Hello! Thanks for buying this template!

It's really easy to customize:
The project has a modular structure. Slideshow blocks are in the "Final comp" composition.
To set up slide 1:

1. Put your photo or video in "Your Picture/Video 01" composition.

2. Type your text in "Your Text 01" composition.

3. Open "Color Control" composition and select "Slide 01 Control" layer.

Go to Effect Controls panel and adjust the colors.

5. Do the same with the other slides.
You can arrange the slides in the desired order in the "Final Comp" composition. Slides should be placed one above the other.

That's all.
Hope you like it and again - thanks for buying. Please do not forget to rate if you like!

Regards
