Tutorial

Step_01 – Unzip all files In your folder. You have to see that files:

Step_02 – Open File “Website Promo”

The screenshot displays the Adobe After Effects interface. The top panel shows the Project panel with a hierarchy of folders: **_OTHER**, **SCENES**, **Main**, and **Solids**. The **SCENES** folder contains 11 sub-scenes, from **Scene_01** to **Scene_11**, which are highlighted with a red box. A red arrow points to this box with the label "All scenes". Another red arrow points to the **Main** folder with the label "Main composition".

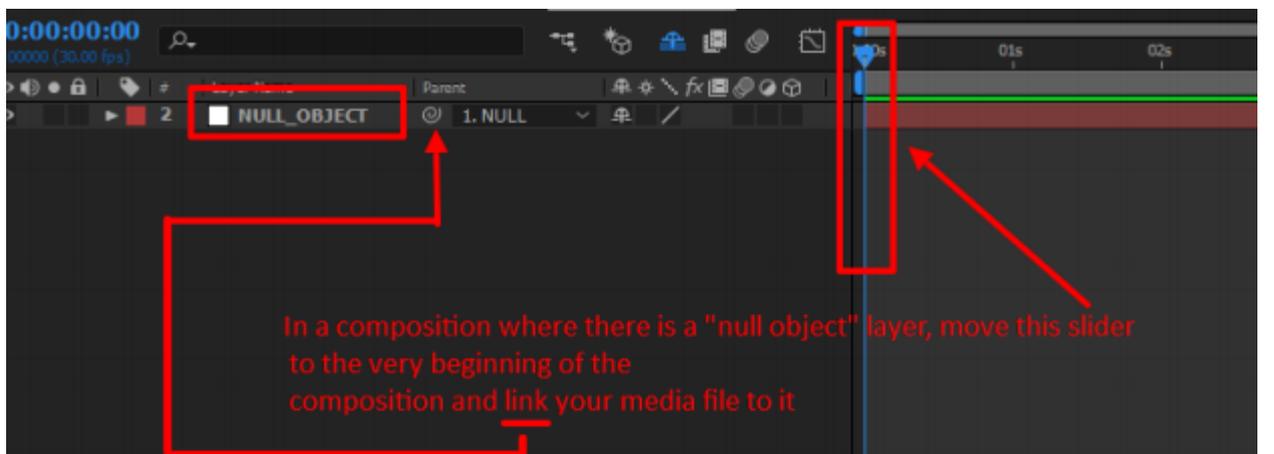

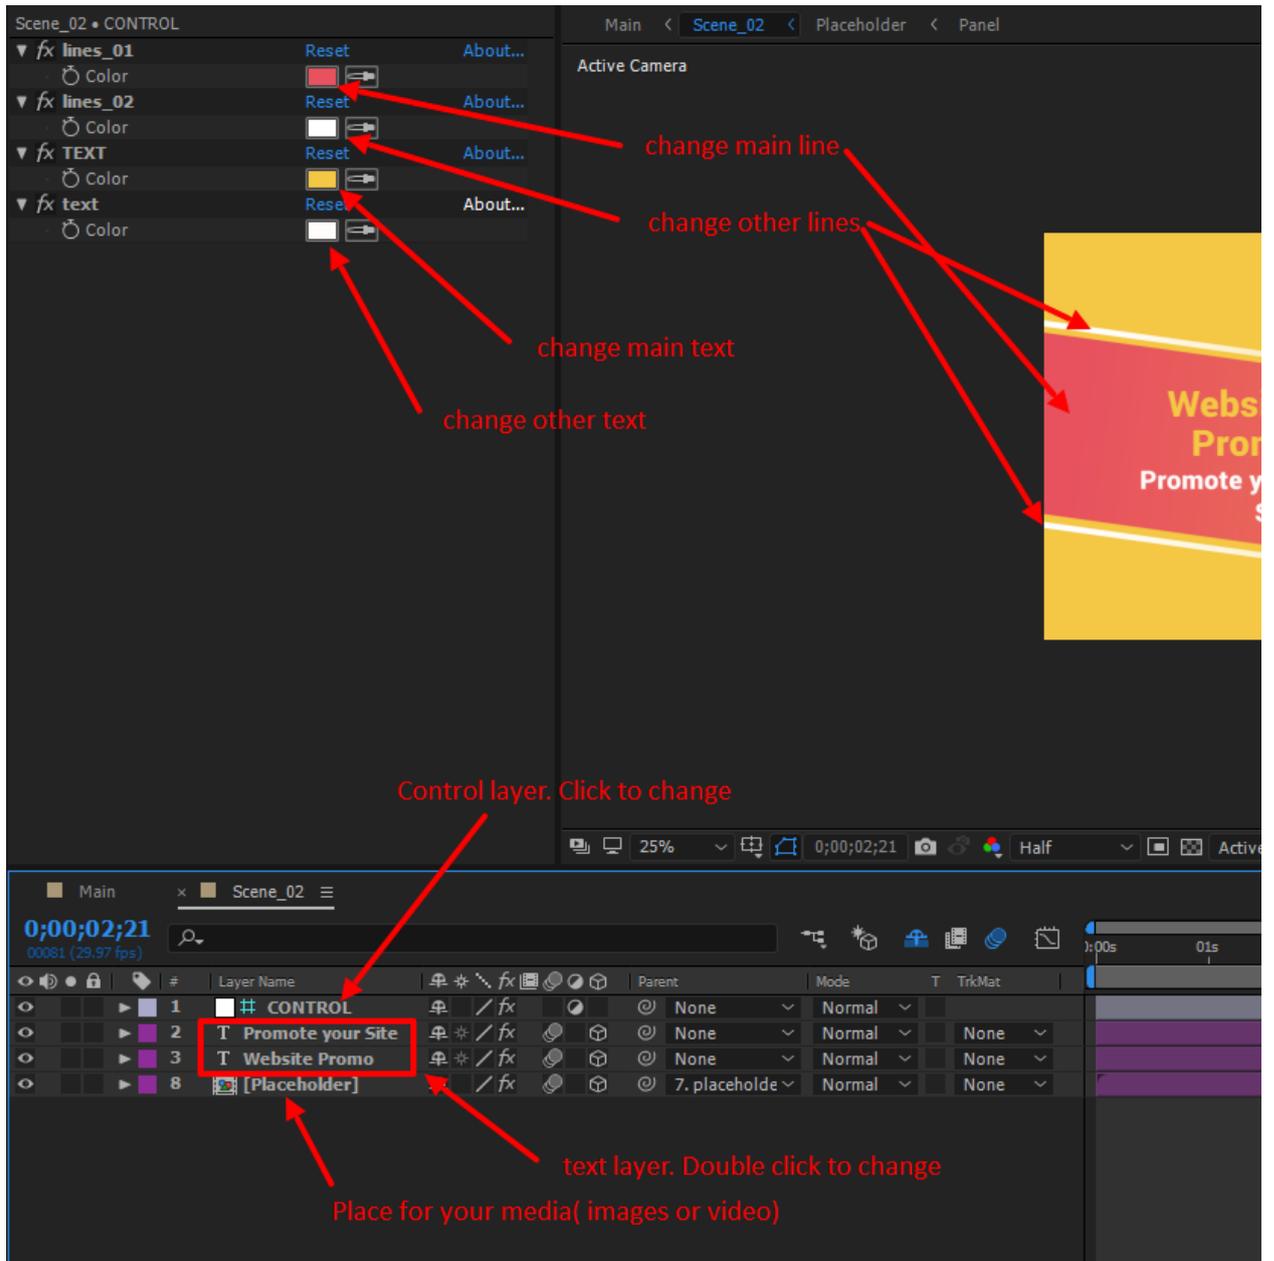

The main composition window shows a preview of a graphic with a yellow and red background and the word "Thanks" in yellow. A red arrow points to the bottom of this window with the label "click to change color BG".

The bottom panel shows the Layer panel for the **Scene_02** composition. The layers are listed as follows:

#	Layer Name	Parent	Mode	TrkMat
1	# COLOR BG	None	Normal	
2	Curves	None	Normal	
3	[Scene_11]	None	Normal	None
4	[Scene_10]	None	Normal	None
5	[Scene_09]	None	Normal	None
6	[Scene_08]	None	Normal	None
7	[Scene_07]	None	Normal	None
8	[Scene_06]	None	Normal	None
9	[Scene_05]	None	Normal	None
10	[Scene_04]	None	Normal	None
11	[Scene_03]	None	Normal	None
12	[Scene_02]	None	Normal	None
13	[Scene_01]	None	Normal	None
14	[BG]	None	Normal	None

Red arrows point to the **Curves** layer (labeled "Curves(if you don't need, then delete this layer)") and the **Motion blur** icon in the layer panel (labeled "Motion blur").

Step_03 – Then open any scene from 1 to 11

Step_04 – do this exactly with each scene in this project

Step_05 – after you are done press the key combination CTRL + M, choose folder for saving video file and click render.

Thank You!
