

Thanks for purchasing "Simple Logo" project!

It's really easy to customize.

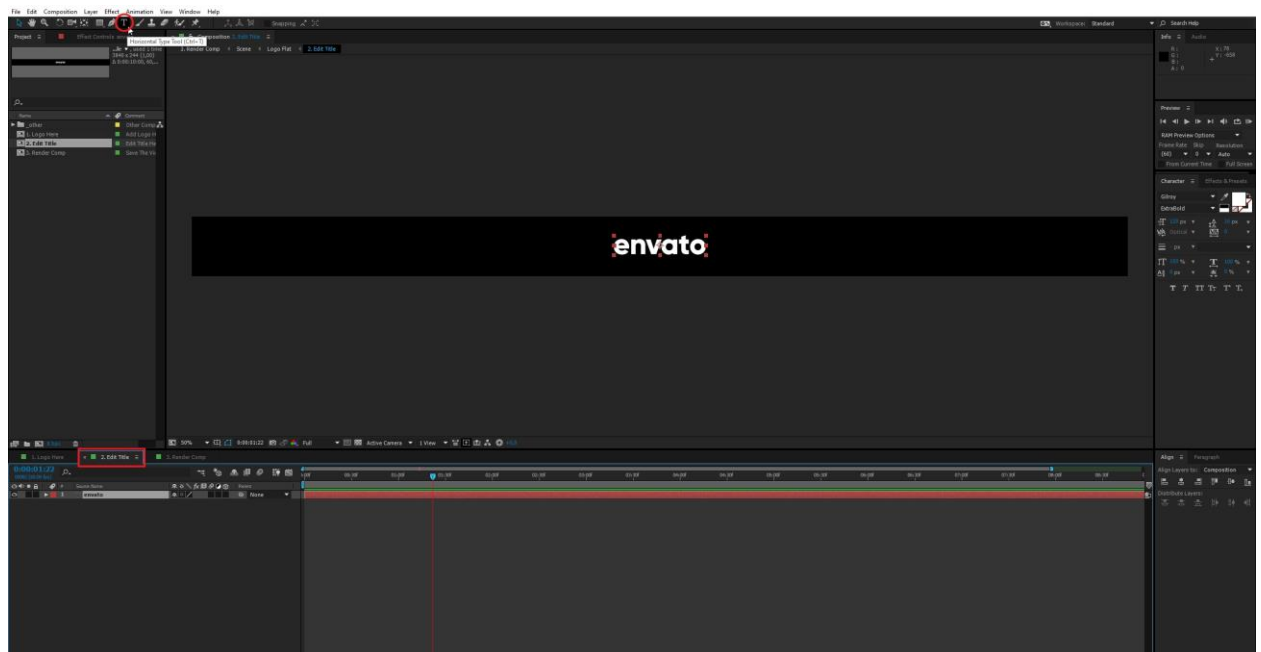

1 step. Place your logo to the composition "Logo Here":

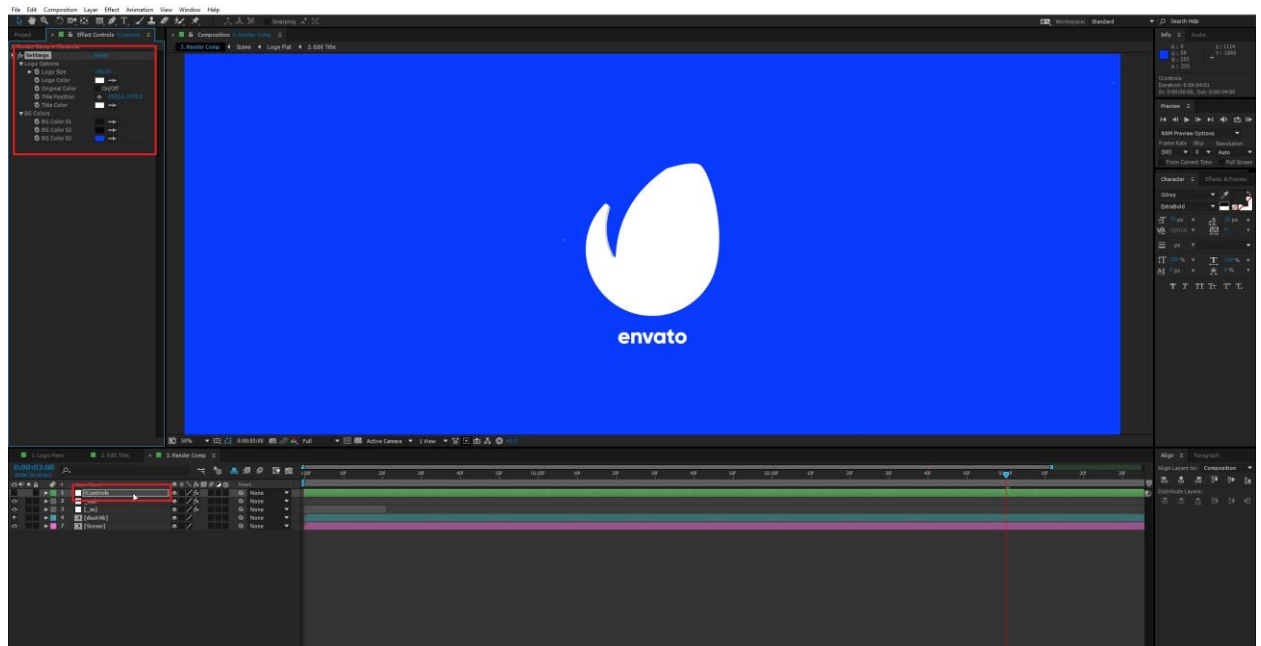

Do not forget to turn off (uncheck "eye") or delete the layer example

2 step. Open the composition "Edit Title" and edit the text.

Select text layer. To edit text, use the **Horizontal Type Tool** (CTRL+T on PC):

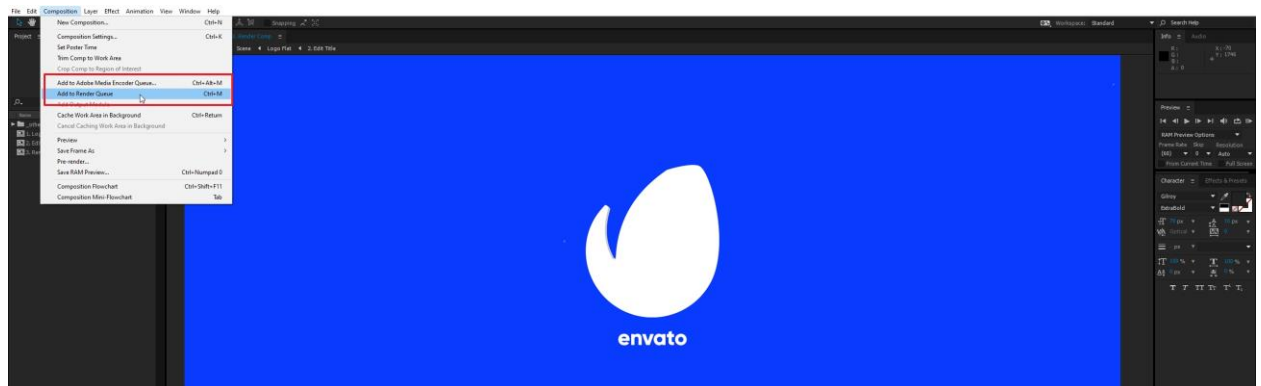

3 step. Open the composition "Render Comp". Render Comp contains a special layer (!Controls) where you can change colors and other settings:

Note: If you don't see the menu settings: click on the layer Window and follow - Effect Controls: "Solid name".

...after all you can save your video:

If you have any problems or questions you can send me on email: d.o.coy2@gmail.com

Best Regards
