

Step 01

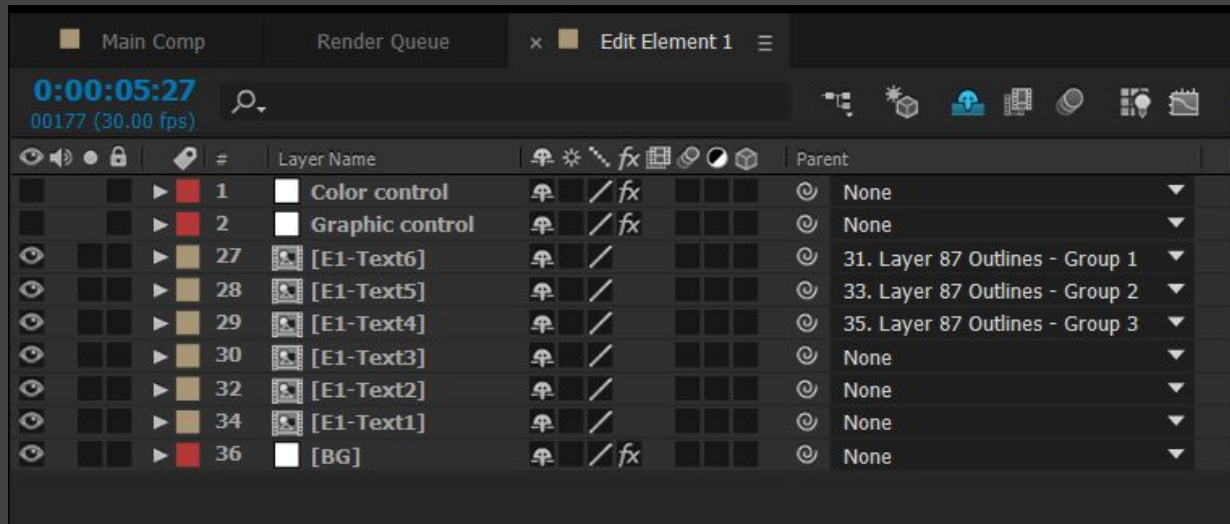

Open the folder “Comps”
and choose a composition.

Step 02

Inside each composition will be a layer with a color controller and other controllers.

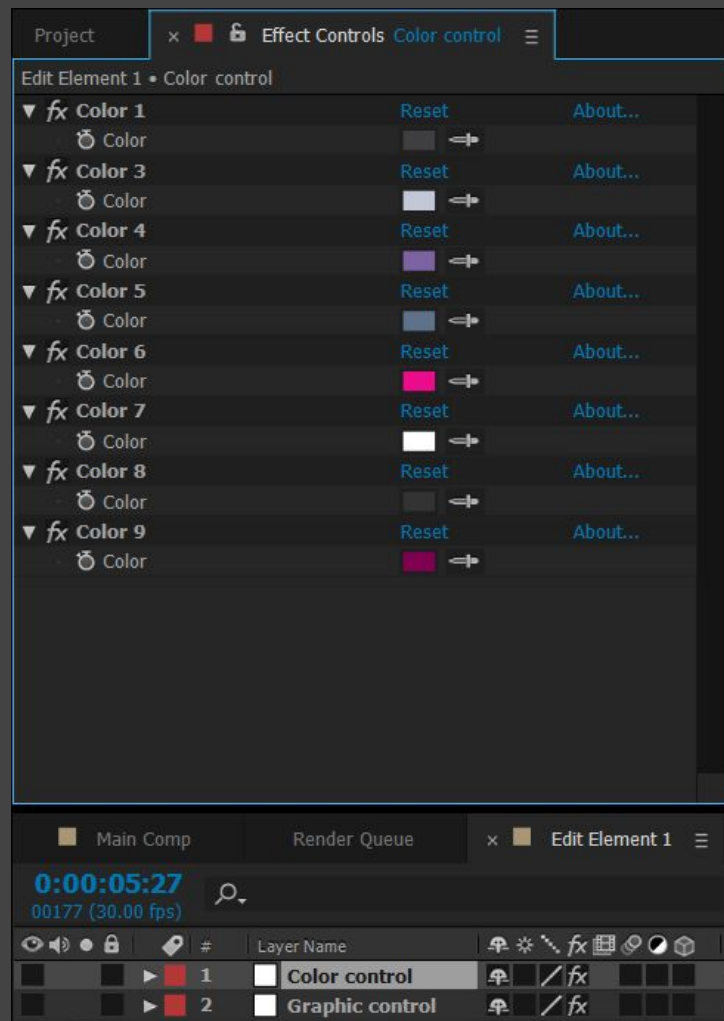

Use them if you want to change the value of color or numbers.

Step 03

Simply select the color controller layer and open the Effect Controller tab

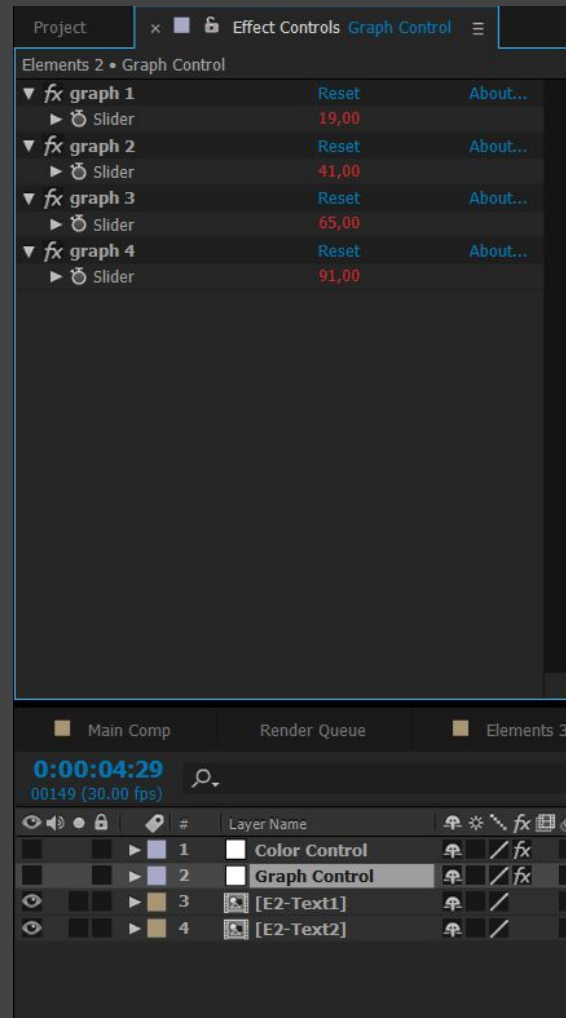

Here you can change any color to the one you want.

Step 04

Select the Graph Controller layer and open the Effect Controller tab

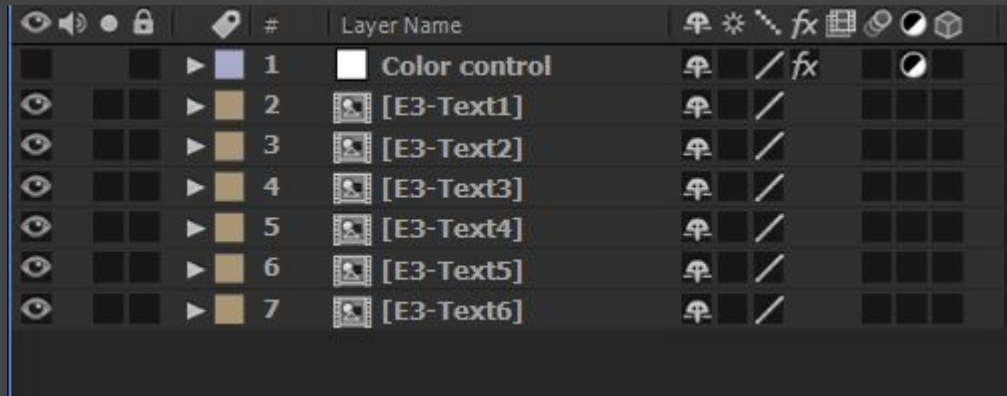

Here you can change the value of charts.

Step 05

Each compositions has pre-compositions with text. Inside there is a text layer that can be changed.

To change the color of the text, go back to step 3.

Step 06

Enjoy
