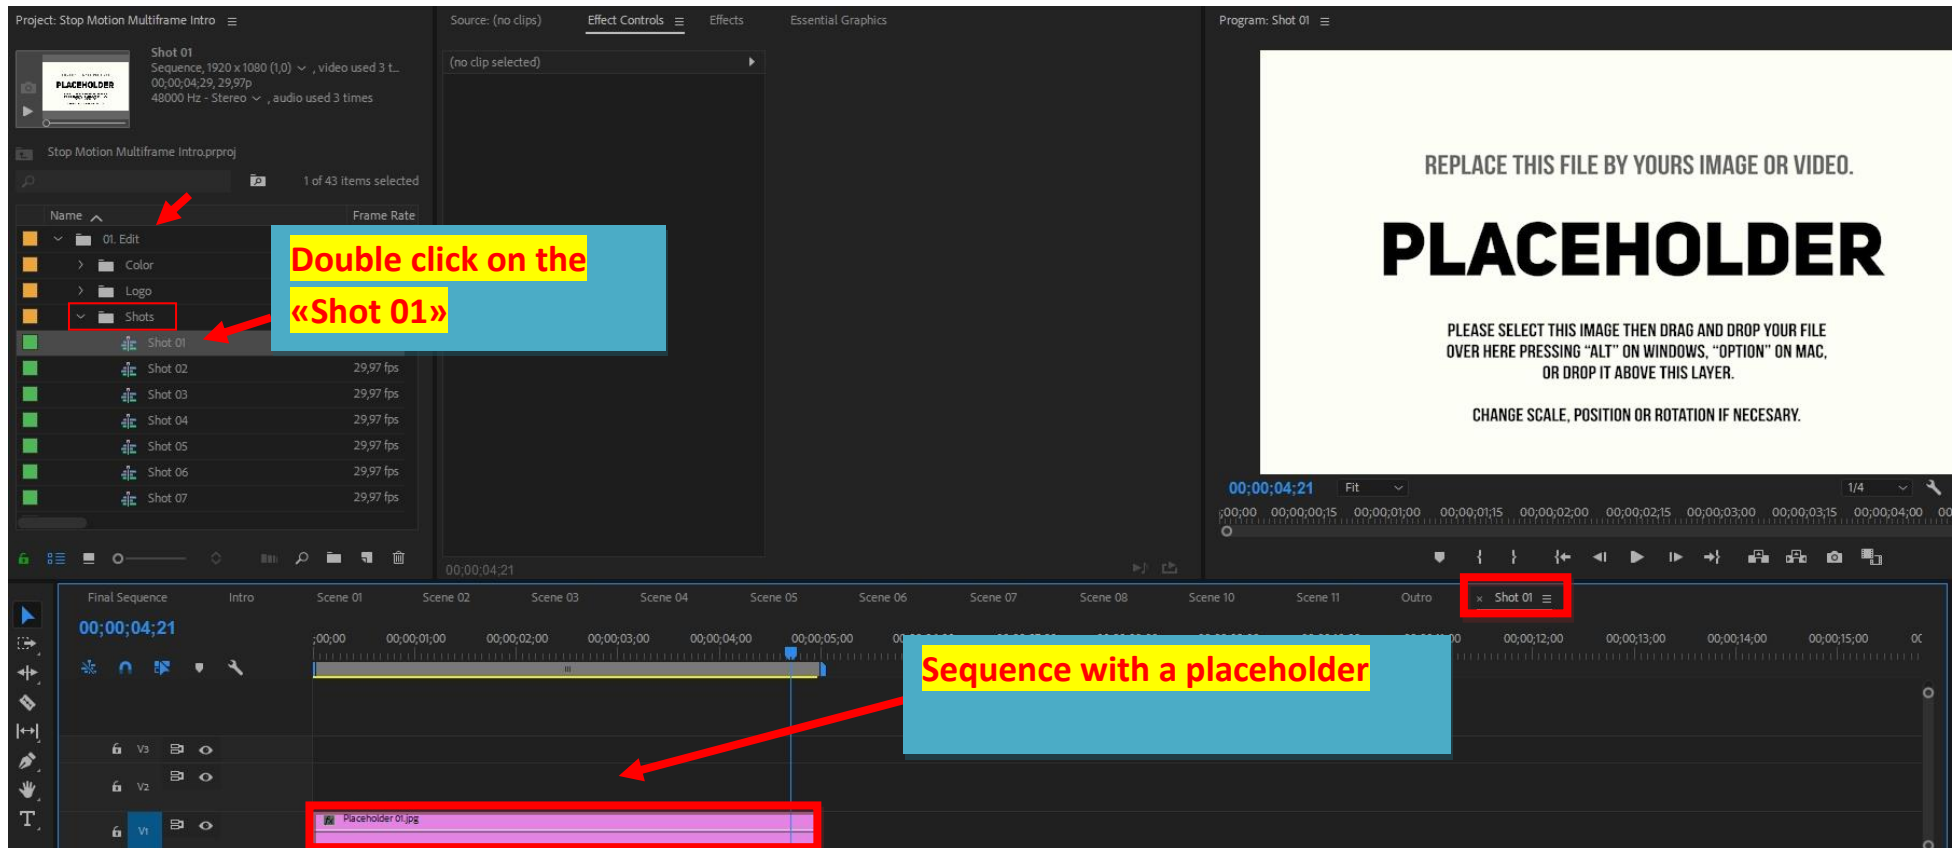

## 2. Replace the Footage (image or video).

Just drag and drop your files in panel «Project»

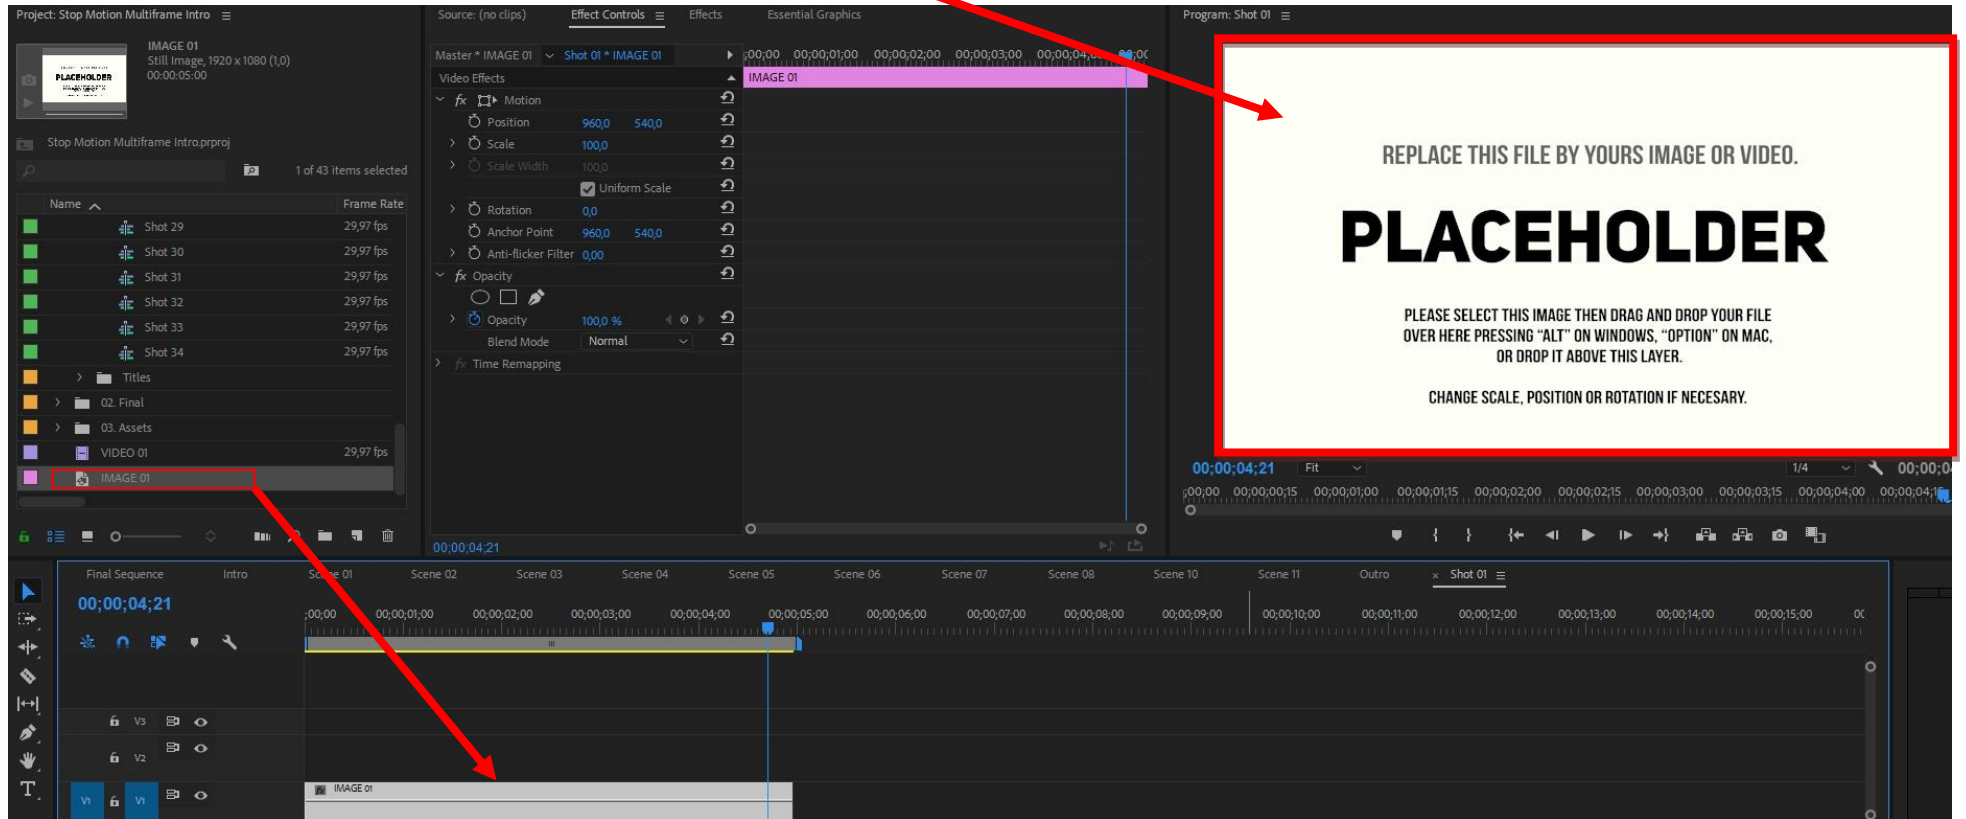

For example

Go to the folder Edit – Shots. Double click on the «Shot 01» and this opens the sequence with a placeholder

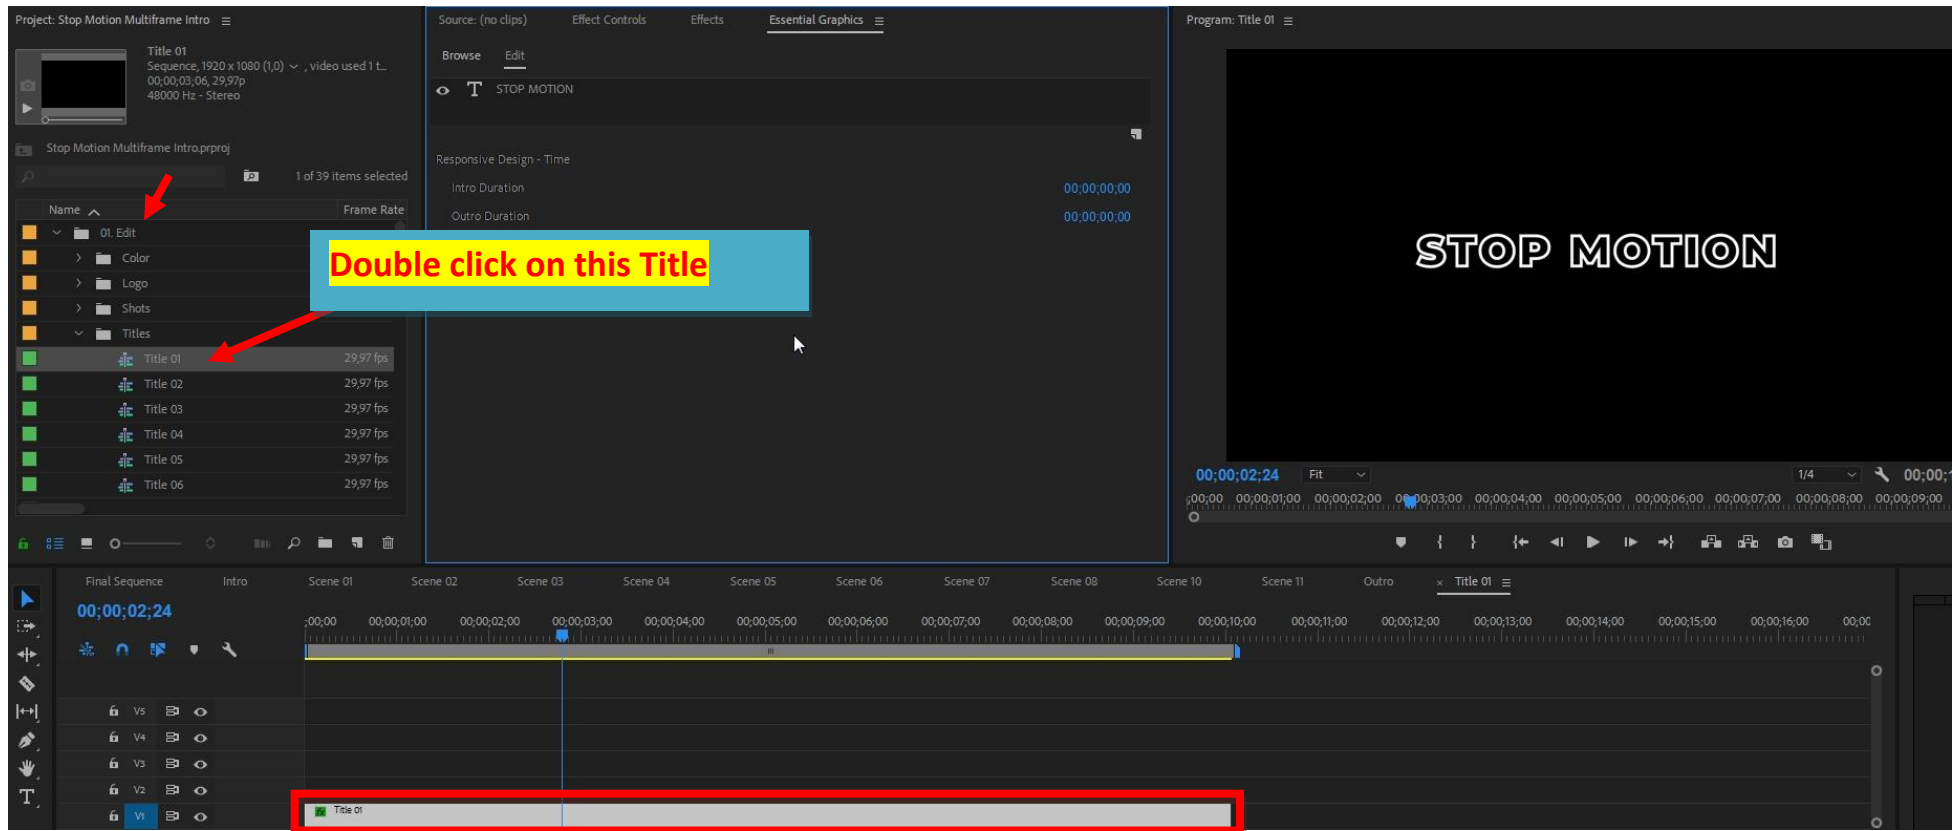

Replace placeholder by yours footage and read this tip

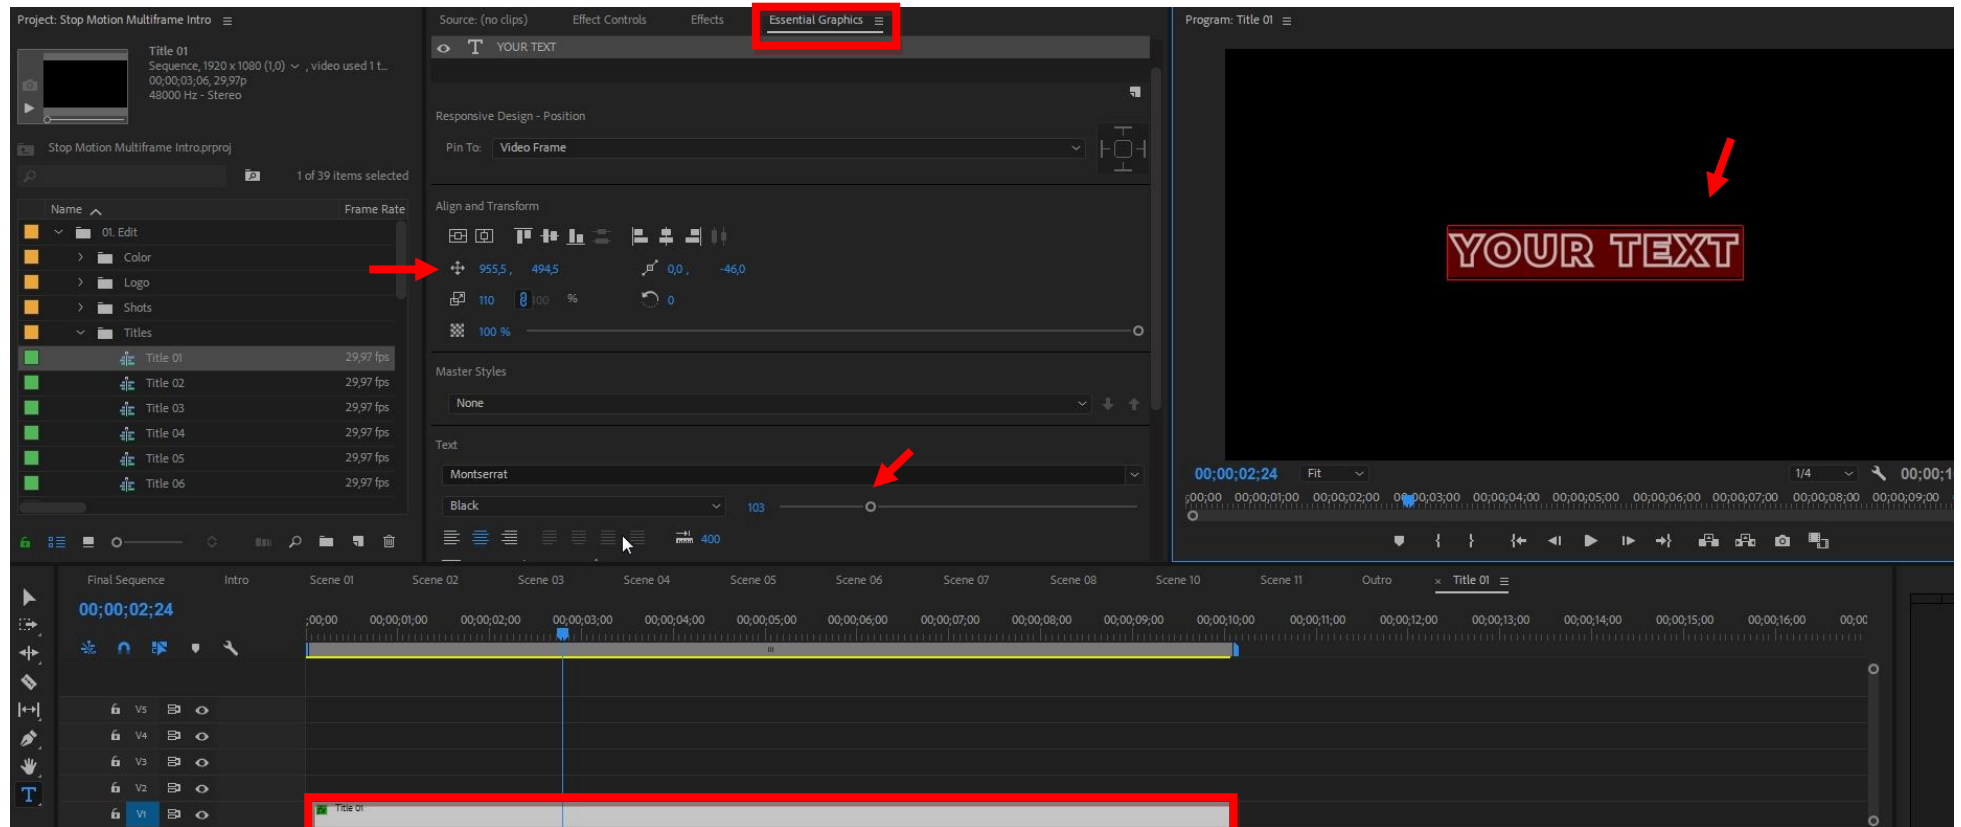

### 3. Change the Text.

For example

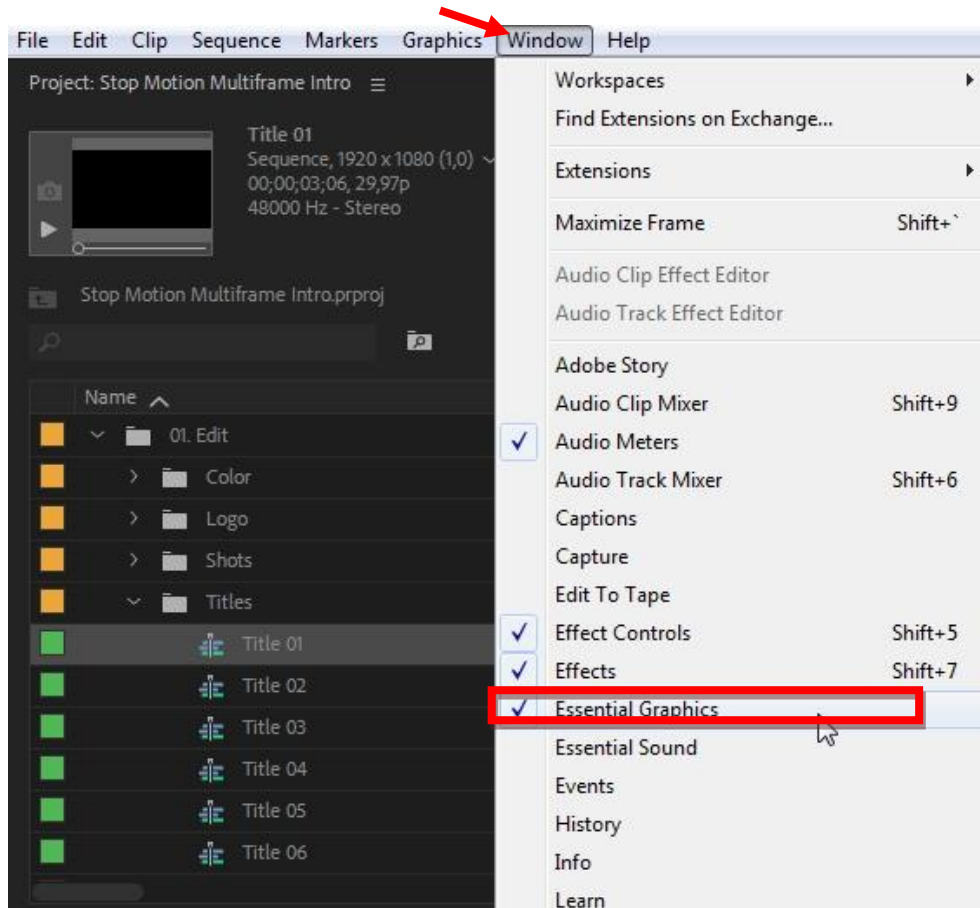

Go to the folder Edit - Titles. Double click on the «Title 01» and this opens the sequence with the title.

Please select a layer with a title (hot key – V) and change the text, position, color and size (Panel – Essential Graphics)

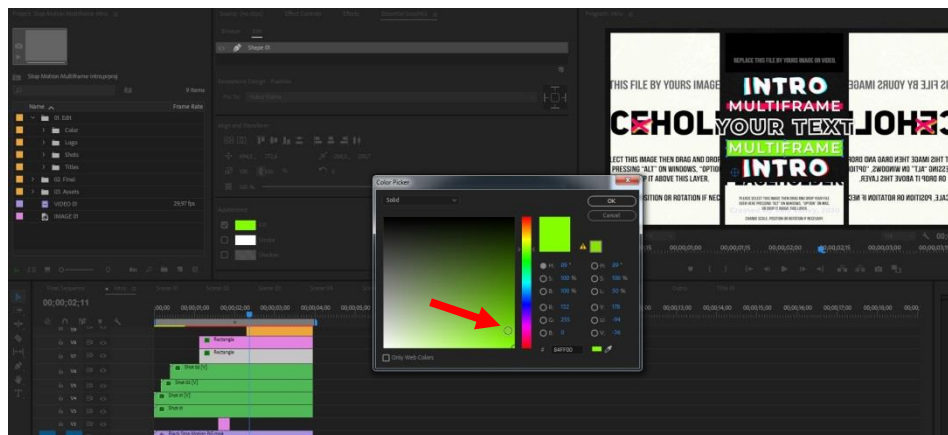

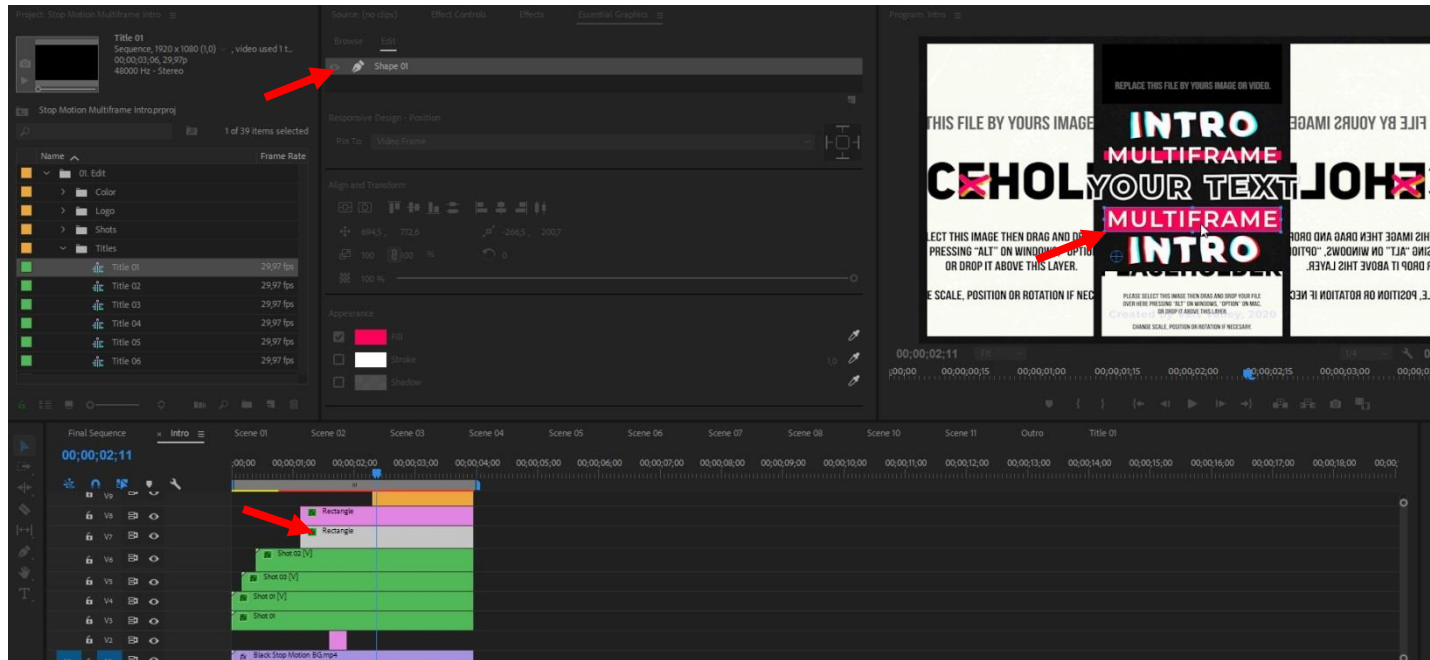

**Hint. If you don't see the Essential Graphics panel just go to the window tab and select it.**

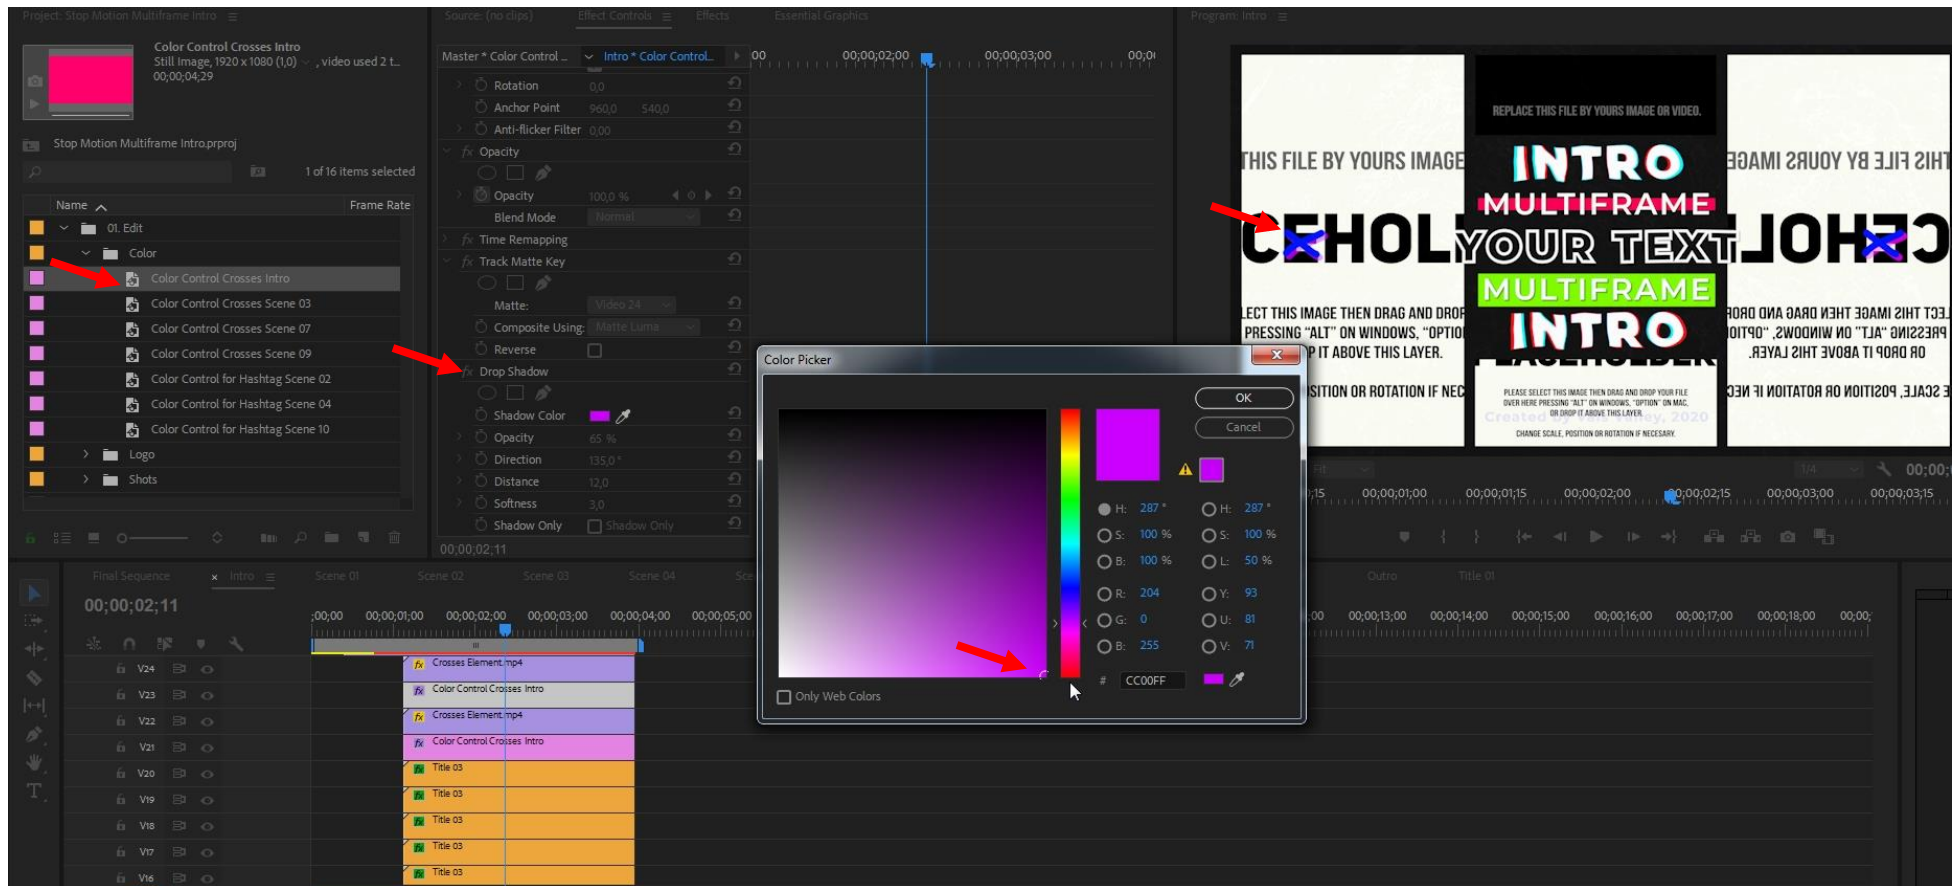

Hint (Color changing options).

You can also simply change the size and background color of the rectangle in the essentials graphics panel.

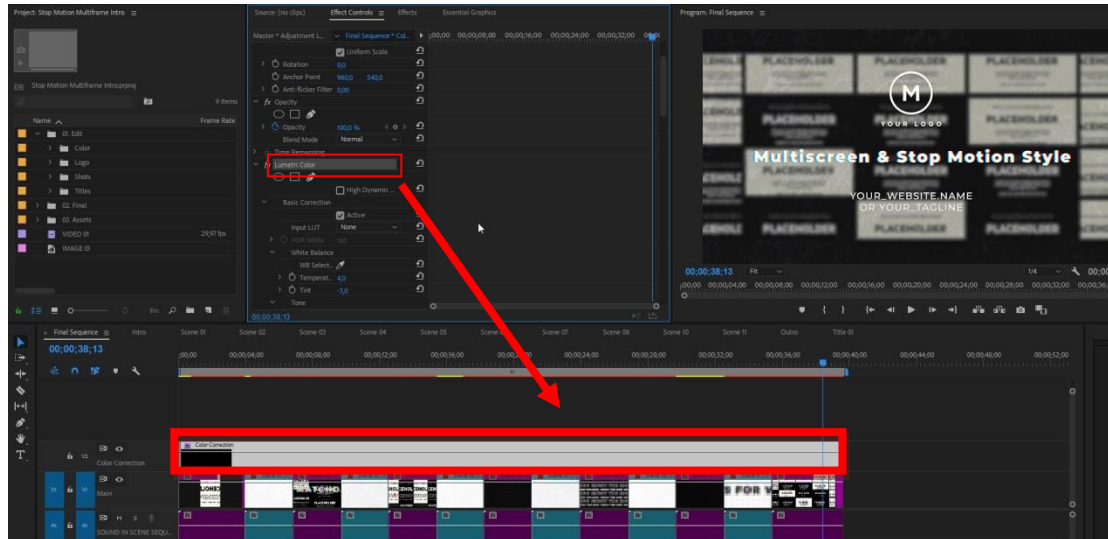

Also you can change the color of design element (crosses and hashtag). Go to the folder Edit - Color and change the color of the required element and use the Drop Shadow effect (Panel Effect Controls – for the change color of the shadow).

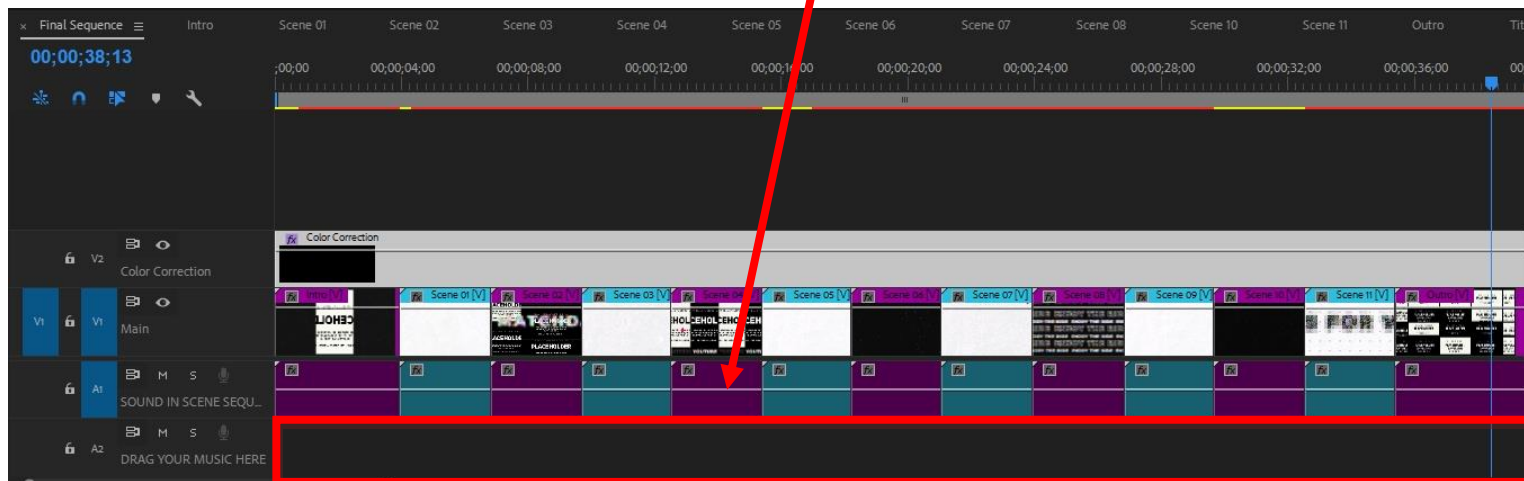

#### 4. Color Correction.

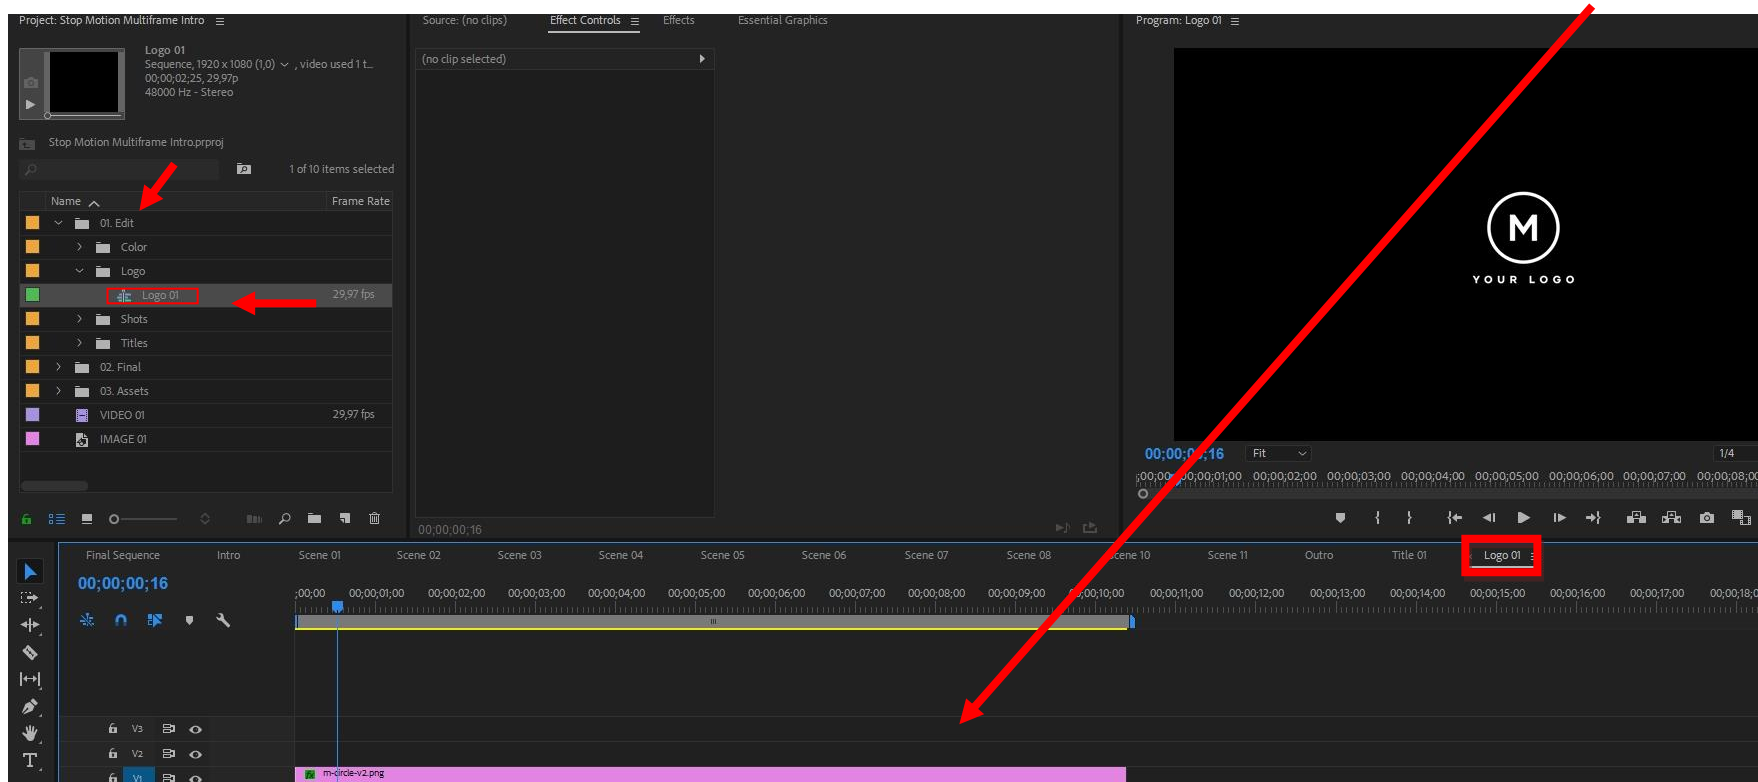

Change the color correction on the adjustment layer in Final Sequence (for example through the panel «Lumetri Color»)

#### 5. Music track. Just drag and drop your music file here

## 6. Change Logo. Go to the folder Edit – Logo. Double click on this file «Logo 01» and drag your logo here

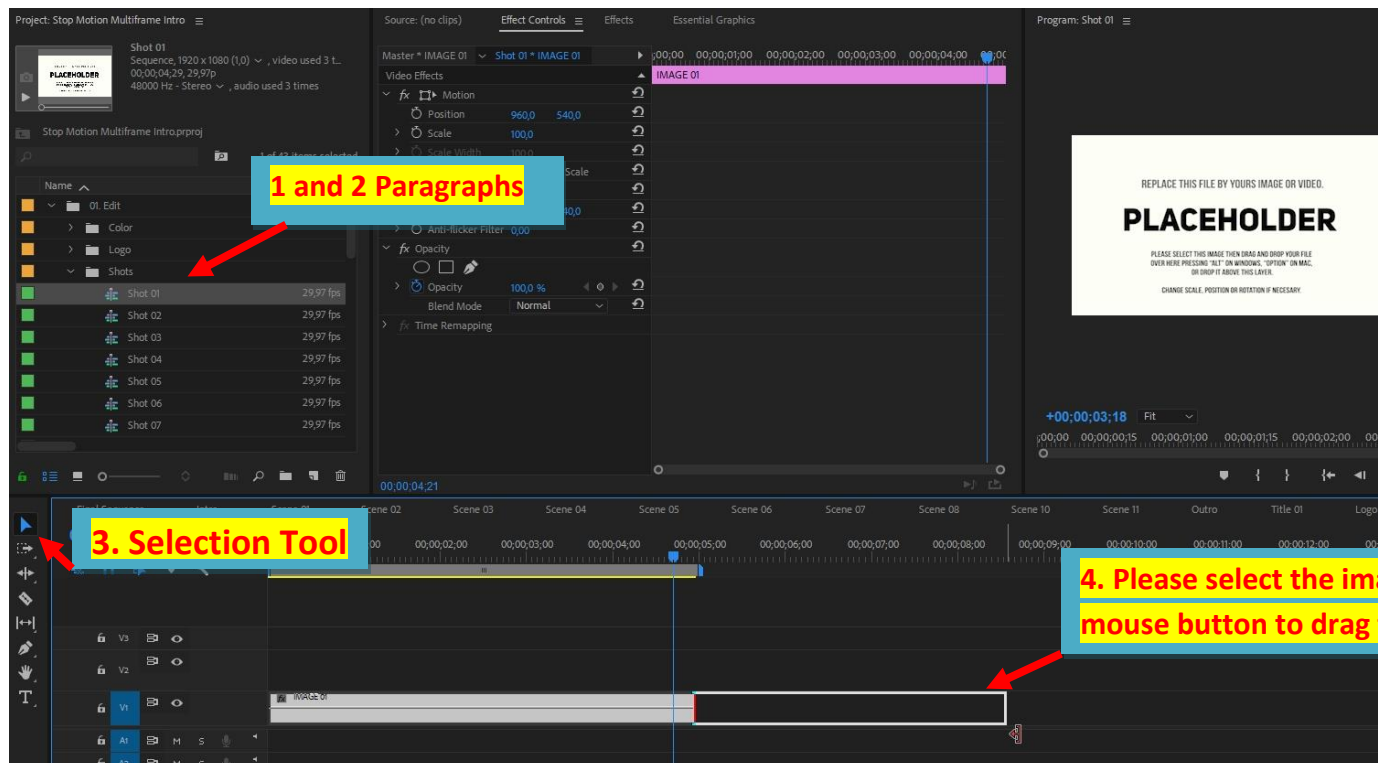

## 7. Duration Layers. To control the length of the layers (title and shot sequences) you need to follow simple tips.

### a. Image

For example

1. Go to the folder Edit – Shots.
2. Double click on the «Shot 01» and this opens the sequence with a placeholder.
3. Then use the Selection tool on the Tool panel (hot key V on the keyboard).
4. Please select the image and hold down the left mouse button to drag the file to the right or left, up to the length that you need.

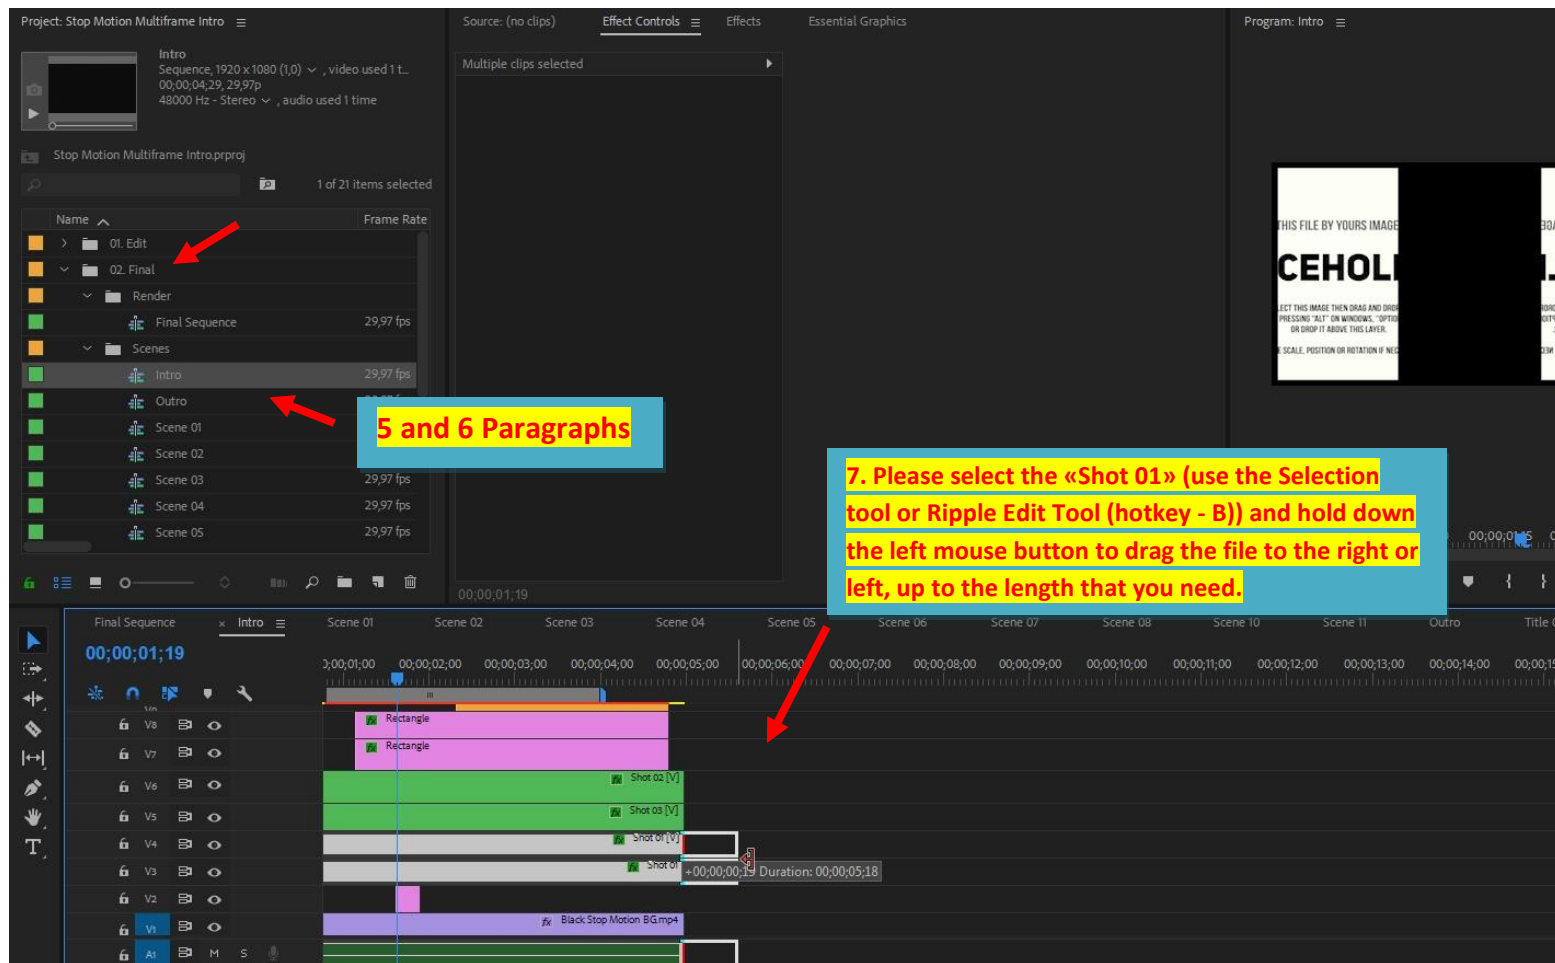

5. Then go to the folder Final – Scenes

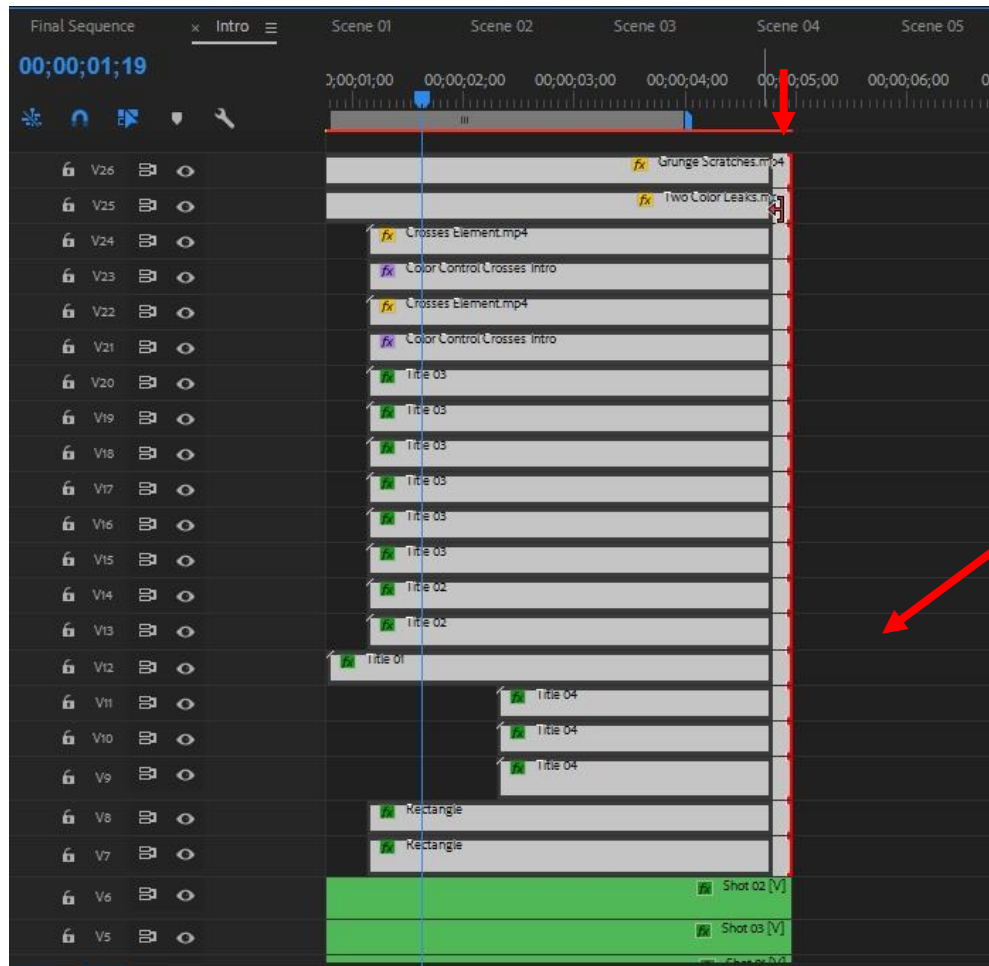

6. Double click on the sequence «Intro» and enter this sequence

7. Please select the «Shot 01» (use the Selection Tool or Ripple Edit Tool (hotkey - B)) and hold down the left mouse button to drag the file to the right or left, up to the length that you need.

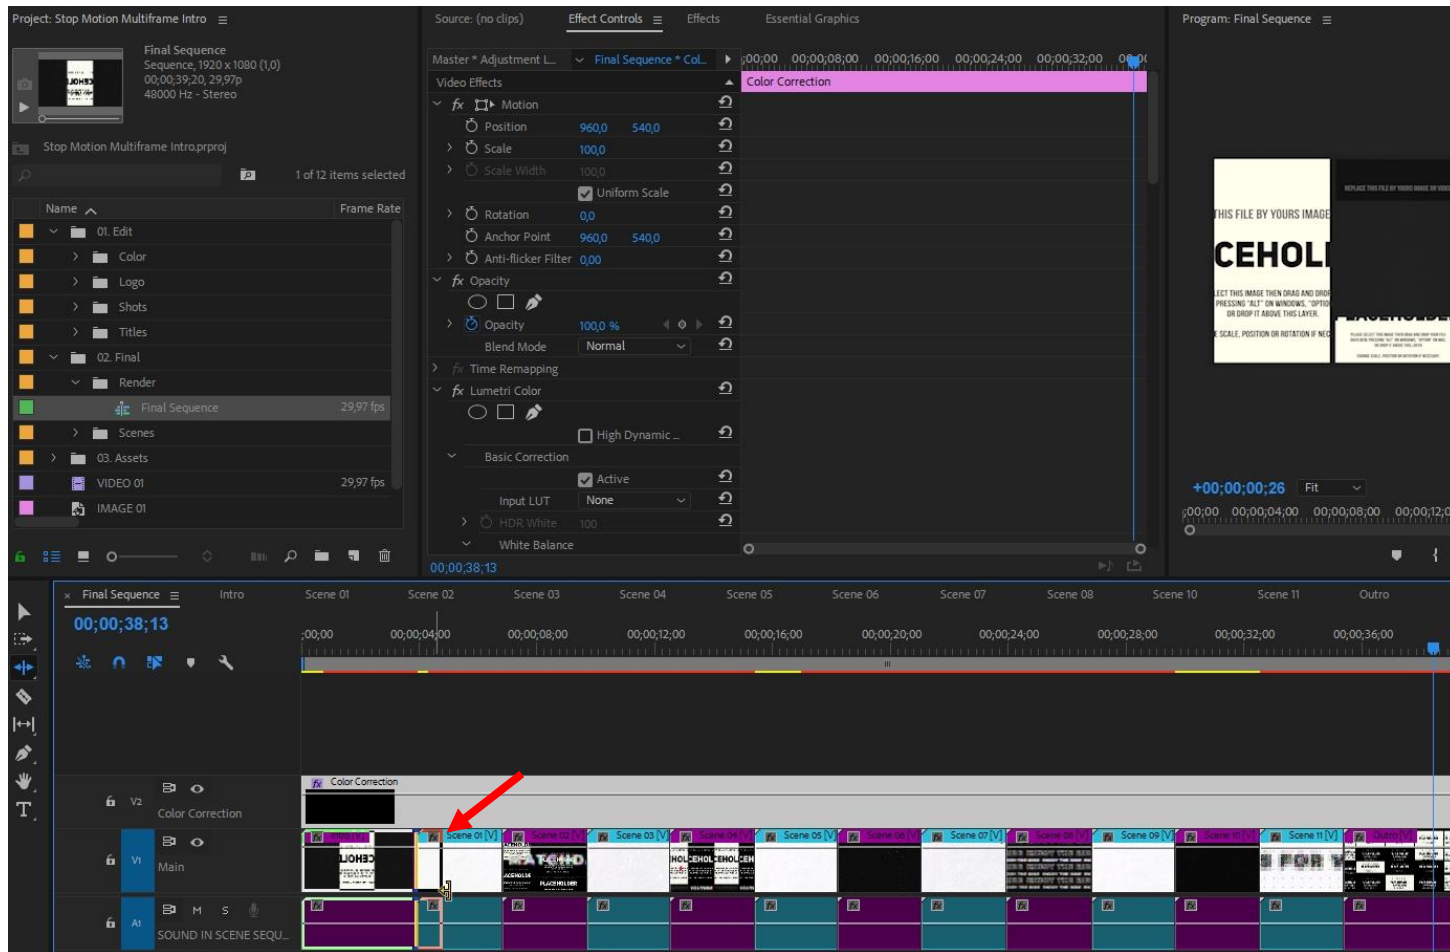

8. Other files from the scene are customized to the length of the shot (if necessary)

**b. Text Duration** - the length of the text layer is changed as well as the image. In the same way you can increase the other elements.

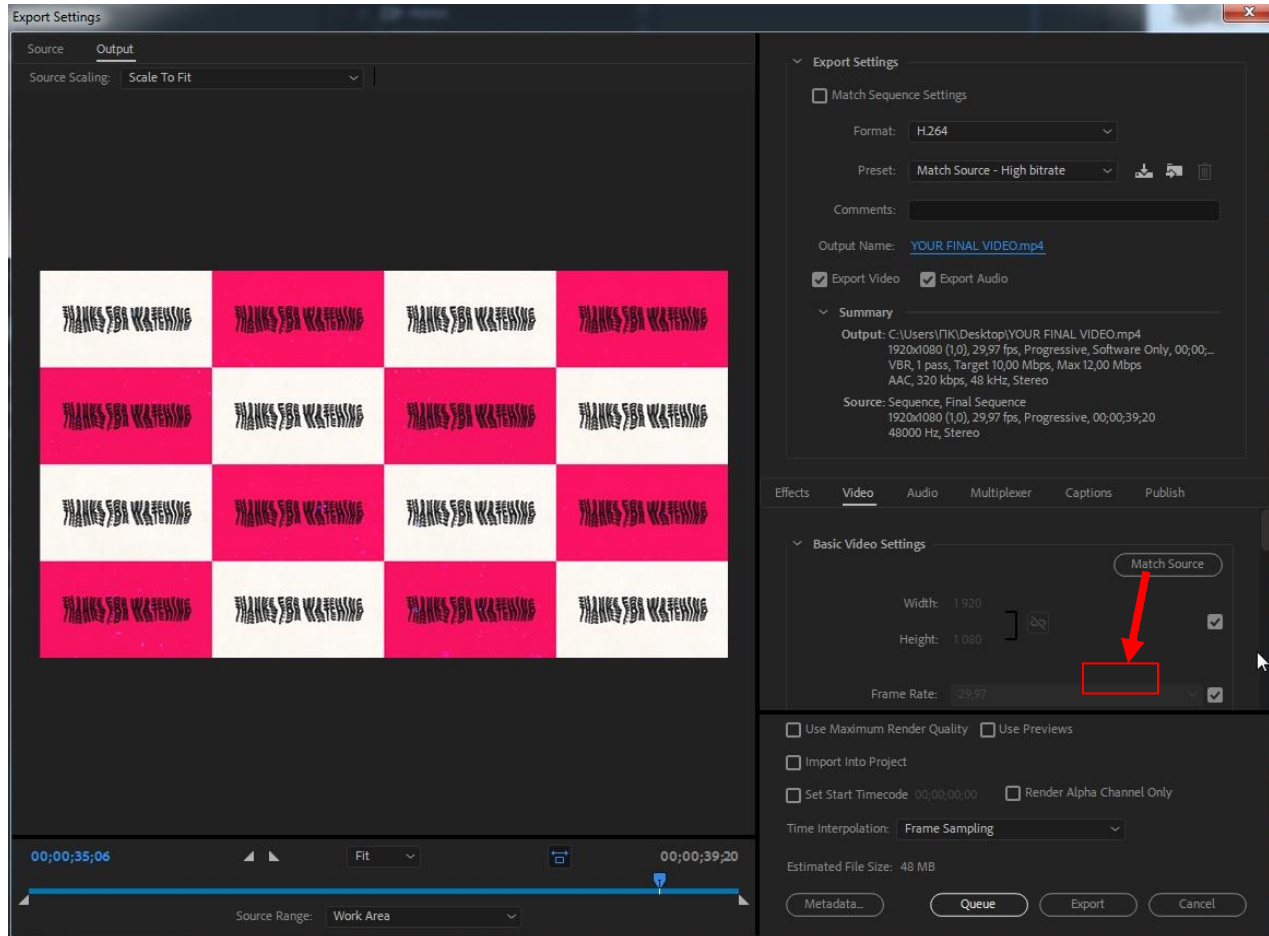

Also adjust the length in the final sequence ((use the Selection Tool hotkey - V or Ripple Edit Tool (hotkey - B)).

## 8. Render.

After you've finished your customizations, go to Final Sequence. Press hotkeys on the keyboard – Ctrl+M or (File – Export – Media) and click button «Export»
