

# PDF Help file

Hi, this is a little lesson for using the project correctly.

**First, you need to move the ".settings" files from the root folder to the Headers folder.**

## **For Windows:**

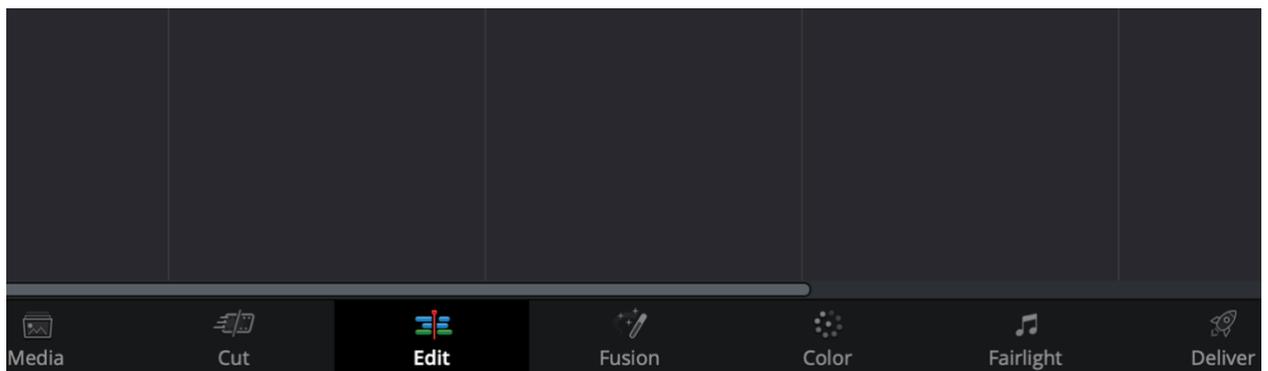

Program Data/Blackmagic Design/DaVinci Resolve/Fusion/Templates/Edit/ Titles

## **For Mac OS:**

Library/Application Support/Blackmagic Design/DaVinci Resolve/Fusion/Templates/Edit/Titles

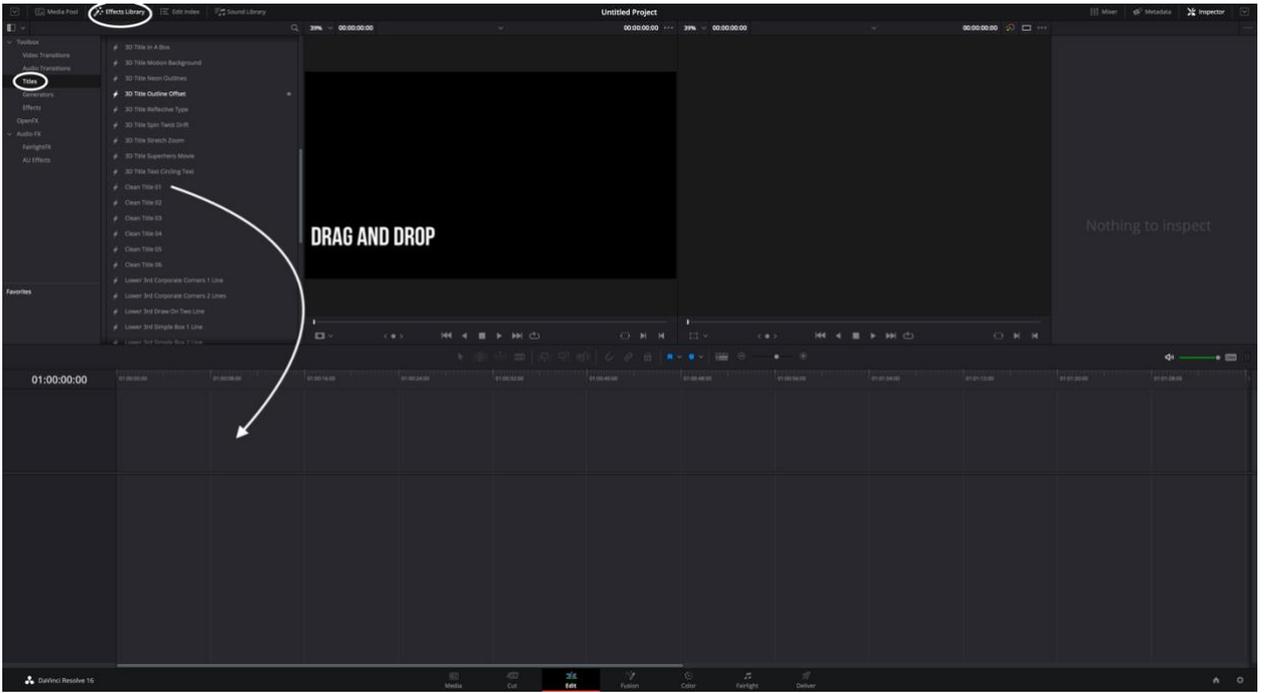

Open the DaVinci Resolve.

1. Then open the "Edit" tab

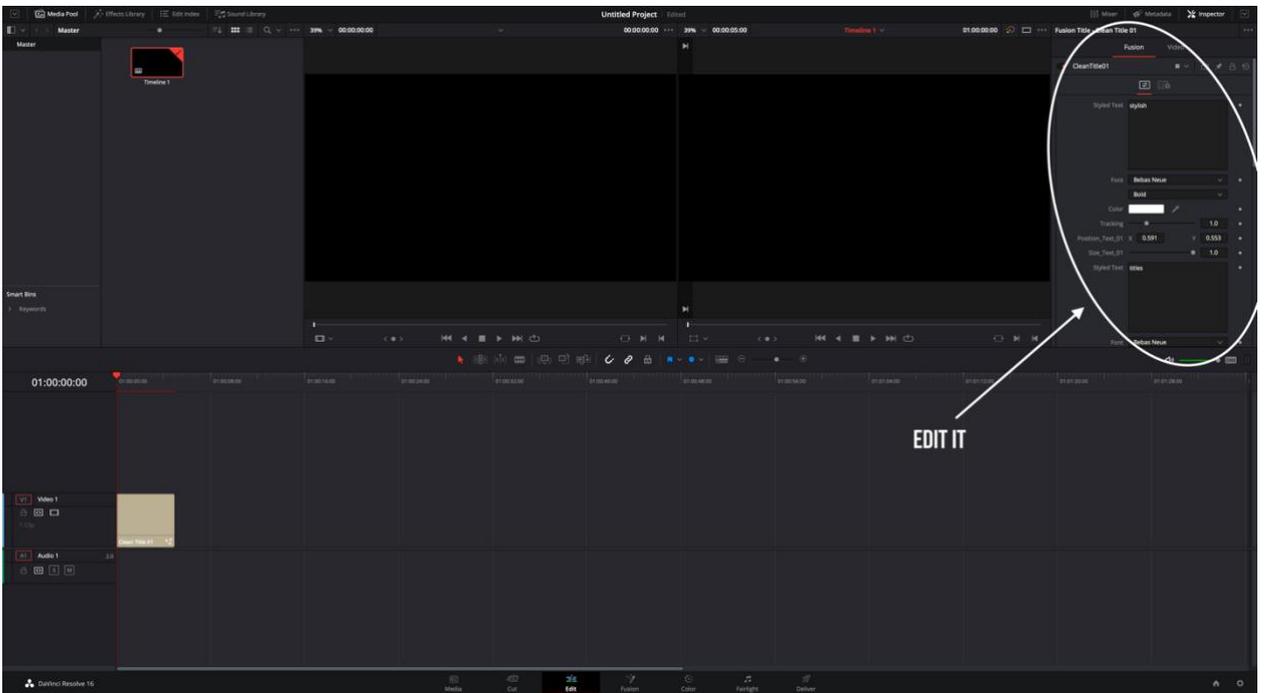

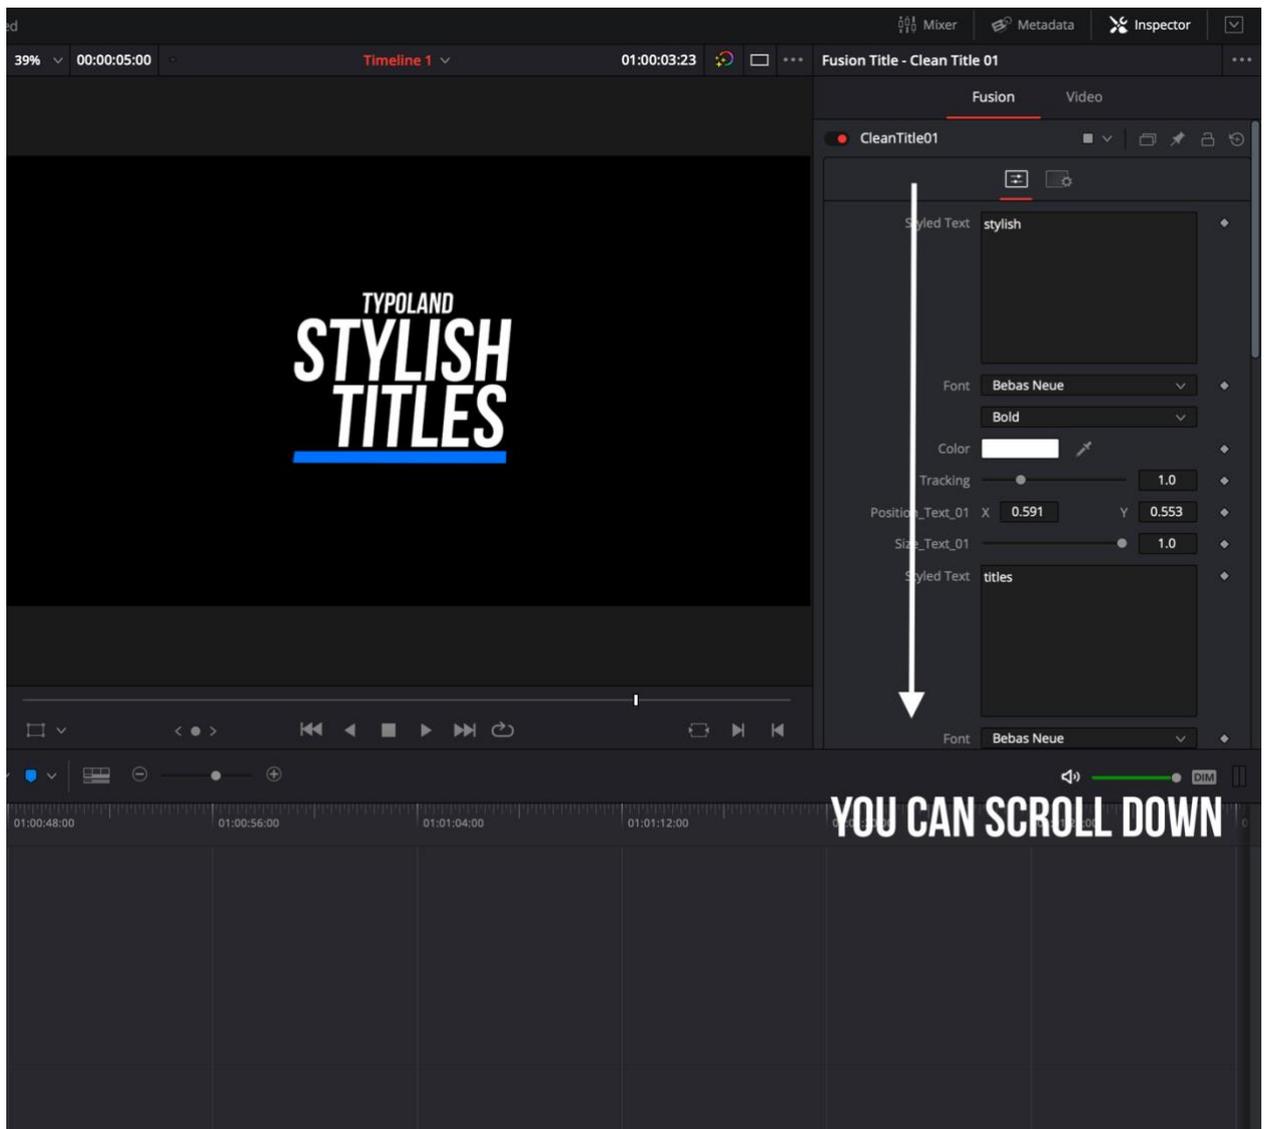

2. On the left side of the screen, select the category "Titles"

3. Select the title you need and drag it onto the timeline

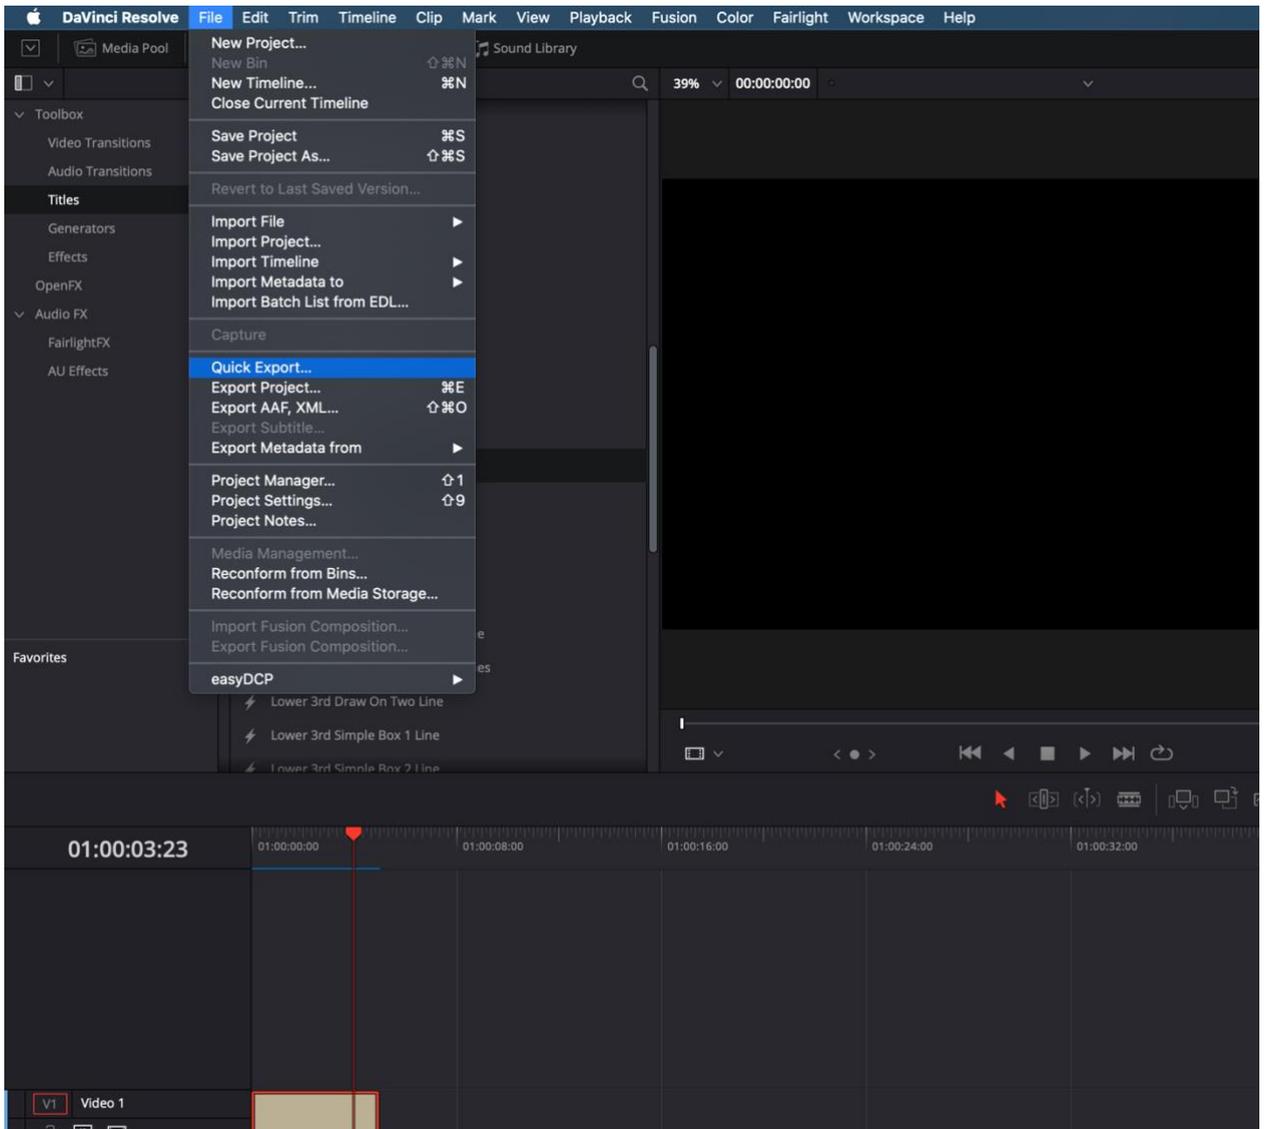

4. A window for editing the title will appear on the right, customizing it for yourself

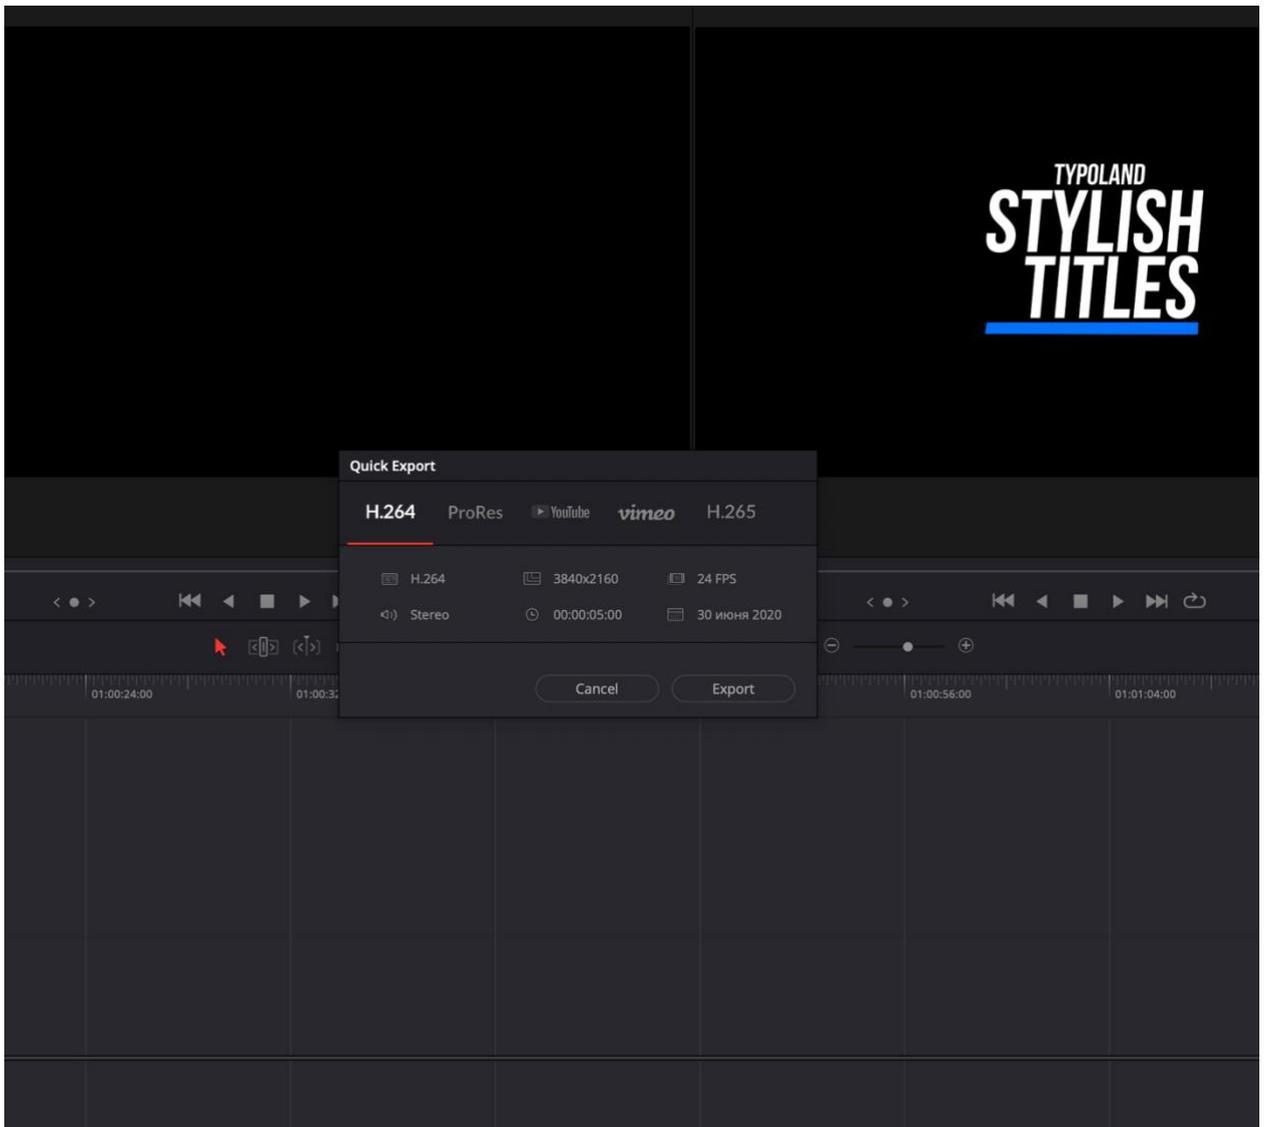

5. To render the project (export to video format), click on "File"> "Quick Export" at the top of the screen

Then click "export"

Thanks for downloading my project, I hope you enjoy it!  
I would be happy if you [subscribe to me on videohive](#), and also rate my project :)
